## **Correlative Measurement Opportunities Between ATLAS-1 and UARS Experiments 1992**

the irrigated area in the aral sea basin totals about 7 5 million hectare part of the water supplied to this area is consumed by the irrigated crop the remainder of the supplied water drains to the groundwater basin to downstream depressions or back to the rivers during its use however this drained part of the water accumulates salts and chemicals the disposal of this polluted water causes a variety of environmental problems if the percentage consumed water of the total water supply to an irrigated area the so called overall consumed ratio can be increased less water needs to be drained this alleviates part of the related environmental problems further if the overall consumed ratio for the above 7 5 million hectare is improved less water needs to be diverted from the rivers hence more water can flow towards the aral sea as mentioned above part of the non consumed irrigation water drains to the groundwater basin commonly the natural discharge capacity of this basin is insufficient to handle this imported water as a result the groundwater table rises towards the land surface causing waterlogging in semi arid zones this waterlogging triggers a soil salinity problem resulting to a significant reduction in crop yields the artificial increase of the discharge capacity and lowering of the groundwater table solves the soil salinity problem

## **Energy, Agreements Between the United States of America and Japan, Amending and Extending the Agreement of May 2, 1979, as Extended, Effected by Exchange of Notes, Signed at Washington February 1, 1990 with Related Exchange of Letters and Extending Protocol, and Signed at Tokyo January 13, 1995 1999**

using concepts from valuation theory we obtain a characterization of all collinearity preserving functions from one affine or projective desarguesian plane into another the case in which the planes are projective and the range contains a quadrangle has been treated previously in the literature our results permit one or both planes to be affine and include cases where the range contains a triangle but no quadrangle a key theorem is that with the exception of certain embeddings defined on planes of order 2 and 3 every collinearity preserving function from one affine desarguesian plane into another can be extended to a collinearity preserving function between enveloping projective planes

## **Elements of Surveying and Levelling 1870**

in the five hundred years covered by this volume there was scarcely a year which passed without either war or some open demonstration of hostility between the many sovereign powers which governed europe states and peoples lived under the shadow of war were ceaselessly prompted to consider the possibility of war had to find ways of dealing with the consequences of war this volume in the origins of the modern state in europe series focuses on the crucial role of war in the formation of state systems it starts from the assumption that interstate rivalries and conflicts were at the heart not only of the demarcation of territories but also of the ever growing need to mobilize resources for warfare institutionalization was consequently highly dependent on such competition it was for military reasons and with military aims that the state secured control of time and space both at sea and on land the origins of the modern state in europe series arises from an important international research programme sponsored by the european science foundation the aim of the series which comprises seven volumes is to bring together specialists from different countries who reinterpret from a comparative european perspective different aspects of the formation of the state over the long period from the beginning of the thirteenth to the end of the eighteenth century one of the main achievements of the research programme has been to overcome the long established historiographical tendency to regard states mainly from the viewpoint of their twentieth century borders

## **The Inter-Relationship Between Irrigation, Drainage and the Environment in the Aral Sea Basin 2012-12-06**

this book offers the first comprehensive comparative and coherent perspective on parliamentary candidates in contemporary representative democracy based on the unique database of the comparative candidate survey project which interrogated parliamentary candidates in more than 30 countries it fills a significant lacuna by focusing on the thousands of ordinary candidates that participate in national elections it examines who the candidates are in terms of their socio demographic background and political career patterns how they were selected by their parties what their policy preference are and whether these are congruent to those held by their voters who they seek to represent and how they intend to do so once elected and what their visions are on representative democracy and party government last but not least it investigates how they go about reaching out to their potential voters during the election campaign this book will be of key interest to scholars and students of political parties and party politics political elites political communication political participation elections theories of democracy and representation legislative studies voting behaviour and more broadly to european politics as well as to political and policy professionals throughout europe

## **Appendix to the Assembly Journal 1880**

the intertextuality research of antique texts and their reception in medieval and modern times is the subject of this volume 1 what is a text and what is an intertext this concerns the various different forms of text and how they present themselves in architecture iconography lexicography the study of lists etc 2 forms of intertextuality on the relationship between writtenness and oralness how oral texts are objectified during textualisation and become fixed acts of speech k ehlich how especially antique texts were shaped by the continual interconnectedness of oral and written traditions 3 what is understood in ancient oriental and antique literature by tradition and transmission to this end the research includes languages historical reality and antique thought structures making clear that the transferral of tradition occurs not only within a close cultural circle but in the exchange with neighbouring cultures over large distances and geographic boundaries 4 on the relationship between intertextuality and canon a number of contributions study this aspect of ongoing historical debate as it often found for culturally definitive and canonised texts a necessary part of the their rejuvenation process contributions by m bauks a lange z plese ph alexandre s aufrère m oeming k davidowicz a wagner g selz m f meyer l roig lanzillotta m dimitrova f waldman w horowitz m risch j van ruiten l bormann a miltenova j taschner g brooke g dorival a harder and s alkier

## **Collinearity-Preserving Functions between Desarguesian Planes 1980**

the spectra from 15 to 35 microns of 45 ketones 30 ethers and 12 alcohols were analyzed and correlated for identification purposes the data in this spectral region were shown to be useful as a supplement to data obtained in the 2 15 micron region the spectra of ketones in the 15 35 micron region are very informative of their detailed structural features and distinguish between aliphatic methyl ketones with and without alpha branching aromatic methyl ketones and cyclic ketones tentatively the ring size of cyclic ketones may also be determined study of these spectra indicates that the previous assignment of acetone is in error and a new assignment is proposed the spectra of ethers and alcohols in the 15 35 micron region are less informative aliphatic ethers possess one fair group frequency at 1 480 1 520 cm the broad absorption by alcohols 1 650 cm was confirmed author

