Communities of Resistance and Resilience in the Post-Industrial City 2024-08-01 this book is about the grassroots community revitalization movement in pittsburgh pennsylvania and lyon france between 1980 and 2010 an extension of the post wwii civil rights campaign that is rarely considered it tells the story of residents attempts to improve their communities through social capital or people power in positive ways citizens created vibrant attractive neighborhoods but their actions also generated unintended consequences such as high real estate prices and minority displacement that threatened to unravel their hard work communities of resistance and resilience is an ethnographic survey that relies on oral histories archival research on the ground site surveys and the author s personal experience as a neighborhood reinvestment practitioner for more than 30 years it brings to life stories that would otherwise remain obscured such as the lingering impact of the march for equality and against racism organized in lyon in 1983 and the formation of the pittsburgh community reinvestment group in pittsburgh in 1988 both of which launched national movements this is of great use to scholars of transatlantic history as well as a general audience interested in modern social movements in the united states and france

When Bad Things Happen to Privileged People 2023-07-06 a deep and thought provoking examination of crisis politics and their implications for power and marginalization in the united states from the climate crisis to the opioid crisis to the coronavirus crisis the language of crisis is everywhere around us and ubiquitous in contemporary american politics and policymaking but for every problem that political actors describe as a crisis there are myriad other equally serious ones that are not described in this way why has the term crisis been associated with some problems but not others what has crisis come to mean and what work does it do in when bad things happen to privileged people dara z strolovitch brings a critical eye to the taken for granted political vernacular of crisis using systematic analyses to trace the evolution of the use of the term crisis by both political elites and outsiders strolovitch unpacks the idea of crisis in contemporary politics and demonstrates that crisis is itself an operation of politics she shows that racial justice activists innovated the language of crisis in an effort to transform racism from something understood as natural and intractable and to cast it instead as a policy problem that could be remedied dominant political actors later seized on the language of crisis to compel the use of state power but often in ways that compounded rather than alleviated inequality and injustice in this eye opening and important book strolovitch demonstrates that understanding crisis politics is key to understanding the politics of racial gender and class inequalities in the early twenty first century

Authority and Trust in US Culture and Society 2021-02-28 in the past two decades a discourse of crisis has emerged about the democratic institutions and political culture of the us many structures of authority which people had more or less taken for granted are facing a massive public loss of trust this volume takes an interdisciplinary and historical look at the transformations of authority and trust in the united states the contributors examine government institutions political parties urban neighborhoods scientific experts international leadership

religious communities and literary production exploring the nexus between authority and trust is crucial to understand the loss of legitimacy experienced by political social and cultural institutions not only in the united states but in western democracies at large

The US Housing Crisis 2018 this foundational text for understanding housing housing design homeownership housing policy special topics in housing and housing in a global context has been comprehensively revised to reflect the changed housing situation in the united states during and after the great recession and its subsequent movements toward recovery the book focuses on the complexities of housing and housing related issues engendering an understanding of housing its relationship to national economic factors and housing policies it comprises individual chapters written by housing experts who have specialization within the discipline or field offering commentary on the physical social psychological economic and policy issues that affect the current housing landscape in the united states and abroad while proposing solutions to its challenges

Introduction to Housing 2016-02-23 what is the relation of art to the practice of radical politics today strike artexplores this question through the historical lens of occupy an event that had artists at its core precarious indebted and radicalized artists redirected their creativity from servicing the artworld into an expanded field of organizing in order to construct of a new if internally fraught political imaginary set off against the common enemy of the 1 in the process they called the bluff of a contemporary art system torn between ideals of radical critique on the one hand and an increasing proximity to wall street on the other oftentimes directly targeting major art institutions themselves as sites of action tracking the work of groups including mtl not an alternative the illuminator the rolling jubilee and g u l f strike art shows how occupy ushered in a new era of artistically oriented direct action that continues to ramify far beyond the initial act of occupation itself into ongoing struggles surrounding labor debt and climate justice concluding with a consideration of the overlaps between such work and the aesthetic practices of the black lives matter movement art after occupy mckee suggests contains great potentials of imagination and action for a renewed left project that are still only beginning to ripen at once shaking up and taking flight from the art system as we know it

