Conceptual Modeling - ER '98 1998-10-21 this volume constitutes the refereed proceedings of the 17th international conference on conceptual modeling er 98 held in singapore in november 1998 the 32 revised full papers presented were carefully reviewed and selected from a total of 95 submissions the book is divided into chapters on conceptual modeling and design user interface modeling information retrieval on the semantics and constraints conceptual modeling tools quality and reliability metrics industrial experience in conceptual modeling object oriented database management systems data warehousing industrial case studies object oriented approaches

13th International Conference on Aluminum Alloys

(ICAA 13) 2017-02-28 this is a collection of papers presented at the 13th international conference on aluminum alloys icaa 13 the premier global conference for exchanging emerging knowledge on the structure and properties of aluminum materials the papers are organized around the topics of the science of aluminum alloy design for a range of market applications the accurate prediction of material properties novel aluminum products and processes and emerging developments in recycling and applications using both monolithic and multi material solutions

Proceedings of the 13th World Conference on Titanium

2016-04-26 this book contains the proceedings of the 13th world conference on titanium

Proceedings of the 13th Intersociety Energy Conversion Engineering Conference, San Diego, California, August 20-25, 1978

1978 this book contains accepted papers presented at cisis 2020 held in the beautiful and historic city of burgos spain in september 2020 the aim of the cisis 2020

conference is to offer a meeting opportunity for academic and industry related researchers belonging to the various vast communities of computational intelligence information security and data mining the need for intelligent flexible behaviour by large complex systems especially in mission critical domains is intended to be the catalyst and the aggregation stimulus for the overall event after a thorough peer review process the cisis 2020 international program committee selected 43 papers which are published in these conference proceedings achieving an acceptance rate of 28 due to the covid 19 outbreak the cisis 2020 edition was blended combining on site and on line participation in this relevant edition a special emphasis was put on the organization of five special sessions related to relevant topics as fake news detection and prevention mathematical methods and models in cybersecurity measurements for a dynamic cyber risk assessment cybersecurity in a hybrid quantum world anomaly intrusion detection and from the least to the least cryptographic and data analytics solutions to fulfil least minimum privilege and endorse least minimum effort in information systems the selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the program committees for their hard work in the reviewing process this is a crucial process to the creation of a high standard conference and the cisis conference would not exist without their help

13th International Conference on Computational Intelligence in Security for Information Systems

(CISIS 2020) 2020-08-27 the 9th international conference on extending database technology edbt 2004 was held in

heraklion crete greece during march 14 18 2004 the edbt series of conferences is an established and prestigious forum for the exchange of the latest research results in data management held every two years in an attractive european location the conference provides unique opportunities for database researchers practitioners developers and users to explore new ideas techniques and tools and to exchange experiences the previous events were held in venice vienna cambridge avignon valencia konstanz and prague edbt 2004 had the theme new challenges for database technology with the goal of encouraging researchers to take a greater interest in the current exciting technological and application advancements and to devise and address new research and development directions for database technology from its early days database technology has been challenged and advanced by new uses and applications and it continues to evolve along with application requirements and hardware advances today's dbms technology faces yet several new challenges technological trends and new computation paradigms and applications such as pervasive and ubiquitous computing grid computing bioinformatics trust management virtual communities and digital asset management to name just a few require database technology to be deployed in a variety of environments and for a number of different purposes such an extensive deployment will also require trustworthy resilient database systems as well as easy to manage and flexible ones to which we can entrust our data in whatever form they are

