this volume represents a painstaking and scholarly introduction to the management of children and adults who have problems of communication related to or in addition to mental disorder it is a relatively unexplored field having received scant attention until recent years but the quality of the work included here gives a clear indication that the area should move from the periphery into a main stream position in the education and practice of speech therapists although all students in training receive some teaching in the area of psychiatry it tends to be limited to a brief consideration of the role of the psychiatrist and clinical psychologist very rarely the speech therapist it has been proposed that the education of the speech therapist who intends to enter this difficult but rewarding field should be developed at post graduate level and there are strong arguments given in this volume to support the idea claims that the field is neglected during initial training are however well founded and this volume should alert those responsible for the education of speech therapists to this deficiency
