by choosing one of the 50 simple experiments in Janice VanCleave's *Play and Find Out about Science* your child will discover the answers to lots of fun questions as you team up to play together and explore the wonder of our world. Each experiment includes illustrations, a list of easy-to-find materials, and simple step-by-step instructions. Coming soon: Janice VanCleave's *Play and Find Out about Nature*, *Play and Find Out about Math*, *Play and Find Out about the Human Body* for ages 4 to 7. Praise for Janice VanCleave's books: stunningly clear, direct, and informative projects. School library journal: they not only teach children the basics of science but also entertain along the way. Great for kids' parent guide.

Let's Find Out! Physical Science

2014-07-15

The sun shines down on us, giving warmth and light. But did you know that the sun also makes the seasons as the earth makes one complete rotation around the sun every year? The seasons on the earth change from winter to spring to summer to fall and back to winter again. Find out how the light from the sun affects life on the earth for all living things. In this look at the only star in our solar system, now rebranded with a new cover, look this book features content-rich vocabulary, fascinating side bars, and diagrams by bestselling illustrator Michael Rex, and a Find Out More section with a simple experiment that allows kids to make their own orbiting model with an orange and a pencil. The author, Franklyn M. Branley, was the author of over 150 science books for children and astronomer emeritus and former chairman of the American Museum of Natural History Hayden Planetarium. The text and art were vetted for accuracy by an expert in the field. This is a Level 2 Let's Read and Find Out Science title, which means the book explores more challenging concepts for children in the primary grades and supports the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) Standards. Let's Read and Find Out Science is the winner of the American Association for the Advancement of Science Subaru Science Books/Films Prize for Outstanding Science Series.

Sunshine Makes the Seasons

1963

Science is made simple but far from simplistic in these highly accessible, comprehensive, and generously packed surveys of life science, earth science, physical science, and space science. Everything from simple-celled organisms to celestial phenomena at

What the Moon is Like

1996-10-09

Read and find out about the phases of the moon in this colorfully illustrated nonfiction picture book. This clear and appealing science book for early elementary age kids, both at home and in the classroom, introduces basic information about the moon. Have you noticed that the moon sometimes seems to grow and shrink? Does it look like a big round ball or is it just a sliver of light in the sky? The moon seems to change, but it doesn't really. The moon revolves around the earth; it takes about four weeks to make the journey, and as it travels around, we can only see certain parts of it. Try the simple experiment described inside using an orange, a pencil, and a flashlight, and you'll understand why the moon seems to change. This is a Level 2 Let's Read and Find Out title, which means the book explores more challenging concepts for children in the primary grades. The 100 titles in this leading nonfiction series are hands-on and visual, acclaimed, and trusted great for classrooms. Top 10 Reasons to Love LRFOS: entertain and educate at the same time; have appealing, child-centered topics developmentally appropriate for emerging readers; focused on answering questions instead of using a survey approach; employ engaging picture book quality illustrations; use simple charts and graphics to improve visual literacy skills; feature hands-on activities to engage young scientists; meet national science education standards. Written and illustrated by award-winning authors and illustrators, vetted by an expert in the field. Over 130 titles in print meeting a wide range of kids' scientific interests. Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) Standards. Let's Read and Find Out is the winner of the American Association for the Advancement of Science Subaru Science Books/Films Prize for Outstanding Science Series.

Janice VanCleave's Play and Find Out about Science

2016-02-02

Read and find out about magnets in this colorfully illustrated nonfiction picture book. Why does a magnet pick up a paper clip but not a leaf or a penny? How can the whole world be a magnet? Follow the step-by-step instructions about how to make your own magnet and then find out for yourself what makes a magnet. This is a clear and appealing science book for early elementary age kids, both at home and in the classroom. It's a Level 2 Let's Read and Find Out title, which means the book explores more challenging concepts for children in the primary grades. The 100 titles in this leading nonfiction series are hands-on and visual, acclaimed, and trusted great for classrooms. read and find out about rainforests in this colorfully illustrated nonfiction picture book the rainforest is home to millions of plant and animal species some animals live high up in the trees some crawl across the forest floor and some tunnel underground but they all depend on one another and the rain to survive with colorful illustrations and fascinating diagrams from author/illustrator kate duke in the rainforest is a lively look at the most vibrant ecosystem on our planet this is a clear and appealing science book for early elementary age kids both at home and in the classroom it's a level 2 let's read and find out which means the book explores more challenging concepts for children in the primary grades the 100 titles in this leading nonfiction series are hands-on and visual acclaimed and trusted great for classrooms top 10 reasons to love lrfos entertain and educate at the same time have appealing child-centered topics developmentally appropriate for emerging readers focused answering questions instead of using survey approach employ engaging picture book quality illustrations use simple charts and graphics to improve visual literacy skills feature hands-on activities to engage young scientists meet national science education standards written/illustrated by award-winning authors/illustrators vetted by an expert in the field over 130 titles in print meeting a wide range of kids' scientific interests books in this series support the common core learning standards next generation science standards and the science technology engineering and math/stem standards let's read and find out is the winner of the american association for the advancement of science subaru science books/films prize for outstanding science series

Earthquakes

2013-12-30

earthquakes are a natural phenomenon that occurs as a result of the release of energy in the earth's crust. This energy is often stored in the form of stress along faults, which are fractures in the earth's crust. When the stress becomes too great, the rocks break and the energy is released as seismic waves, which can be felt as an earthquake. Earthquakes can vary in size, from small tremors to massive events that can cause significant damage and loss of life. The study of earthquakes is an important part of geology and helps us to understand the earth's internal structure and processes.

stem is a field of study that focuses on the natural and applied sciences. It is a multidisciplinary approach that combines biology, chemistry, physics, and earth science. The goal of stem is to understand the fundamental principles of nature and to use this knowledge to develop new technologies and solutions to global challenges. Stem is a rapidly growing field and is expected to continue to expand in the future.

How to Make Your Science Project Scientific

1970

excerpt from elementary science air water soil heat light plants and animals these are the principal things that make up what we call nature you will find that your life is a sort of partnership with nature to live in it the best way you need to understand this partnership as well as you can you need to know how to do your part in it life is the most interesting thing in the world you want to find out all you can about it so that you can make your own life as happy and successful as possible a good way to go at this business of finding out about life is to study first the things that are necessary to all kinds of life plants as well as animals and see how these things work together to make our own lives possible and pleasant that is what we shall do in this book we shall study the seven things mentioned in the first sentence we shall study the conditions that are necessary for our own lives and this will help us a great deal in finding out how we ought to live about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