Advances in Database Technology - EDBT 2004 2004-02-12
this book is focused on an emerging area i.e. combination of iot and semantic technologies which should enable breaking

the silos of local and or domain specific iot deployments taking into account the way that iot ecosystems are realized several challenges can be identified among them of definite importance are this list is obviously not exhaustive i how to provide common representation and or shared understanding of data that will enable analysis across systematically growing ecosystems ii how to build ecosystems based on data flows iii how to track data provenance iv how to ensure manage trust v how to search for things data within ecosystems vi how to store data and assure its quality semantic technologies are often considered among the possible ways of addressing these and other related questions more precisely in academic research and in industrial practice semantic technologies materialize in the following contexts this list is also not exhaustive but indicates the breadth of scope of semantic technology usability i representation of artefacts in iot ecosystems and iot networks ii providing interoperability between heterogeneous iot artefacts ii representation of provenance information enabling provenance tracking trust establishment and quality assessment iv semantic search enabling flexible access to data originating in different places across the ecosystem v flexible storage of heterogeneous data finally semantic of things and linked open data are architectural paradigms with which the aforementioned solutions are to be integrated to provide production ready deployments

Semantic IoT: Theory and Applications 2021-04-12 this book constitutes the thoroughly refereed joint post proceedings of nine workshops held as part of the 10th international conference on extending database technology

edbt 2006 held in munich germany in march 2006 the 70 revised full papers presented were selected from numerous submissions during two rounds of reviewing and revision

Current Trends in Database Technology - EDBT 2006

2006-10-17 july 24 25 2017 rome italy key topics

pharmaceutical nanotechnology novel drug delivery technology nanomedicine and drug delivery nanotechnology for pediatric medicine nanotechnology in preclinical and clinical development regulatory guidance for pharmaceutical nanotechnology nanotechnology for targeted drug delivery future aspects of pharmaceutical nanotechnology recent advances in nanotechnology major challenges in nanotechnology pharmaceutical companies and markets business opportunities in nanotechnology nano pharmaceuticals nanomedicines and biomedical applications

Proceedings of 13th International Conference and Exhibition on Nanomedicine and Pharmaceutical

Nanotechnology 2017 2017-07-18 this book constitutes the

refereed post proceedings of the joint international conference on pervasive computing and the networked world icpca sws 2012 held in istanbul turkey in november

2012 this conference is a merger of the 7th international conference on pervasive computing and applications icpca and the 4th symposium on society sws the 53 revised full papers and 26 short papers presented were carefully

reviewed and selected from 143 submissions the papers cover a wide range of topics from different research

communities such as computer science sociology and

psychology and explore both theoretical and practical issues

in and around the emerging computing paradigms e g

pervasive collaboration collaborative business and

networked societies they highlight the unique characteristics of the everywhere computing paradigm and promote the awareness of its potential social and psychological consequences

Circular 1963 this book provides a broad yet detailed introduction to neural networks and machine learning in a statistical framework a single comprehensive resource for study and further research it explores the major popular neural network models and statistical learning approaches with examples and exercises and allows readers to gain a practical working understanding of the content this updated new edition presents recently published results and includes six new chapters that correspond to the recent advances in computational learning theory sparse coding deep learning big data and cloud computing each chapter features state of the art descriptions and significant research findings the topics covered include multilayer perceptron the hopfield network associative memory models clustering models and algorithms the radial basis function network recurrent neural networks nonnegative matrix factorization independent component analysis probabilistic and bayesian networks and fuzzy sets and logic focusing on the prominent accomplishments and their practical aspects this book provides academic and technical staff as well as graduate students and researchers with a solid foundation and comprehensive reference on the fields of neural networks pattern recognition signal processing and machine learning

Pervasive Computing and the Networked World 2013-03-14 this three volume work presents the proceedings from the 19th international ship and offshore structures congress held in cascais portugal on 7th to 10th september 2015 the

international ship and offshore structures congress issc is a forum for the exchange of information by experts undertaking and applying marine structural research the aim of

