2005-07 this collection of short stories was created for several reason to introduce the short story as a distinct literary form to provide enjoyable reading and to help people understand themselves better through reading thinking discussing and writing about the short stories within each story is a conflict that readers can identify with after seeing how the story characters deal sometimes successfully and sometimes unsuccessfully with the problems facing them readers can then consider how they themselves might react to the situations back cover

Instructor's Manual to Accompany the Short Story 1983 from the introduction the method of studying the short story here presented is based upon two ideas the first is that the well equipped student of the short story should have in mind a number of standard examples which exhibit in concrete form the chief elements and principles of importance the second is that the best way to see in those examples the elements and principles in question is by some very definite and systematic method of analysis the study of the short story has developed of late into diverse lines there have been excellent studies of the history of the matter which have exhibited the development of the form from very early times there have been critical analyses which have taken their illustrations of principles or qualities from whatever examples might be found in the broad field there have been guides to the writing of the short story which have given such practical and theoretical help as was possible to those who wished to write short stories themselves we have followed none of these methods any treatment of the short story will include a good deal of general material and much within our pages will be familiar to all who have followed the development of the study but our particular course is different from those just mentioned we have presented a limited number of well known standard stories in the study of any phase or form of art the student should have well in mind a few classic examples then he can pursue with intelligence a broad reading which will present to him all the possibilities of the art in which he is interested we have selected our chief examples from american literature partly because it was in america that the modern short story was first developed and partly because in a limited field we can

indicate something of the actual development which we do not treat in detail in the study of these examples we have followed a very definite method because it seems the case that in the study of fiction at least a student's attention is especially likely to become diffused over a broad field so that he often neglects the very thing that would be useful to him at the time while gaining perhaps something that would be better at another time we have made these exercises very specific not because all literary study should be of this specific sort but because at the beginning of a study like this one wants to get correct ideas to measure by we by no means feel that we are pointing out ways in which one should always study the short story we are pointing out ways which will train the mind to look at short stories so as to perceive instinctively certain things after such study the mind should work naturally in certain ways as we may say the student will know the main things that have been done with the short story and he will turn to the current short story with the ability to compare and enjoy

The Penguin Book of the Contemporary British Short Story 2018-10-04 drawing on examples from across the globe and throughout history Andrew Kahn explores the key characteristics of the short story he shows how its rise was intertwined with international print culture and discusses the essential techniques within this thriving literary genre as well as the ways in which it is constantly innovated even today

Best English Short Stories II 1992-08

**Coming to Terms with the Short Story** 1983-01-01 from the introduction I propose in the following pages to discuss the practice of the short story in English the vagueness of the term short story is apparent no less apparent is the existence in every literature and period of groups of narratives which we can call by no other name the literatures of ancient Greece of Buddhist India of medieval France and Arabia for each of them readers will bring to mind a well marked well recognized genre which to day we should put under the short story classification the fable the Milesian story the birth story of the Jatakas the fabliau and conte each name suggests a type of literary expression employed for very definite purposes as writers or readers named the sonnet the ballade the chanson so they named these varieties of short narrative and felt with more or less reason that in each case man was endeavoring to express his idea of life in a particular and chosen fashion if we feel the vagueness of short story as used in a historical review of our narrative literature it is not because there are no short stories which in the age of their birth were employed in literary work of a special nature we would scarcely think the words vague if nothing definite were to be named by them nor is it because of the impossibility of marking off from long narrative the short narrative which is to be given a name that difficulty is serious only for the rhetorician the fault is rather in the loose meaning of the phrase where short seems to qualify without defining we cannot escape this inconvenience except by creating a new terminology a task far less profitable than the study of a considerable and much neglected literature indeed just what has constituted the short story in English is a question better answered at the end than at the beginning of such an investigation nevertheless it is evident without further discussion that the writers who in many tongues and times have used a short narrative to convey their ideas are in one respect very often alike no matter what their subject matter may be morality indecency high imagination or human nature they have wished to procure a certain effect which could best be gained by a short story they have wished to turn a moral as in a fable or to bring home in a fabliau an amusing reflection upon life or to depict a situation as in the typical short story of to day and in every case a brief narrative with its one unified impression best served them it is the short narrative used for life units where only brevity and the consequent unified

impression would serve that becomes the short story is this definition sufficient only a study of a given literature will show if it will work as the pragmatists say it is sufficient but in so working it is neither requisite nor possible that hard and fast lines of division should result where to place many whitish yellow and yellowish white peoples is a problem for anthropologists yet we call the very black man negro without hesitation certain limitations however must be imposed at the outset plots circulating through every tongue are often independent of strictly literary or cultural movements we however must concern ourselves primarily with written literature it is the history and development of an art which we follow an art by means of which all manner of familiar experiences can be put into form and made marketable plots circulate in all ways their history is matter for folk lore and psychology it is the short story as it appears in recorded english literature and the growth of its usefulness therein which is the subject of this volume

Writing in General and the Short Story in Particular 2000-09-06 american literature and the short story might be said to have come of age at about the same time and this along with something in the bustling and energetic american temperament might go some way towards explaining why the two go together as well as they do twenty one short stories from some of the best american writers over the last two hundred years provide a mesmerizing multi faceted portrait of a country a people and the unique literature produced by this most exuberant of nations

**The Short-Story** 2007-12-01 what makes for a good short story being short you might think the story's structure would yield an answer to this question more readily than say the novel but for as long as the short story has been around arguments have raged as to what it should and shouldn't be made up of what it should and shouldn't do here 15 leading contemporary practitioners offer structural appreciations of past masters of the form as well as their own perspectives on what the short story does so well the best short stories don't have closure argues one contributor because life doesn't have closure plot must be written with the denouement constantly in view quotes another covering a century of writing that arguably saw all the major short forms emerge from Hawthorne's twice told tales to Kafka's modernist nightmares these essays offer new and unique inroads into classic texts both for the literature student and aspiring writer