## **Investigation of the Relationship Existing Between Certain Contractors and Their Employees in the United States 1934**

this monograph is devoted to the study of spear operators that is bounded linear operators  $g$  between banach spaces  $x$  and  $y$  satisfying that for every other bounded linear operator  $t$   $x \rightarrow y$  there exists a modulus one scalar  $\omega$  such that  $\|g - \omega t\| \leq \|t\|$  this concept extends the properties of the identity operator in those banach spaces having numerical index one many examples among classical spaces are provided being one of them the fourier transform on  $l_1$  the relationships with the radon nikodým property with asplund spaces and with the duality and some isometric and isomorphic consequences are provided finally lipschitz operators satisfying the lipschitz version of the equation above are studied the book could be of interest to young researchers and specialists in functional analysis in particular to those interested in banach spaces and their geometry it is essentially self contained and only basic knowledge of functional analysis is needed

## **Estimating the Magnitude of Annual Peak Discharges with Recurrence Intervals Between 1.1 and 3.0 Years for Rural, Unregulated Streams in West Virginia 2002**

in recent peace initiative a common word in muslim christian relations emphasis on the way forward between islam and christianity has been a frantic call to love of god and love of neighbor this call argued in this book provokes rival and parallel logic in the concepts of monotheism between christian religious leaders and scholars on the one hand and islamic religious leaders and scholars on the other using in places the framework of critical discourse analysis cda the author analyzes some text extracts from a common word in order to expose the underlying problems of ideologies dichotomies identity constructions and orthodoxy claims that are associated with the islamic tawhid and christian trinity drawing from various conferences and workshops convened by both religious communities as well as some social scientist insights this book finds authentic communication in muslim christian relations grounded in recognition and acceptance of the differences between

islam and christianity recognizing the ideological issues in the usage of the appositional pronouns us muslims and you christians as suggesting dichotomy the author suggests rather the education of both muslims and christians starting from the kindergarten on the religion and beliefs of the other and to re interpret and revise conflicting qur anic and biblical issues pertaining to muslim christian relations

## **An Elementary Treatise on the Integral Calculus, Etc 1877**

a new semiempirical approach was attempted to predict the slope climbing capability of wheels the approach consisted of determining the pull performance of flexible wheels on yielding slopes by two extrapolations one starting from the theoretically known pull performance of flexible wheels on unyielding slopes and the other from experimentally determined performance of rigid wheels on yielding level ground the result is a prediction equation for the available pull of elastic rim wheels as a particularly simple case of pneumatic tires on deformable inclined soils in terms of soil deformability cohesion and internal friction wheel flexibility and load and slope angle author

## **Resource Publication 1984**

this book presents the first debate between the contemporary movement radical orthodoxy and eastern orthodox theologians leading international scholars offer new insights and reflections on a wide range of contemporary issues from a specifically theological and philosophical perspective the ancient notion of divine wisdom sophia serves as a common point of reference in this encounter both radical and eastern orthodoxy agree that the transfiguration of the world through the word is at the very centre of the christian faith the book explores how this process of transformation can be envisaged with regard to epistemological ontological aesthetical ecclesiological and political questions contributors to this volume include rowan williams john milbank antoine arjakovsky michael northcott nicholas loudovikos andrew louth and catherine pickstock

## **Parliamentary Candidates Between Voters and Parties 2020-10-27**

we estimated diet composition of sympatric mexican spotted strix occidentalis lucida n 7 pairs of owls and great horned owls bubo virginianus n 4 pairs in ponderosa pine pinus ponderosa gambel oak quercus gambelii forest northern arizona both species preyed on mammals birds and insects great horned owls also ate lizards mammals dominated the diet of both species mammals comprised 63 and 62 of all prey items identified in diets of spotted and great horned owls respectively and 94 and 95 of prey biomass both species primarily preyed on a few groups of small mammals observed overlap in diet composition between species 0.95 was greater than expected based on null models of diet overlap and the size range of prey taken overlapped entirely mean prey mass was similar for both species great horned owl 47.074 g se n 94 items spotted owl 40.118 g n 125 items great horned owls consumed larger proportions of diurnally active prey than spotted owls which primarily consumed nocturnally active mammals our results coupled with a previous analysis showing that these owls foraged in the same general areas ganey and others 1997 suggests that they could compete for food resources which are assumed to be limiting in at least some years they may minimize the potential for resource competition however by concentrating foraging activities in different habitats ganey and others 1997 and by foraging at different times when different suites of prey species are active

## **Between Text and Text 2013-06-19**

the book analyses how international law addresses interactions between international organizations in labour governance these interactions are ubiquitous they offer each organization an opportunity to promote its model of labour governance yet simultaneously expose it to adverse influence from others the book captures this ambivalence and examines the capacity of international law to mitigate it based on detailed case studies of mutual influence between the international labour organization the world bank and the council of europe the book offers an in depth analysis of the pertinent law and its key challenges both at institutional and inter organizational level the author envisions a law of inter organizational interactions as a normative framework structuring interactions and enhancing the effectiveness and legitimacy of multi institutional governance