Strike Art 2023-09-19 nobody who sits in traffic on sedona arizona s main stretch or stands shoulder to shoulder in its many souvenir shops would call it a ghost town neither would anyone renting a room for 2 000 a month or buying a house for a half million dollars and yet the people who built this small town and made it a community are being pushed further and further out their home is being sold out from under their feet in studying the impact of short term rentals brendan o brien saw something similar happening in places ranging from bend oregon to bar harbor maine but it isn t just short term rentals and it s not just tourism towns neighborhoods in austin and atlanta have become rows of investment properties longtime residents in spokane and boston have been replaced by new high salaried remote workers across the country a level of unaffordable housing that once seemed unique to global cities like new york and san francisco has become the norm with nearly a third of all us households considered housing cost burdened this situation has been abetted by the direct actions of developers politicians and existing homeowners who have sought to drive up the cost of housing but it s mostly happened due to a society wide refusal to see housing as anything more than real estate another product available to the highest bidder this trend of putting local housing on a global market has worsened in recent years but is nothing new housing in the united states has always been marred by racial and income inequality that mocks the country s highest ideals deeply researched and deeply felt homesick argues that we can be so much better and we can start where we live

Homesick 2015-01-02 occupy wall street burst onto the stage of history in the fall of 2011 first by the tens then by the tens of thousands protestors filled the streets and laid claim to the squares of nearly 1 500 towns and cities until one by one the occupations were forcibly evicted in the occupiers michael gould wartofsky offers a front seat view of the action in the streets of new york city and beyond painting a vivid picture of everyday life in the square through the use of material gathered in the course of two years of on the ground investigation gould wartofsky traces the occupation of zuccotti park and some of its counterparts across the united states and around the world from inception to eviction he takes up the challenges the occupiers faced the paradoxes of direct democracy and the dynamics of direct action and police action and explores the ways in which occupied squares became focal points for an emerging opposition to the politics of austerity restricted democracy and the power of corporate america much of the

discussion of the occupy phenomenon has treated it as if it lived and died in zuccotti park but gould wartofsky follows the evicted occupiers into exile and charts their evolving strategies tactics and tensions as they seek to resist regroup and reoccupy displaced from public spaces and news headlines the 99 percent movement has spread out from the financial centers and across an america still struggling to recover in the aftermath of the crisis even if the movement fails to achieve radical reform gould wartofsky maintains its offshoots may well accelerate the pace of change in the united states in the years to come

The Occupiers 2017-04-18 the stories behind the inequality crisis a forty year investigation by in these times with heart wrenching reporting and incisive analysis in these times magazine has charted a staggering rise in inequality and the fall of the american middle class here in a selection from four decades of articles by investigative reporters and progressive thinkers is the story of our age it is a tale of shockingly successful corporate takeovers stretching from reagan to trump but also of brave attempts to turn the tide from the seattle global justice protests to occupy to the fight for 15 featuring contributions from michelle chen noam chomsky tom geoghegan juan gonzález david moberg salim muwakkil ralph nader frances fox piven keeanga yamahtta taylor slavoj Žižek and many others the age of inequality is the definitive account of a defining issue of our time

The Age of Inequality 2016-03-08 encountering poverty disrupts the new optimism about poverty action challenging mainstream frameworks of global poverty going beyond poverty as a problem that can be solved through economic resources or technological interventions the book focuses on the power and privilege underpinning persistent impoverishment it explores poverty action s place in the opportunities and limits of the current moment with its rapacious market forces and resurgent social and civil rights movements encountering poverty invites students educators activists and development professionals to think and act against inequality by foregrounding not sidestepping the long history of development and the ethical dilemmas of poverty action today provided by publisher

Encountering Poverty 2018-05-25 navigating policy and practice in the great recession is a fictional narrative that follows martha white the intrepid executive director of a small non profit organization as she navigates policy practice and demonstrates enlightened administrative leadership in the years during and following the great recession based on the authors 20 plus years of experience in non profit management and the evaluation of more than 40 welfare to work programs the narrative encompasses a broad range of policies programs and critical issues related to macro practice and organizational leadership readers will be exposed to the causes and consequences of the great recession and learn the real life implications of policy and practice on the lives of vulnerable families and the social service system engaging for students and helpful for professors the text is ideal for to social work social policy and social justice introductory courses

Navigating Policy and Practice in the Great Recession 2017-11-13 at a time when globalization has side lined many of the traditional state based addressees of legal accountability it is not clear yet how blame is allocated and contested in the new highly differentiated multi actor governance arrangements of the global economy and world society moral agency and the politics of responsibility investigates how actors in complex governance arrangements assign responsibilities to order the world and negotiate who is responsible for what and how the book asks how moral duties can be defined beyond the territorial and legal confines of the nation state and how obligations and accountability mechanisms for a post national world in which responsibility remains vague ambiguous and contested can be established using an empirical as well as a theoretical perspective the book explores ontological framings of complexity emphasizing emergence and non linearity which challenge classic liberal notions of responsibility and moral agency based on the autonomous subject moral agency and the politics of responsibility is perfect for scholars from international relations politics philosophy and political economy with an interest in the topical and increasingly popular topics of moral agency and complexity

