sparta was a small city which consistently punched above its weight in the affairs of classical greece happily meddling in the affairs of the other cities for two centuries her warriors were acknowledged as second to none yet at only one period in its long history in the late fourth and early third century bc did the home of these grim warriors seem set to entrench itself as the dominant power in the greek world this period includes the latter stages of the peloponnesian war from 412 bc to the spartan victory in 402 and

then down to the spartan defeat by the thebans at leuctra in 371 bc where it all began to unravel for the spartan empire surprisingly few previous books have covered the tumultuous first decades of the fourth century bc particularly when compared to the ample coverage of the peloponnesian war as the authors explain although the earlier period has the benefit of thucydides magisterial history the period covered here is actually well served by sources and well worthy of study there are many interesting characters here including alcibiades lysander agesilaus pelopidas and epaminondas to name but a few in addition there are several campaigns and battles that are reported in enough detail to make them interesting and comprehensible to the reader bob bennett and mike roberts untangle the complexities of this important but unduly neglected period for the modern reader

marytanov explains why and how the us armed forces have lost the military supremacy they thought they once had and how russia which supposedly had been defeated in the cold war succeeded not only in catching up with usa but actually surpassing it in many key domains such as long range cruise missiles diesel electric submarines air defenses electronic warfare air superiority and many others andrei martyanov s book is an absolute must read for any person wanting to understand the reality of modern warfare and super power competition the saker while exceptionalism is not unique to america the intensity of their conviction and its global ramifications are this view of its

exceptionalism has led the us to grossly misinterpret sometimes deliberately the causative factors of key events of the past two centuries accordingly the wrong conclusions have been derived and very wrong lessons learned nowhere has this been more manifest than in american military thought and its actual application of military power time after time the american military has failed to match lofty declarations about its superiority producing instead a mediocre record of military accomplishments starting from the korean war the united states hasn't won a single war against a technologically inferior but mentally tough enemy the technological dimension of american strategy has completely overshadowed any concern with the social cultural operational and even tactical requirements of military and political conflict with a new cold war with russia emerging the united states enters a new period of geopolitical turbulence completely unprepared in any meaningful way intellectually economically militarily or culturally to face a reality which was hidden for the last 70 years behind the curtain of never ending chalabi moments and a strategic delusion concerning russia whose history the us viewed through a solzhenitsified caricature kept alive by a powerful neocon lobby which even today dominates us policy makers minds martyanov's former soviet military background enables deep insight into the fundamental issues of warfare and military power as a function of national power assessed correctly not through the lens of wall street economic indices and a free economy but through the numbers of enclosed technological cycles and culture much of which has been shaped in russia by continental warfare and which is practically absent in the us
