Guidelines for Cardia Rehabilitation and Secondary Prevention Programs-5th Edition

(with Web Resource) 2013-08-02 this second edition provides an updated review on the current guidelines and practice standards for the clinical management of cardiovascular risk factors and prevention of cardiovascular diseases endorsed by the American Society for Preventive Cardiology. This practical textbook includes concise descriptions of major and newer risk factors, biomarkers, and best practices in the management and prevention of cardiovascular disease. The manual contains chapters on the epidemiology and risk factors for a variety of cardiovascular diseases including dyslipidemia, hypertension, diabetes, inflammation, and ischemic stroke. It examines behavioral factors, psychosocial stress, family history, nutrition, physical activity, smoking, alcohol use, and other sociocultural factors. In addition, the book discusses new imaging strategies in detection of cardiovascular disease, prevention of heart failure, atrial fibrillation, and peripheral arterial disease, and prevention for special populations. Throughout the manual, recommendations are based on guidelines endorsed by the American College of Cardiology, American Heart Association, and other major societies. The second edition of the ASCP Manual of Preventive Cardiology is an essential resource for physicians, medical students, residents, fellows, nurses, and other healthcare professionals and researchers in cardiology, primary care, health promotion, and disease prevention, exercise physiology, and pharmacotherapy.

Cardiovascular Diseases: Guidelines for Prevention and Care 1973 topics include cardiac arrest as a public health concern, prehospital cardiac arrest, cardiopulmonary resuscitation, cardioactive medications in cardiac arrest, airway management in cardiac arrest, rapid response teams, and pediatric cardiac arrest.

A Primer on Stroke Prevention and Treatment 2009-04-20 focusing on the interdisciplinary team, this cardiovascular resource provides evidence-based knowledge and guidance for advanced practice nurses in a variety of care settings. Its clinically relevant and directly applicable information is presented in an accessible and well-organized format. The book encompasses clinical findings, diagnostic testing, state-of-the-art procedures, and therapeutic interventions commonly utilized in inpatient and outpatient clinical cardiology. It is specifically designed to meet the informational needs of advanced practice registered nurse providers and students, including family nurse practitioners, adult gerontology acute care nurse practitioners, nurse anesthetists, and clinical nurse specialists. The resource covers the range of cardiovascular conditions, both chronic and acute. It discusses the interdisciplinary cardiovascular care team, explains the cardiovascular history and clinical examination in nearly step-by-step detail, analyzes clinical findings, details common stable and urgent conditions, describes the preoperative cardiovascular evaluation, advises on the selection and appropriateness of laboratory evaluations and cardiovascular diagnostic studies, provides an overview of state-of-the-art procedures including electrophysiology, and assesses therapeutic interventions including lifestyle, pharmacotherapeutics, and invasive techniques. It supports the development of clinical judgment skills and therapeutic decision making by considering the challenges presented through advances in technology and the increasing complexity of diagnostic procedures. An appendix features tables of relevant and essential cardiovascular guidelines for quick reference. Key features include: details current and cutting-edge practices and contemporary issues in cardiovascular care; applies evidenced-based research findings to clinical practice; compares diagnostic testing options and therapeutic interventions; clarifies complex topics through use of tables, algorithms, images, and lists; identifies pertinent studies and resources for cardiovascular care; describes common cardiac procedures and screening methods; supports the development of clinical judgment skills and therapeutic decision making.