Moral Agency and the Politics of Responsibility 2023-07-08 this book is the first study of the processes and structures of the occupy wall street movement written from the perspective of a core organizer who was involved from the inception to the end while much has been written on ows few books have focused on how the movement was organized marisa holmes an organizer of ows in new york city aims to fill this gap by deriving the theory from the practice

and analyzing a broad range of original primary sources from collective statements structure documents meeting minutes and live tweets to hundreds of hours of footage from the ows media working group archive in doing so she reveals how the movement was organized in practice which experiments were most successful and what future generations can learn

Organizing Occupy Wall Street 2008-06-10 in the twentieth century a broad consensus to fight racial discrimination linked black americans of all social classes and gave birth to a movement that paved the way for black political power now however black america is facing a moment of crisis despite the spectacular successes of some black americans such as barack obama and oprah winfrey many of the hopes of the civil rights movement have not been realized crime still disproportionately afflicts black neighborhoods and more black males are in prison than in college the national urban league and the naacp have become calcified and passé and the gop has effectively abandoned any pretense of offering blacks a political home black america is at a turning point though the democratic victories of 2006 the collapse of the republican party and the galvanizing impact of the obama candidacy are all signs of hope that the momentum of its decline into political insignificance can be reversed the 2008 election is black america s last chance

Last Chance 2018-04-19 this book discusses more general consideration of marginalized urban spaces and peoples around the globe it considers the question is the formation and later dissolution of the jewish ghetto an appropriate model for understanding the experience of other ethnic or racial populations

Die Corona-Gesellschaft 2016-06-02 we live in a human rights world the language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order all too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences reconstructing human rights argues that human rights are only as good as the ends they help us realise we must attend to what ethical principles actually do in the world to know their value so for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change reconstructing human rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships in this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities while this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly

consequences it will also be of interest to scholars considering human rights across disciplines including law sociology and anthropology

Reconstructing Human Rights 2018-08-06 writers as diverse as carolivia herron charles johnson paule marshall toni morrison and derek walcott have addressed the history of slavery in their literary works in this groundbreaking new book arlene r keizer contends that these writers theorize the nature and formation of the black subject and engage established theories of subjectivity in their fiction and drama by using slave characters and the condition of slavery as focal points in this book keizer examines theories derived from fictional works in light of more established theories of subject formation such as psychoanalysis althusserian interpellation performance theory and theories about the formation of postmodern subjects under late capitalism black subjects shows how african american and caribbean writers theories of identity formation which arise from the varieties of black experience re imagined in fiction force a reconsideration of the conceptual bases of established theories of subjectivity the striking connections keizer draws between these two bodies of theory contribute significantly to african american and caribbean studies literary theory and critical race and ethnic studies

Black Subjects 2016 one of the quintessential goals of the american dream is to own land and a home a place to raise one s family and prove one s prosperity particularly for immigrant families home ownership is a way to assimilate into american culture and community however latinos who make up the country s largest minority population have largely been unable to gain this level of inclusion instead they are forced to cling to the fringes of property rights and ownership through overcrowded rentals transitory living arrangements and at best home acquisitions through subprime lenders in *tierra y libertad* steven w bender traces the history of latinos struggle for adequate housing opportunities from the nineteenth century to today s anti immigrant policies and national mortgage crisis spanning southwest to northeast rural to urban bender analyzes the legal hurdles that prevent better housing opportunities and offers ways to approach sweeping legal reform *tierra y libertad* combines historical cultural legal and personal perspectives to document the latino community s ongoing struggle to make america home

The Western Humanities Review 2010-09-29 land used to produce food is at the core of disputes violent conflicts and despair across the world as farmers increasingly can no longer afford to grow food and as one in ten canadians faces food insecurity each year it is clear that our culture specific land systems lie at the heart of the current food and farm crises solutions must be implemented to ensure food security and food sovereignty in canada and the world in *belongings* sally miller illustrates how food and farm crises result from adherence to the rules of private property miller looks at the state of farmland and farmers in canada and across the world as a way of understanding ownership land regulation and the dire situation of our ability to produce food hundreds of acres of prime farmland are lost each day to residential development further restricting the ability of farmers to supply our food needs farmers face ever increasing financial risks and often have to sell farmable land for commercial development to make ends meet finally miller highlights several alternative structures of land use that are proving to be successful in canada and across the globe and argues that the way in which we understand and manage foodlands needs to be reconsidered to achieve sustainable food systems with healthy food access for all

