A Caring Advanced Practice Nursing Model

2021-06-30

this book introduces readers to the basics of
advanced practice nursing apn which offers
expanded clinical competence that can help improve
the quality of health and care services the book
offers a range of perspectives on apn apn models
apn education challenges in the implementation of
apn in new countries as well as a description of
the apn role including areas of expertise these
core areas of the caring apn model clinical
nursing practice ethical decision making coaching
and teaching consultation collaboration case
management leadership research and development are
described together with the role of apn in acute
care and primary healthcare service contexts the
book also explores the connection between
epistemology a three dimensional view of knowledge
epistêmê technê and phronesis and a caritative
perspective as well as central theoretical aspects
of nursing e g health holism and ethics ethos all

research should be grounded in theoretical perspectives and here we highlight the value of a caring and person centered philosophy in advanced practice nursing through its specific focus on the central generic theoretical features of nursing science that deepen the role of apn and the scope of practice and apn research and education the content presented here will help any researcher teacher or student understand the importance of epistemological issues for research education and clinical practice in this field moreover it can be used when designing master s programs in advanced practice nursing making the book a valuable resource for the international nursing community
