Catalog of Copyright Entries. Third Series 1957

includes part 1 number 1 2 books and pamphlets including serials and contributions to periodicals january december

Microfluidics 2018-05-07

the first book offering a global overview of fundamental microfluidics and the wide range of possible applications for example in chemistry biology and biomedical science as such it summarizes recent progress in microfluidics including its origin and development the theoretical fundamentals and fabrication techniques for microfluidic devices the book also comprehensively covers the fluid mechanics physics and chemistry as well as applications in such different fields as detection and synthesis of inorganic and organic materials a useful reference for non specialists and a basic guideline for research scientists and technicians already active in this field or intending to work in microfluidics

Catalog of Copyright Entries 1957

during the last century nuclear power has been established as a reliable source of energy in the major industrialised countries it has recently enjoyed a revival in attention and research due to the environmental concerns surrounding current conventional energy sources issues of regulation and safety are at the forefront of all discussions involving nuclear power and will govern its place in the future the future of nuclear power takes a technical and comprehensive look at the current and future status of

nuclear power throughout the world the 17 chapters are divided into two main sections a review of all current generation plants and concepts for new advanced reactor design and safety the broad ranging topics covered by this publication coupled with the current revival of interest in nuclear energy make it a timely reference for all nuclear scientists reviews the issues surrounding the future operation of existing commercial nuclear plants several chapters dedicated to the extensive research programs in place concerning safe and reliable operation compares nuclear and non nuclear options for energy needs in the future evaluating the benefits and risks of both

Catalog of Copyright Entries. Third Series 1956

this volume constitutes the refereed proceedings of 11 international workshops held as part of otm 2010 in heronissos greece in october 2010 the 68 revised full papers presented were carefully reviewed and selected from a total of 127 submissions to the workshops the volume starts with 14 poster papers of the otm 2010 main conferences coopis 2010 doa 2010 and osbase 2010 topics of the workshop papers are adaption in service oriented architectures ambient intelligence and reasoning data integration approaches modeling in adi web and enterprise data visualization enterprise integration and semantics industrial enterprise interoperability and networking process management in distributed information system development improving social networking ontology engineering master data management and metamodeling extensions to fact oriented modeling logic and derivation patterns in input data models
