Practical Methods in Biochemistry, By Frederick C. Koch and Martin E. Hanke 1948

the 48 experiments in this well conceived manual illustrate important concepts and principles in general organic and biochemistry as in previous editions three basic goals guided the development of all the experiments 1 the experiments illustrate the concepts learned in the classroom 2 the experiments are clearly and concisely written so that students will easily understand the task at hand will work with minimal supervision because the manual provides enough information on experimental procedures and will be able to perform the experiments in a 2 1 2 hour laboratory period and 3 the experiments are not only simple demonstrations but also contain a sense of discovery this edition includes many revised experiments

Introduction to Organic and Biochemistry 2004

in this brief joe jeffers uncovers the life and works of two time nobel laureate frederick sanger following sanger s early life to retirement jeffers describes how this celebrated british biochemist became the first person to determine the amino acid sequence of a protein for which he was awarded the nobel prize in 1958 highlighting sanger s remarkable career jeffers describes sanger s later change in research direction to investigate deoxyribonucleic acids dna work for which sanger also received the nobel prize jointly with paul berg and walter gilbert in 1980 joe jeffers conducted twelve interviews with sanger over the period of 1999 2009 and he has also spoken to more than 40 of sanger s colleagues and family members this brief provides a rigorous yet concise view of sanger on a personal and scientific level and is suitable for biochemists historians or the interested layperson