Neural Networks and Statistical Learning 2019-09-12

Proceedings of the 13th Space Photovoltaic Research and Technology Conference (SPRAT 13) 1994 this book

includes the papers presented at the fifth international conference on application of natural language to information systems nldb 2000 which was held in versailles france on june 28 30 following nldb95 in versailles nldb96 in amsterdam nldb97 in vancouver and nldb99 in klagenfurt nldb 2000 was a forum for exchanging new research results and trends on the benefits of integrating natural language resources in information system engineering since the first nldb workshop in 1995 it has become apparent that each aspect of an information system life cycle may be improved by natural language techniques database design specification validation conflict resolution database query languages and application programming that use new software engineering research natural language program specifications as information systems are now evolving into the communication area the term databases should be

considered in the broader sense of information and communication systems the main new trend in nldb 2000 is related to the web wave web querying web answering and information retrieval among 47 papers submitted from 18 countries the program committee selected 29 papers to be presented during the conference besides these regular papers two invited talks given by pr reind p van de riet and pr maurice gross and a set of posters and demonstrations are also included in these proceedings

Ships and Offshore Structures XIX 2015-09-03 the papers in this proceeding discuss current and future trends in wearable communications and personal health management through the use of wireless body area networks wban the authors posit new technologies that can provide trustworthy communications mechanisms from the user to medical health databases the authors discuss not only on body devices but also technologies providing information in body also discussed are dependable communications combined with accurate localization and behavior analysis which will benefit wban technology and make the healthcare processes more effective the papers were presented at the 13th eai international conference on body area networks bodynets 2018 oulu finland 02 03 october 2018

Proceedings of 13th International Conference on Agriculture & Horticulture 2018 2018-09-04 reinventing space is the largest global conference and exhibition for one of the space industry s fastest growing sectors over its 82 year history the british interplanetary society has acted as a forum for new and innovative ideas and developments in astronautics low cost access and utilization of space these

conference proceedings reflect the work done at the 13th reinventing space conference the second biggest space event in the uk during 2015 the global economic climate is creating demand to reduce expenditure leading to new challenges and opportunities in the world s space industry the need to create more responsive systems and launchers that are capable of delivering to space quickly cheaply and reliably has never been more vital this collection from rispace brings together industry agency government financiers academia and end users it focuses on the commercialization of space and addresses a range of topics including low cost launch opportunities the rebirth of constellations beyond leo activities and novel technologies these papers encourage and promote forward thinking ideas and concepts for the future exploration and utilization of space the proceedings address new ways of doing business in space how do we make money on affordable and responsive space missions tactical space systems how do we best serve the needs of defense missions civilian missions the needs of emergency responders interplanetary missions can we use new technology to explore the solar system at dramatically lower cost what are the methods processes and technologies that we can use to make major reductions in the cost of space missions new application areas for low cost space systems which ones can take advantage of newer much lower cost systems how do we educate and motivate the coming generation without whom there won t be a space industry

Proceedings of 13th Global Dermatologists Congress

2018 2018-12-28 this book presents the proceedings of the 13th international conference on application of fuzzy systems and soft computing icaifs 2018 held in warsaw poland on august 27 28 2018 it includes contributions from diverse areas of soft computing such as uncertain computation z information processing neuro fuzzy approaches evolutionary computing and others the topics of the papers include theory of uncertainty computation theory and application of soft computing decision theory with imperfect information neuro fuzzy technology image processing with soft computing intelligent control machine learning fuzzy logic in data analytics and data mining evolutionary computing chaotic systems soft computing in business economics and finance fuzzy logic and soft computing in the earth sciences fuzzy logic and soft computing in engineering soft computing in medicine biomedical engineering and the pharmaceutical sciences and probabilistic and statistical reasoning in the social and educational sciences the book covers new ideas from theoretical and practical perspectives in economics business industry education medicine the earth sciences and other fields in addition to promoting the development and application of soft computing methods in various real life fields it offers a useful guide for academics practitioners and

graduates in fuzzy logic and soft computing fields

Proceedings of 13th World Congress on Healthcare & Technologies 2018 2021-09-13

this book is a collection of peer reviewed best selected research papers presented at 4th international conference on computer networks and inventive communication technologies iccnct 2021 the book covers new results in theory methodology and applications of computer networks and data communications it includes original papers on computer networks network protocols and wireless networks data communication technologies and network security the proceedings of this conference are a valuable resource dealing with both the important core and the specialized issues in the areas of next generation wireless network design control and management as well as in the areas of protection assurance and trust in information security practice it is a reference for researchers instructors students scientists engineers managers and industry practitioners for advanced work in the area

