let's face it there are thousands of books on the market on how to avoid self destructive behaviour but how many tell you to embrace self destruction enjoy it and pursue it to its fullest extent the goal of the book is simple to help you not to help yourself to that end the authors offer advice on everything from how to stalk an ex to how to develop a drinking problem wondering which gateway drug is right for you this book will help you decide not sure how much degradation you can take this book will help you push your limits no matter what self destructive behaviour you're interested in pursuing the chances are that this book will have some valuable advice and encouragement for you there is nothing more life affirming than total destruction but it can be a difficult and sometimes lonely road that is why if you remember only one thing as you read this book it should be this the whole point of self destruction is that it's fun if you're not having fun then you might as well be taking vitamins working on your relationships and reading self help books your goal here should be to develop and pursue your self destructive tendencies to their fullest potential and have a good time doing it

the number of books and articles dealing with various aspects of world war ii has increased at a phenomenal rate since the end of the hostilities perhaps no other chapter in this bloodiest of all wars has received as much attention as the holo caust the nazis program for the final solution of the jewish question this ideologically conceived diabolical plan for the physically liquidation of european jewry has emerged as a subject of agonizing and intense interest to laypersons and scholars alike the centrality of the holocaust in the study of the third reich and the nazi phenomenon is almost universally recognized the source materials for many of the books published during the immediate postwar period were the notes and diaries kept by many camp and ghetto dwellers who were sustained during their unbelievable ordeal by the unusual drive to bear witness these were supplemented after the liberation by a large number of personal narratives collected from survivors ali over europe understandably the books published shortly after the war ended were mainly martyrological and lachrymological reflecting the trauma of the holocaust at the personal individual level these were soon followed by a considerable number of books dealing with the moral and religious questions revolving around the role of the lay and spiritual leaders of the doomed jewish communities especially those involved in the jewish councils as well as god s responsibility toward the chosen people
