How to Succeed on Primary Care and Community Placements 2016-01-19

this brand new textbook presents a new approach to the teaching and understanding of global health it describes the shared opportunities but also the problems that we all face wherever we live and the particular needs of the poorest people in every society covering subjects from epidemics and climate change the need to staff and resource health services appropriately

the rich potential of science and technology and the impacts of social and political change in the world around us all is presented at a level appropriate for the student looking to gain an understanding of this broad and developing area

Veterinary Medical Education 2017-03-28

there are significant variations in how healthcare systems and health professionals are regulated globally one feature that they increasingly have in common is an emphasis on the value of including members of the public in quality assurance processes while many argue that this will help better serve the public interest others question how far the changing regulatory reform agenda is still dominated by medical interests bringing together leading academics worldwide this collection compares and critically examines the ways in which different countries are regulating healthcare in general and health professions in particular in the interest of users and the wider public it is the first book in the sociology of health professions series

One World Health 2016-06-30

can i choose to die as the number of requests for euthanasia and physician assisted suicide continues to rise human rights law faces a new conflict the right to die vs the right to life the right to die or in other words the right to choose the time and manner of one s own death is a question of personal autonomy and its limits this book provides a comprehensive understanding of the right to die and sheds light on its possible future under the european convention on human rights after setting a clear framework by defining the key terminology the book takes a two part approach to achieving its aim the first part focuses on the right to die in practice by examining selected jurisdictions switzerland which is famous for its assisted suicide organizations and the netherlands which was the first country to legalize euthanasia are examined in detail belgium germany the united kingdom and as an exception to the convention perspective canada are also included while this examination offers a better understanding of what the right to die looks like in practice it also provides insights on the slippery slope argument which serves as a counterweight to personal autonomy without making a definitive statement on its validity this part also illustrates the different paths that led or did not lead to the right to die in practice the second part is an analysis of the european court of human rights case law on the right to die the court has made important statements in only very cases while its caution when approaching such a delicate and controversial topic among its 47 members is understandably emphasized this analysis of the court s approach to the balancing of personal autonomy against other interests allows us to take a look back at the practice in more permissive jurisdictions through the lens of the convention taken together the book s two parts provide valuable lessons for countries that decide to practice assisted dying which are outlined in the conclusion in addition given that a purely legal approach can only offer a partial picture the book argues that an interdisciplinary approach would be much more favorable in terms of providing the necessary basis for the right to die debate

Professional health regulation in the public interest 2018-06-06

this book examines the regulation and practice of medical decision making where the context is that of a multiple pregnancy and where the question is whether or not to carry out a fetal reduction procedure it concerns three

main lines of inquiry first the nature of fetal reduction and the legal grounds for termination typically relied upon secondly the extent to which legal ethical and professional norms guide or constrain this particular kind of decision making and thirdly the adequacy of these norms the book uses empirical sources to develop its analysis contributing new insight and the kind of evidence necessary to shape regulation clinical practice and future research the key findings show that fetal abnormality is often given as the justifying ground that the legal ethical and professional norms offer little explicit guidance for fetal reduction and on the general question of termination ethical norms suffer from a high level of contestation the key norms in the uk abortion legislation are unclear and disconnected from practice and professional norms are only marginally more adequate given the indeterminacy of these norms it is no surprise that the evidence indicates that doctors are only weakly guided by them in making their decisions various recommendations are advanced in this book including the need for a situational emphasis on shared decision making and patient centred care

The Right to Die with Dignity 2022-06-20

dr adrian massey has worked at the intersection of medicine and society for decades he argues compellingly that our hyper medicalized society has falsely equated sickness with illness and sickness with unfitness to work whereas sickness is primarily a social problem requiring social not medical solutions sick note britain lays bare britain s gross error when doctors cannot fix anxiety or chronic pain workplace attendance is still treated as a matter for arbitration by our strained primary care service what is needed is a tailored employer employee contractual solution but obstacles block this approach excessively complex employment law constraining both sides an outdated benefits system that overburdens doctors and traumatizes the vulnerable and a workplace culture that is too inflexible to keep sick employees in work this is a blistering condemnation of a sham system that works for nobody and an urgent call to rethink how we manage sickness for the sake of our economy our wellbeing and our health service

