Canon EOS 6D is a full-frame DSLR camera. It features a 20.2MP CMOS sensor, a DIGIC 6+ processor, and a 3.2-inch LCD. The camera is compact and lightweight, making it a popular choice for travel and street photography. It also offers a variety of shooting modes and a built-in Wi-Fi module for easy sharing of photos.

Canon EOS 5D Mark3

2012-09

Canon EOS 5D Mark III is a professional-grade DSLR camera. It features a 22.3MP CMOS sensor, a DIGIC 6 processor, and a 3.2-inch LCD. The camera is known for its excellent image quality and robust build, making it a favorite among professional photographers.

So You Bought a Golf Cart?: An Owner's Guide for Learning about Golf Carts

2015-02-02

more than fifteen thousand golf cart injuries send people to the emergency room each year more than half of them involving children under the age of sixteen michael k rosenbarker who sells and rents golf carts for a living walks you through step by step how to stay safe in your golf cart but that's just one topic he explores he also helps you maintain electric and gasoline powered golf carts properly wash and clean your golf cart decide on the right seating options and accessories discover industry secrets of making your golf cart batteries last if you've only recently bought a golf cart or even if you've had one for years but still have questions about operating and maintaining it then this book is for you with real life examples diagrams and pictures it will help you avoid costly repairs or worse get the insights and tips that will leave you feeling safe and confident as you enjoy your golf cart more than ever

power management involves all the power consumed in an electric vehicle ev so it impacts the vehicle s performance safety and driving range to provide these vehicle characteristics power management ensures that the proper power voltage and current are applied to each electronic circuit ensures that there is isolation between low voltage and highvoltage hv circuits offers power circuit protection against electrical disturbances that can affect internal or external circuits managing electric vehicle power provides complete coverage for understanding how best to utilize the primary power source across all the ev s electric control units readers will also be introduced to the qualification standards of the automotive electronics council aec aec standards are a one time qualification that typically takes place at the end of the development cycle

the electric vehicle offers many promises increasing u s energy security by reducing petroleum dependence contributing to climate change initiatives by decreasing greenhouse gas ghg emissions stimulating long term economic growth through the development of new technologies and industries and improving public health by improving local air quality there are however substantial technical social and economic barriers to widespread adoption of electric vehicles including vehicle cost small driving range long charging times and the need for a charging infrastructure in addition people are unfamiliar with electric vehicles are uncertain about their costs and benefits and have diverse needs that current electric vehicles might not meet although a person might derive some personal benefits from ownership the costs of achieving the social benefits such as reduced ghg emissions are borne largely by the people who purchase the vehicles given the recognized barriers to electric vehicle adoption congress asked the department of energy doe to commission a study by the national academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting infrastructure as a result of the request the national research council nrc a part of the national academies appointed the committee on overcoming barriers to electric vehicle deployment this committee documented their findings in two reports a short interim report focused on near term options and a final comprehensive report overcoming barriers to electric vehicle deployment fulfills the request for the short interim report that addresses specifically the following issues infrastructure needs for electric vehicles barriers to deploying the infrastructure and possible roles of the federal government in overcoming the barriers this report also includes an initial discussion of the pros and cons of the possible roles this interim report does not address the committee s full statement of task and does not offer any recommendations because the committee is still in its early stages of data gathering the committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014

overcoming barriers to electric vehicle deployment focuses on the light duty vehicle sector in the united states and restricts its discussion of electric vehicles to plug in electric vehicles pevs which include battery electric vehicles bevs and plug in hybrid electric vehicles phevs the common feature of these vehicles is that their batteries are charged by being plugged into the electric grid bevs differ from phevs because they operate solely on electricity stored in a battery that is there is no other power source phevs have internal combustion engines that can supplement the electric power train although this report considers pevs generally the committee recognizes that there are fundamental differences between phevs and bevs

we know the specific strengths of various cities are aware of their ranking are able to discuss their density and growth but what do all cities have in common what do we know about the lowest common denominator the city as a species the primal genetic material of the city this is the subject of a quantum city this colossal work is a love letter to the city and intellectual culture we follow the fictional narrative figure orlando beginning in 320 bc on his odyssey through the western world up to the present time the book is divided into four interrelated chapters and can be read page by page in a discursive manner however randomly browsing through the book also offers new and multi faceted interpretations great intellectual achievements are compared with obscure and mundane events a quantum city offers an inspiring view of the city that is in us and around us

the electric vehicle seemed poised in 1900 to be a leader in automotive production clean odorless noiseless and mechanically simple electric cars rarely broke down and were easy to operate an electric car could be started instantly from the driver's seat no other machine could claim that advantage but then it all went wrong as this history details the hope and confidence of 1900 collapsed and just two decades later electric cars were effectively dead they had remained expensive even as gasoline cars saw dramatic price reductions and the storage battery was an endless source of problems an increasingly frantic public relations campaign of lies and deceptive advertising could not turn the tide
