biology wikipedia May 24 2024

biology is the scientific study of life and living organisms. It is a natural science with a broad scope but has several unifying themes that tie it together as a single coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes which can be transmitted to future generations.

biology wikipedia Apr 23 2024

biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes which can be transmitted to future generations.