Regulating Decision-Making in Multiple Pregnancy 2021-06-22

the challenge for those coaching mentoring supervising or teaching adults is to design and deliver high quality programmes that encompass a blend of teaching and learning approaches and strategies that are constructed for adult learners in multiple educational environments and that cater for the diversity of adult learners needs adult learners are complex individuals who come to the learning process with a multitude of different experiences teaching coaching and mentoring adult learners helps practitioners step up to this challenge by developing the skills needed to share their expertise with adult learners and engage them in new transformative practices this book also forms a timely contribution to the current period of evolution in adult education where extreme changes in the nature and scope of work and the globalisation of work and life are influencing learning the shift in adult education addressed in this book includes the globalisation of the workforce and the cultural impact on adult tertiary and further education the relationship established between adult educators and adult learners provision of adult education and professional development by private and major multimedia and corporate interests occupations boundaries between professions and between skilled and unskilled work assessing adult learners needs and adapting strategies to meet the perceived needs of adult learners in medicine education psychology and industry designing learning experiences to maximise the processing of complex conceptual knowledge and then transforming the

knowledge to fit new learning environments the role of new technologies of learning in adult and vocational learning this book provides research based insight into the expectations and the value of the coach mentor tutor and supervisor roles and combines research with strategic guidance to support the implementation of innovative techniques through case studies strategies and methodologies in teaching and learning in higher education and professional learning bringing together insights from an expert range of international contributors this text will be invaluable to higher education professionals and those involved in supervising coaching and mentoring in the workforce

Sick-Note Britain 2019-03-01

drawing from the perspectives of a variety of disciplines this innovative text is unlike any others of its kind health policy analysis an interdisciplinary approach fourth edition analyzes current u s health policy and proposes various alternatives for developing future health policy without pushing a single solution set rather it considers the viewpoints of health economics political science health technology assessment evaluation and health services research expanded to cover the entire health policy cycle the fourth edition is organized into five sections beginning with an exploration of the current and historical issues with the u s healthcare system and consideration of the alternatives for future policy that have strong support it then reviews the political processes that influence planning in various healthcare settings presents the accepted methods of economic and financial analysis and addresses the ethical and other value considerations that must factor into

Teaching, Coaching and Mentoring Adult Learners 2016-11-03

the ability to reflect on practice is a fundamental component of effective medical practice in a sector increasingly focused on professionalism and patient centred care developing reflective practice is a timely publication providing practical guidance on how to acquire the reflective skills necessary to become a successful clinician this new title draws from a wide range of theoretical and practical multidisciplinary perspectives to assist students practitioners and educators in embedding reflection in everyday activities it also offers structures and ideas for more purposeful and meaningful formal reflections and professional development developing reflective practice focuses on the developing practitioner and their lifelong learning and the development of professional identity through reflection provides practical how to information for students practitioners and educators including realistic case examples and practice based hints and tips examines and explains the theoretical and conceptual approaches to reflective practice including its models and frameworks

Developing Reflective Practice 2017-04-11

across the world higher education is witnessing exponential growth in both student participation and types of educational providers one key phenomenon of this growth is an increase in student diversity governments are widening

access to higher education for students from traditionally underrepresented groups however this raises questions about whether this rapid growth may in face compromise academic quality this book presents case studies of how higher education institutions in diverse countries are maintaining academic excellence while increasing the access and participation of students from historically underrepresented backgrounds including case studies spanning four continents the authors and editors examine whether increasing widening participation positively impacts upon academic quality this volume will be of interest and value to students and scholars of global higher education representation and participation in education and quality in higher education