Tierra Y Libertad 2016-10-20T00:00:00Z the global financial and economic crisis that hit the world since 2008 has affected the lives of many people all over the world and resulted in declining incomes rising unemployment foreclosures forced residential moves and cut backs in government expenditure the extent to which the crisis has affected urban neighborhoods and has led to rising intra urban inequalities has not yet received much attention the implemented budget cuts and austerity programs of national and local governments are likely to have hit some neighborhoods more than others the authors of this this book which come from a variety of countries and disciplines show that the economic crisis has affected poor neighborhoods more severely than more affluent ones the tendency of the state to retreat from these neighborhoods has negative consequences for their residents and may even nullify the investments that have been made in many poor neighborhoods in the recent past this book was originally published as a special issue of *urban geography*

Belongings 2018-10-18 red white black is a provocative critique of socially engaged films and related critical discourse offering an unflinching account of race and representation frank b wilderson iii asks whether such films accurately represent the structure of u s racial antagonisms

that structure he argues is based on three essential subject positions that of the white the settler master and human the red the savage and half human and the black the slave and non human wilderson contends that for blacks slavery is ontological an inseparable element of their being from the beginning of the european slave trade until now blacks have had symbolic value as fungible flesh as the non human or anti human against which whites have defined themselves as human just as slavery is the existential basis of the black subject position genocide is essential to the ontology of the indian both positions are foundational to the existence of white humanity wilderson provides detailed readings of two films by black directors antwone fisher denzel washington and bush mama haile gerima one by an indian director skins chris eyre and one by a white director monster s ball marc foster these films present red and black people beleaguered by problems such as homelessness and the repercussions of incarceration they portray social turmoil in terms of conflict as problems that can be solved at least theoretically if not in the given narratives wilderson maintains that at the narrative level they fail to recognize that the turmoil is based not in conflict but in fundamentally irreconcilable racial antagonisms yet as he explains those antagonisms are unintentionally disclosed in the films non narrative strategies in decisions regarding matters such as lighting camera angles and sound

Neighborhood Decline 2010-02-26 this book examines the who what when where and how of elite white male dominance in u s and global society in spite of their domination in the united states and globally that we document herein elite white men have seldom been called out and analyzed as such they have received little to no explicit attention with regard to systemic racism issues as well as associated classism and sexism issues almost all public and scholarly discussions of u s racism fail to explicitly foreground elite white men or to focus specifically on how their interlocking racial class and gender statuses affect their globally powerful decisionmaking some of the power positions of these elite white men might seem obvious but they are rarely analyzed for their extraordinary significance while the principal focus of this book is on neglected research and policy questions about the elite white male role and dominance in the system of racial oppression in the united states and globally because of their positioning at the top of several societal hierarchies the authors periodically address their role and dominance in other oppressive e g class gender hierarchies

Black Enterprise 1985-01 everyday dawns is the fourth in the dawn series of stories and poems by author allan edward tierney it explores the wide spectrum of everyday living both positive and negative and in addition includes a leavening of fantasy for good measure as with each book in the dawn series the object of the writer is to inspire the reader s mind to creativity to inspire imagination and to awaken a sense of wonder at the dawning of every new day

Black Enterprise 2012-08-25 why do american black people generally have worse health than american white people to answer this question black health dispels any notion that black people have inferior bodies that are inherently susceptible to disease this is simply false racial science used to justify white supremacy and black inferiority a genuine investigation into the status of black people s health requires us to acknowledge that race has always been a powerful social category that gives access to the resources we need for health and wellbeing to some people while withholding them from other people systemic racism oppression and white supremacy in american institutions have largely been the perpetrators of differing social power and access to resources for black people it is these systemic inequities that create the social conditions needed for poor health outcomes for black people to persist an examination of social inequities reveals that is no accident that black people have poorer health than white people black health provides a succinct discussion of black people s health including the social political and at times cultural determinants of their health using real stories from black people ray examines the ways in which black people s multiple identities social cultural and political intersect with american institutions such as housing education environmentalism and health care to facilitate their poor outcomes in pregnancy and birth pain management sleep and cardiovascular disease