Proceedings of 13th International Conference on Laboratory Medicine & Pathology 2018 1967

this book showcases over 100 cutting edge research papers from the 4th international conference on research into design icord 13 the largest in india in this area written by eminent researchers from over 20 countries on the design process methods and tools for supporting global product development gpd the special features of the book are the variety of insights into the gpd process and the host of methods and tools at the cutting edge of all major areas of design research for its support the main benefit of this book for researchers in engineering design and gpd are access to the latest quality research in this area for practitioners and

educators it is exposure to an empirically validated suite of methods and tools that can be taught and practiced

Proceedings of 13th International Conference on Microbial Interactions & Microbial Ecology 2018

2013-01-12 this book constitutes the refereed proceedings of the 13th international conference on intelligent data engineering and automated learning ideal 2012 held in natal brazil in august 2012 the 100 revised full papers presented were carefully reviewed and selected from more than 200 submissions for inclusion in the book and present the latest theoretical advances and real world applications in computational intelligence

13th International Conference on Theory and Application of Fuzzy Systems and Soft Computing – ICAFS-2018

2012-08-07 advanced database indexing begins by introducing basic material on storage media including magnetic disks raid systems and tertiary storage such as optical disk and tapes typical access methods e g b trees dynamic hash files and secondary key retrieval are also introduced the remainder of the book discusses recent advances in indexing and access methods for particular database applications more specifically issues such as external sorting file structures for intervals temporal access methods spatial and spatio temporal indexing image and multimedia indexing perfect external hashing methods parallel access methods concurrency issues in indexing and parallel external sorting are presented for the first time in a single book advanced database indexing is an excellent reference for database professionals and may be used as a text for advanced courses on the topic

Computer Networks and Inventive Communication

Technologies 2012-09-07 these proceedings represent the work of authors at the 13th european conference on e government eceg 2013 the conference this year is hosted by the iuniversity of insubria in como italy the conference chair is professor walter castelnovo and the programme chair is professor elena ferrari both are fro the department of theoretical and applied sciences at the university of insubria the opening keynote address is given by dr gianluca misuraca from the european commission joint research centre institute for prospective technological studies seville spain and gianluca is addressing the topic egovernment past present future a policy research perspective for renewing governance in the digital age the second day of the conference is opened by dr antoinio cordella from the london school of economics london uk who will talk about public value creation the new challenge for e government policies eceg brings together researchers government officials and practitioners in the area of e government from around the world participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community with an initial submission of 153 abstracts after the double blind peer review process there are papers published in these conference proceedings from 40 countries including australia austria belgium brazil canada china costa rica croatia denmark eygpt germany greece india iran iraq ireland italy latvia lithuania luxembourg malaysia netherlands new zealand norway pakistan poland romania russia saudi arabia serbia slovenia south africa spain sweden switzerland taiwan thailand turkey uk and usa this will ensure a very interesting two days

Evaluation of Microrecording Techniques for

Information and Data Storage and Retrieval: By B. J.

S. Williams 2013-06-13 the 2010 international conference on information systems and mining wism 2010 was held october 23 24 2010 in sanya china wism 2010 received 603 submissions from 20 countries and regions after rigorous reviews 54 hi quality papers were selected for publication in the wism 2010 proceedings the acceptance rate was 9 the aim of wism 2010 was to bring together researchers working in many different areas of information systems and mining to foster the exchange of new ideas and promote international collaboration in addition to the large number of submitted papers and invited sessions there were several internationally well known keynote speakers on behalf of the organizing committee we thank hainan province institute of computer and qiongzhou university for its sponsorship and logistics support we also thank the members of the organizing committee and the program committee for their hard work we are very grateful to the keynote speakers invited session organizers session chairs reviewers and student helpers last but not least we thank all the authors and participants for their great contributions that made this conference possible october 2010 fu lee wang gong zhiguo xiangfeng luojingsheng lei