Clinical Topics in Teaching Psychiatry 2022-11-30

focusing on a matter of continuing contemporary significance this book is the first work to offer an in depth exploration of exploitation in the doctor patient relationship it provides a theoretical analysis of the concept of exploitation setting out exploitation s essential elements within the authors account of wrongful exploitation it then presents a contextual analysis of exploitation in the doctor patient relationship considering the dynamics of this fiduciary relationship the significance of vulnerability and the reasons why exploitation in this relationship is particularly wrongful two case studies sexual exploitation and assisted dying are employed to assess what the appropriate legal ethical and regulatory responses to exploitation should be to identify common themes regarding the doctor s behaviour such as the use of undue influence as a conduit through which to take advantage of and misuse patients and to illustrate the effects of exploitation on patients a recurring question addressed is how exploitation in the doctor patient relationship is and should be dealt with by ethics regulators and the law and whether exploitation in this relationship is a special case the book provides a critical interdisciplinary evaluation of exploitation in the doctor patient relationship that will be of interest to health care lawyers bioethicists legal academics and practitioners health care professionals and policymakers

AFX 8 2014-09-08

written by a team of leading trainers practitioners and supervisors this bestselling classic is the trainee therapist s best friend it identifies and guides trainees through the practical skills and knowledge they ll need to make a success of their training from writing essays through to case formulation and on to preparing for their first meeting with a client along the way it addresses and allays the concerns which are common to all students now in its fourth edition the book has been fully updated to take account of the significant changes in the therapy professions in recent years it now includes new and important chapters on evidence based practice working with diversity reflective practice using social media technology and online therapy the trainee handbook is an invaluable companion and source of information and guidance for all trainees in counselling psychotherapy and counselling psychology and newly qualified therapists entering into practice

Achieving Equity and Quality in Higher Education 2018-07-05

in the 21st century people in the developed world are living longer they hope they will have a healthy longer life and then die relatively quickly and peacefully but frequently that does not happen while people are living healthy a little longer they tend to live sick for a lot longer and at the end of being sick before dying they and their families are frequently faced

with daunting decisions about whether to continue life prolonging medical treatments or whether to find meaningful and forthright ways to die more easily and quickly in this context some people are searching for more and better options to hasten death they may be experiencing unacceptable suffering in the present or may fear it in the near future but they do not know the full range of options legally available to them voluntary stopping eating and drinking used though relatively unknown and poorly understood is a widely available option for hastening death used is legally permitted in places where medical assistance in dying used is not and unlike u s jurisdictions where used is legally permitted used is not limited to terminal illness or to those with current decision making capacity used is a compassionate option that respects patient choice despite its strongly misleading image of starvation death by used is typically peaceful and meaningful when accompanied by adequate clinician and or caregiver support moreover the practice is not limited to avoiding unbearable suffering but may also be used by those who are determined to avoid living with unacceptable deterioration such as severe dementia but used is not for everyone this volume provides a realistic appropriately critical yet supportive assessment of the practice eight illustrative previously unpublished real cases are included receiving pragmatic analysis in each chapter the volume s integrated multi professional multi disciplinary character makes it useful for a wide range of readers patients considering present or future end of life options and their families clinicians of all kinds ethicists lawyers and institutional administrators appendices include recommended elements of an advance directive for stopping eating and drinking in one s future if and when decision making capacity is lost and what to record as cause of death on the death certificates of those who hasten death by used

Exploitation, Ethics and Law 2021-08-26

this book is devoted to the rapidly growing area of science dealing with structure and properties of biological surfaces in their relation to particular functions this volume written by a team of specialists from different disciplines covers various biological surface functions sensing coloration attachment drag reduction moisture harvesting etc because biological surfaces have a virtually endless potential of technological ideas for the development of new materials and systems inspirations from biology could also be interesting for a broad range of topics in surface engineering this volume together with two previous volumes functional surfaces in biology vols 1 2 published in 2009 taken together present a good reference for a novice in the field the book is intended for use by researchers who are active or intend to become active in the field the appeal of this topic is expected to be broad ranging from classical biology biomechanics and physics to such applied fields as materials science and surface engineering

