computer simulation analysis of biological and agricultural systems focuses on the integration of mathematical models and the dynamic simulation essential to system analysis design and synthesis the book emphasizes the quantitative dynamic relationships between elements and system responses problems of various degrees of difficulty and complexity are discussed to illustrate methods of computer aided design and analysis that can bridge the gap between theories and applications these problems cover a wide variety of subjects in the biological and agricultural fields specific guidelines and practical methods for defining requirements developing specifications and integrating system modeling early in simulation development are included as well computer simulation analysis of biological and agricultural systems is an excellent text and self guide for agricultural engineers agronomists foresters horticulturists soil scientists mechanical engineers and computer simulators

2018-10-19

advances in soft matter mechanics is a compilation and selection of recent works in soft matter mechanics by a group of active researchers in the field the main objectives of this book are first to disseminate the latest developments in soft matter mechanics in the field of applied and computational mechanics and second to introduce soft matter mechanics as a sub discipline of soft matter physics as an important branch of soft matter physics soft matter mechanics has developed rapidly in recent years a number of the novel approaches discussed in this book are unique such as the coarse grained finite element method for modeling colloidal adhesion entropic elasticity meshfree simulations of liquid crystal elastomers simulations of dna etc the book is intended for researchers and graduate students in the field of mechanics condensed matter physics and biomaterials dr shaofan li is a professor of the university of california berkeley u s a dr bohua sun is a professor of cape peninsula university of technology south africa
