*Investment Trusts and Investment Companies* 1939 china has used industrial policies to try to build large corporations that can challenge those based in more advanced countries by the late 1990s the operational mechanism of china s large firms had seen large advances simultaneously a revolution has taken place in global business systems and china s large firms are even further behind the global leaders than when they began their reforms the wto will require china to operate rapidly on the global playing field in competition with the world s leading corporations and this increased gap presents a deep challenge for china s business and political leaders peter nolan presents here the first in depth case studies of china s large corporations under economic reform combined with systematic benchmarking of these firms against the world s leading corporations the book is an unrivalled resource of information on chinese businesses and also leads the reader to consider the impact of china s response to its current challenges not only on china itself but on the wider global economy

*Federal Oceanographic Fleet* 1986 drawing on primary and secondary sources on the aircraft industry this report provides a brief survey of industry structure innovation and competition in the u s fixed wing combat aircraft industry from its earliest days to the present it supports a much larger research effort examining the future of the structure innovation and competition of the u s military aircraft industrial base that responds to congressional concerns about that future

**China and the Global Business Revolution** 2001-07-26 business journalism a critical political economy approach critically explores the failures of business journalists in striking the balance between the bottom line business model and their role in defending the public interest drawing on historical and political economic perspectives and analysing these in relation to critical political economic theory the book explores failures of business journalism through the dwindling of social responsibility in the business journalist s role in holding political and corporate power to account ibrahim seaga shaw draws on a diverse range of case studies including investigative journalism in the standard oil and enron scandals corporate propaganda in relation to business reporting financial journalism and the global financial crises of the late 90s and 2008 public business journalism and subprime mortgage loans horsemeat and bent iphone 6 scandals ethical challenges of business and journalism from developed to emerging brics economies business or financial journalism modernity vs postmodernity macroeconomics vs microeconomics challenges of business journalism in the digital age business journalism a critical political economy approach is essential reading for students and scholars interested in understanding the historical failings and potential futures for business journalism and those wishing to develop specialist financial economic and business reporting in today s globalised media landscape

**The U.S. Combat Aircraft Industry, 1909-2000** 2003-10-29 how globalized information networks can be used for strategic advantage until recently globalization was viewed on balance as an inherently good thing that would benefit people and societies nearly everywhere now there is growing concern that some countries will use their position in globalized networks to gain undue influence over other societies through their dominance of information and financial networks a concept known as weaponized interdependence in exploring the conditions under which china russia and the united states might be expected to weaponize control of information and manipulate the global economy the contributors to this volume challenge scholars and practitioners to think differently about foreign economic policy national security and statecraft for the twenty first century the book addresses such questions as what areas of the global economy are most vulnerable to unilateral control of information and financial networks how sustainable is the use of weaponized interdependence what are the possible responses from targeted actors and how sustainable is the open global economy if weaponized interdependence becomes a default tool for managing international relations

**Business Journalism** 2015-07-16 considers the late industrialisation of china showing how government policies have encouraged the development of 120 national

champions and how these compete with multinational enterprises

**The Uses and Abuses of Weaponized Interdependence** 2021-03-02 this book is based on the papers presented at a conference on new issues in industrial economics held at case western reserve university cleveland ohio june 8 10 1987 the conference was organized by the research program in industrial economics rpie in the department of economics at cwru and was sponsored by the cleveland foundation the eaton corporation and the standard oil company later renamed bp america inc their generous support is gratefully acknowledged all of the papers have been revised in several cases extensively since their presentation at the conference one of the primary reasons for organizing the conference was the concern that industrial economics has become too narrowly focused in most academic programs largely being confined to industrial organization i e issues of public policy towards enterprise with emphasis on antitrust and regulatory policy this subject definition leaves out a number of interesting and important questions about how industries evolve over time what the role of technological change and organizational change is in that process and the associated structural changes within industries and firms the object of this book is to derme these issues and suggest a framework within which they can be analyzed i would like to thank all the conference participants for their contributions particularly my colleagues at cwru asim erdilek and william s peirce without whose encouragement and support the conference would not have taken place

**Review of the Activities and Programs Conducted by the Packers and Stockyards Administration, U.S. Department of Agriculture** 1992 in contemporary global capitalism the most powerful corporations are innovation or intellectual monopolies the book s unique perspective focuses on how private ownership and control of knowledge and data have become a major source of rent and power the author explains how at the one pole these corporations concentrate income property and power in the united states china and in a handful of intellectual monopolies particularly from digital and pharmaceutical industries while at the other pole developing countries are left further behind the book includes detailed empirical mappings of how intellectual monopolies develop and transform knowledge from universities and open source collaborations into intangible assets the result is a strategy that combines undermining the commons through privatization with harvesting from the same commons the book ends with provoking reflections to tilt the scale against intellectual monopoly capitalism and arguing that desired changes require democratic mobilization of workers and citizens at large this book represents one of the first attempts to capture the contours of an emerging new era where old perspectives lead us astray and the old policy toolbox is hopelessly inadequate this is true for the idea that the best or only way to promote innovation is to transform knowledge into private property it is also true for anti trust policies focusing exclusively on consumer prices the formation of global infrastructures that lead to natural monopolies calls for public rather than private ownership scholars and professionals from the social sciences and humanities in particular economics sociology political science geography educational science and science and technology studies will enjoy a clear and all embracing depiction of innovation dynamics in contemporary capitalism with a particular focus on asymmetries between actors regions and topics in fact its topical issue broadens the book s scope to those curious about how innovation networks shape our world
