rewriting is one of the most crucial but at the same time one of the most elusive concepts of literary scholarship in order to contribute to a further reassessment of such a notion this volume investigates a wide range of medieval and early modern literary transformations especially focusing on texts and contexts of italian and french renaissance literature the first section of the book rewriting gathers essays which examine medieval and early modern rewritings while also pointing out the theoretical implications raised by such texts the second part rewritings in early modern literature collects contributions which account for different practices of rewriting in the italian and french renaissance for instance by analysing dynamics of repetition and duplication verbatim reproduction and free reworking textual production and authorial self fashioning alterity and identity replication and multiplication the volume strives at shedding light on the complexity of the relationship between early modern and ancient literature perfectly summed up in the motto written by pietro aretino in a letter to his friend the painter giulio romano in 1542 essere modernamente antichi e anticamente moderni

Raphael s ostrich begins with a little studied aspect of Raphael s painting the ostrich which appears as an attribute of justice painted in the Sala di Costantino in the Vatican. Uffizi traces the cultural and artistic history of the ostrich from its appearances in ancient Egyptian hieroglyphs to the menageries and grotesque ornaments of sixteenth century Italy following the complex history of shifting interpretations given to the ostrich in scientific literary religious poetic and satirical texts and images. Uffizi demonstrates the rich variety of ways in which people made sense of this living monster which was depicted as the embodiment of heresy stupidity perseverance justice fortune gluttony and other virtues and vices because Raphael was revered as a god of art artists imitated and competed with his ostrich while religious and cultural critics complained about the potential for misinterpreting such obscure imagery this book not only considers the history of the ostrich but also explores how Raphael s painting forced viewers to question how meaning is attributed to the natural world a debate of central importance in early modern Europe at a time when the disciplines of modern art history and natural history were developing the strangeness of Raphael s ostrich situated at the crossroads of art religion myth and natural history both reveals lesser known sides of Raphael s painting and illuminates major cultural shifts in attitudes toward nature and images in the Renaissance more than simply an examination of a single artist or a single subject Raphael s ostrich offers an accessible erudite and charming alternative to Vasari s pervasive model of the history of sixteenth century Italian art