The Trainee Handbook 2016-11-08

the twenty first century has witnessed significant changes to the structures and policies framing higher education but how do these changes in the norms values and extent shape the generation now coming of age employing a generational analysis this book offers an original approach to the study of education it explores the qualitative dimensions of the relationship between academics and students and examines wider issues of culture and socialisation from tuition fees and student mental health to social mobility and employment this is a timely contribution to current debates about the university and an invaluable resource for those interested in education youth and intergenerational relations

Voluntarily Stopping Eating and Drinking 2021-07-27

work in all its guises is a fundamental part of the human experience and yet it is a setting where emotions rarely take centre stage this edited collection interrogates the troubled relationship between emotion and work to shed light on the feelings and meanings of both paid and unpaid labour from the late 19th to the 21st century central to this book is a reappraisal of emotional labour now associated with the household and life admin work largely undertaken by women and which reflects and perpetuates gender inequalities critiquing this term and the history of how work has made us feel feelings and work in modern history explores the changing values we have ascribed to our labour examines the methods deployed by workplaces to manage or administrate our emotions and traces feelings through 19th 20th and 21st century europe asia and south america exploring the damages wrought to physical and emotional health by certain workplaces and practices critiquing the pathologisation of some emotional responses to work and acknowledging the joy and meaning people derive from their labour this book appraises the notion of work life balance explores the changing notions of professionalism and critically engages with the history of capitalism and neo liberalism in doing so it interrogates the lasting impact of some of these histories on the current and future emotional landscape of labour

Functional Surfaces in Biology III 2018-03-23

death dying loss and care giving are not just medical issues but societal ones palliative care has become increasingly professionalised focused around symptom science with this emphasis on minimizing the harms of physical psychological and spiritual stress there has been a loss of how cultures and communities look after their dying with the wider social experience of death often sidelined in the professionalisation and medicalisation of care however the people we know and love in the places we know and love make up what matters most for those undergoing the experiences of death loss and care giving over the last 25 years the theory practice research evidence base and clinical applications have developed generating widespread adoption of the principles of public health approaches to palliative care the essential principles of prevention harm reduction early intervention and health and wellbeing promotion can be applied to the universal experience of end of life irrespective of disease or diagnosis compassionate communities have become a routine part of the strategy and service development in palliative care both within the uk and internationally the oxford textbook of public health palliative care provides a reframing of palliative care bringing together the full scope of theory practice and evidence into one volume written by international leaders in the field it provides the first truly comprehensive and authoritative textbook on the subject that will help to further inform developments in this growing specialty

Generational Encounters with Higher Education **2020-03-13**

a powerful examination of intelligently applied kindness in rehabilitating the welfare state particularly health and social care

Feelings and Work in Modern History 2022-01-27

practising fundamental patient care skills and techniques is essential to the development of trainees wider competencies in all medical specialties after the success of simulation learning techniques used in other industries such

as aviation this approach has been adopted into medical education this book assists novice and experienced teachers in each of these fields to develop a teaching framework that incorporates simulation the manual of simulation in healthcare second edition is fully revised and updated new material includes a greater emphasis on patient safety interprofessional education and a more descriptive illustration of simulation in the areas of education acute care medicine and aviation divided into three sections it ranges from the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development to the considerations for healthcare centred simulation within medical education and the steps required to develop courses that comply with best practice in medical education providing an in depth understanding of how medical educators can best incorporate simulation teaching methodologies into their curricula this book is an invaluable resource to teachers across all medical specialties

Oxford Textbook of Public Health Palliative Care 2022
