political change doesn't always begin with a bang it often starts with just a whisper from the discussions around kitchen tables that led to the dismantling of the soviet bloc to the more recent emergence of internet initiatives like moveon.org and redeem the vote that are revolutionizing the american political landscape consequential political life develops in small spaces where dialogue generates political power in the politics of small things jeffrey goldfarb provides an innovative way for understanding politics a way of appreciating the significance of politics at the micro level by comparatively analyzing key turning points and institutions in recent history he presents a sociology of human interactions that lead from small to large dissent around the old soviet bloc life on the streets in warsaw prague and bucharest in 1989 the network of terror that spawned 9/11 and the religious and internet mobilizations that transformed the 2004 presidential election to name a few in such pivotal moments he masterfully shows political autonomy can be generated presenting alternatives to the big politics of the global stage and the dominant narratives of terrorism

empire of hope asks how emotions become meaningful in political life in a diverse array of cases from recent japanese history david leheny shows how sentimental portrayals of the nation and its global role reflect a durable story of hopefulness about the country s postwar path from the medical treatment of conjoined vietnamese children victims of agent orange the global promotion of japanese popular culture a tragic maritime accident involving a us navy submarine to the 2011 tsunami and nuclear disaster this story has shaped the way in which political figures writers officials and observers have depicted what the nation feels expressions of national emotion do several things they construct the boundaries of the national body they inform and discipline appropriate expression and they depoliticize messy problems that threaten to produce divisive questions about winners and losers most important they work because they appear to be natural simple and expected expressions of how the nation shares feeling even when they paper over the extraordinary divergence in how the nation s citizens experience each incident in making its arguments empire of hope challenges how we read the relations between emotion and politics by arguing unlike those who build from the neuroscientific turn in the social sciences or those developing affect theory in the humanities that the focus should be on emotional representation rather than on emotion itself

how did we get into this mess every morning many americans ask this as with a cringe they pick up their phones and look to see what terrible thing president trump has just said or done regardless of what he s complaining about or whom he s attacking a second question comes hard on the heels of the first how on earth do we get out of this alan wolfe has an answer in the politics of petulance he argues that the core of our problem isn t trump himself it s that we are mired in an age of political immaturity that immaturity is not grounded in any one ideology nor is it a function of age or education it s in an abdication of valuing the character of would be leaders it s in a failure to acknowledge even welcome the complexity of government and society and it s in a loss of the ability to be skeptical without being suspicious in 2016 many americans were offered tantalizingly simple answers to complicated problems and like children being offered a lunch of pop rocks and coke they reflexively and mindlessly accepted the good news such as it is is that we ve been here before wolfe reminds us that we know how to grow up and face down trump and other demagogues wolfe reinvigorates the tradition of public engagement exemplified by midcentury intellectuals such as richard hofstadter reinhold niebuhr and lionel trilling and he draws lessons from their battles with mccarthyism and conspiratorial paranoia wolfe mounts a powerful case that we can learn from them to forge a new path for political intervention today wolfe has been thinking and writing about american life and politics for decades he sees this moment as one of real risk but he s not throwing up

his hands he s bracing us we ve faced demagogues before we can find the intellectual maturity to fight back yes we can

thinking psychoanalytically about the nature of social exclusion involves a self questioning on the part of the interpreter while we may all have some experiences of having been subject to stereotyping silencing discrimination and exclusion it is also the case that as social beings we all to some extent participate in upholding these practices often unconsciously the book poses the question of how

psychoanalysis can be used to think about the invisible and subtle processes of power over symbolic representation in the context of stereotyping and dehumanization what forces govern the state of affairs that determine who is an i and who is an it in the public sphere thinking in terms of containment a communication which is denied a social space for expression can be said to be actively stripped of meaning through its original contribution of attending to and interpreting material that so far had seemed meaningless psychoanalysis demonstrates a capacity to reinstall meaning where none was before but how are such acts performed on a social level

more urgent than ever two landmark essays by the legendary political theorist on the greatest threat to democracy gathered with a new introduction by david bromwich no one hannah arendt observed has ever counted truthfulness as a political virtue but why do politicians lie what is the relationship between political lies and self delusion and how much organized deceit can a democracy endure before it ceases to function fifty years ago the century s greatest political theorist turned her focus to these essential questions in two seminal essays brought together here for the first time her conclusions delivered in searching prose that crackles with insight and intelligence remain powerfully relevant perhaps more so today than when they were written in truth and politics arendt explores the affinity between lying and politics and reminds us that the survival of factual truth depends on the testimony of credible witnesses and on an informed citizenry she shows how our shared sense of reality the texture of facts in which we wrap our daily lives can be torn apart by organized lying replaced with a fantasy world of airbrushed evidence and doctored documents in lying in politics written in response to the release of the pentagon papers arendt applies these insights to an analysis of american policy in southeast asia arguing that the real goal of the vietnam war and of the official lies used to justify it by successive administrations was nothing other than the burnishing of america s