ICoRD'13 2010-10-12 with the increasing complexity of and dependency on software software products may suffer from low quality high prices be hard to maintain etc software defects usually produce incorrect or unexpected results and behaviors accordingly software defect prediction sdp is one of the most active research fields in software engineering and plays an important role in software quality assurance

based on the results of sdp analyses developers can subsequently conduct defect localization and repair on the basis of reasonable resource allocation which helps to reduce their maintenance costs this book offers a comprehensive picture of the current state of sdp research more specifically it introduces a range of machine learning based sdp approaches proposed for different scenarios i e wpdp cpdp and hdp in addition the book shares in depth insights into current sdp approaches performance and lessons learned for future sdp research efforts we believe these theoretical analyses and emerging challenges will be of considerable interest to all researchers graduate students and practitioners who want to gain deeper insights into and or find new research directions in sdp it offers a comprehensive introduction to the current state of sdp and detailed descriptions of representative sdp approaches

Intelligent Data Engineering and Automated Learning -- IDEAL 2012 2024-01-17 this book presents the proceedings of the 13th international conference on electrical bioimpedance icebi 2007 combined with the 8th conference on electrical impedance tomography held at the graz university of technology in graz austria in august 2007

Advanced Database Indexing 2007-08-29 this volume contains the papers presented at the 14th sdl forum bochum germany entitled design for motes and mobiles the sdl forum has been held every two years for the last three decades and is one of the most important open events in the calendar for anyone from academia or industry involved in system designlanguagesandmodelling technologies it is a primary conference event for discussion of the evolution and use of these languages the most recent innovations trends

experiences and concerns in the eld are discussed and presented the sdl forum series addresses issues related to the modelling and analysis of reactive systems distributed systems and real time and complex systems such as telecommunications automotive and aerospace applications the intended audience of the series includes users of modelling techniques in industrial research and standardization contexts as well as tool vendors and language researchers of course during the last three decades languages associated methods and tools have evolved and new ones have been developed the application domain haschangedalmostbeyondrecognition threedecadesagothemobiletechnology of today was science ction whereas now we nd software systems embedded in inexpensive childrens toys more recently multi core processors have become common technology for consumer computers and are beginning to be applied in smalldevices eveninsmallco operating independently poweredremotedevices such as motes and mobile phones there is enough memory and processing power to support quite sophisticated operating systems and applications

ECEG2013- 13th European Conference on eGovernment
2009-09-18 this book is a printed edition of the special issue selected papers from the 13th estuarine and coastal modeling conference that was published in *jmse*

Web Information Systems and Mining 2018-10-02 this new proceedings discusses developments in air gas and refrigeration compressors vacuum pumps and expanders it is the 13th edition of the international conference on compressors and their systems a three day conference organised by the centre for compressors technology at city

university of london in collaboration with among other the meche iir and ior the conference offers a platform to identify current challenges in the field and provide the essential content and direction to shape future research the international conference on compressors and their systems series began in 1999 as a result of industrial consultation and a need for academic collaboration initially the conference was organised by the fluid machinery group of the institution of mechanical engineers imeche with the support of holroyd from 2009 the centre for compressor technology at city university of london took over its management and the conference is now one of the main conventions taking place biennially in the uk becoming world renowned for its place in industry and academia to gather and discuss a broad range of topical issues related to compressors and compression systems this year s conference has the theme compressors and expanders in future energy systems and will be of interest to researchers and engineers in industry

Intelligent Software Defect Prediction 2024-01-01 this volume contains 64 papers from contributors around the world on a wide range of topics in database systems research of special mention are the papers describing the practical experiences of developing and implementing some of the many useful database systems on the market readers should find useful new ideas from the proceedings of this international symposium

13th International Conference on Electrical Bioimpedance and 8th Conference on Electrical Impedance Tomography 2007 2019-10-03 this book covers industrial databases and applications and offers

generic database modeling techniques provided by
publisher
