deviance and social control the focus is on the social construction of deviance and the legitimizing of social control this is one of the sharpest and most rewarding textbooks for teaching classical the disbursement of tiny loans to the poor which they could use to undertake informal income generating activities it went on to become one of the most popular international development policies of all time and a mainstay of local development and antipoverty programs across the global south the contributors to this multidisciplinary volume consider the origins evolution and outcomes of microfinance from a variety of perspectives and contend that it has been an unsuccessful approach to development the contributors contend that over the last twenty years microfinance policies have exacerbated poverty and exclusion undermined gender empowerment underpinned a massive growth in inequality destroyed solidarity and trust in the community and overall manifestly weakened those local economies of the global south where it reached critical mass they use qualitative anthropological economic and political economic research to unpack the ideas and values that have allowed microfinance to seduce the world and blind so many to its corrosive effects these original essays introduce students to the complex and influential field of critical criminology it presents many of the theories of critical criminology marxist feminist left realist postmodern constitutive peacemaking and restorative justice and explores how despite their distinctions each theory is rooted in radical criminology and all are critical of mainstream criminology this book draws on core concepts coined by adorno such as identity thinking the culture industry and his critique of the autonomous and rational subject to address the ills that plague neoliberal capitalist societies today these ills range from the risk of a return to totalitarian tendencies to the global rise of the far right and anti feminist conceptions of motherhood subsequent chapters outline the ways in which adorno s thought can also be seen to redress the challenges of modern societies such as the critical function of artworks and the subversive potential of slow food and popular music the important underlying concern of the book is to highlight the continuing relevance of adorno both in dealing with the failures of neo liberal capitalist societies and in his applicability to a wide range of disciplines based on the work of george herbert mead han joas and axel honneth as well as the author s own personal and academic identities and journeys self identity and collective action argues that the self and action are strictly related reading these authors provided francine tremblay with the theoretical ground to stand on while thinking about identity and how it is linked to civic participation she posits that mead s work and its link to action must be revisited and given its rightful place in sociology and that sociology must be radical committed and passionate secondly we assume that what constitutes deviant behaviour changes over time and across social groups and societies as a result the social construction approach is informed largely by historical studies that track changing modes of social control thirdly we assume that laws and norms are not necessarily unchangeable or correct or even shared by the majority this volume contains recent and cutting edge articles from leading criminological theorists the book is organized into ten sections each representing the latest in the multi disciplinary orientations representing a cross section of contemporary criminological theory these sections include 1 classical and rational choice 2 biological and biosocial 3 psychological 4 social learning and neutralization 5 social control 6 social ecology sub cultural and cultural 7 anomie and strain 8 conflict and radical 9 feminist and gender 10 critical criminologies anarchist postmodernist peacemaking the articles were selected based on their contributions to advancing the field including ways in which the authors of each chapter understand the current theoretical tendencies of their respective approaches and how they envision the future of their theories because of this the articles focus on theory rather than empirical research of particular note is the tendency toward integration of different perspectives as described by editors henry and lukas in their original introduction to this volume race still matters in canada and in the context of crime and
