in this collection of essays leading environmentalists and philosophers explore the relationship between environmental ethics and policy both in theory and practice the first section of the book focuses on four approaches to change in ethical theory ecological science feminist metaphysics chinese philosophy and holistic postmodern technology in subsequent sections the contributors emphasize the need for nontraditional solutions and attempt to expand awareness of the most pressing practical problems among the topics discussed are the possibilities of real international cooperation the inequitable but economically intractable issue of global gasses the political and ethical challenges of city planning and the growing evidence of fundamental inappropriateness in treating land as legal private property this volume is based on essays presented in 1992 at the second international conference on ethics and environmental policy the conference was held in response to the increasing need for a new ethics that would counter the traditional human centered dominantly individualistic approach of the industrial world toward the environment

Project Management Theory Meets Practice 2015

the idea of this book comes from the observation that sensor networks represent a topic of interest from both theoretical and practical perspectives the title and lines that sensor networks offer the unique opportunity of clearly linking theory with practice in fact owing to their typical low cost academic researchers have the opportunity of implementing sensor network testbeds to check the validity of their theories algorithms protocols etc in reality likewise a practitioner has the opportunity of understanding what are the principles behind the sensor networks under use and thus how to properly tune some accessible network parameters to improve the performance on the basis of the observations above the book has been structured in three parts part i is denoted as theory since the topics of its three chapters although theoretical have a clear connection with specific practical scenarios

part iii is denoted as practice since the topics of its ve chapters are clearly related to practical applications
