music is played and heard in time yet it is also embodied in space by musical scores the observation of a musical score turns time into space and allows musicians to embrace the flow of time in a single glance this experience constitutes a symbol for the eternal present the simultaneous knowledge of all time outside time this book analyzes the implications of this view through a variety of interdisciplinary perspectives linking theology philosophy literature and music it also studies how this theme has been foreshadowed in the writings of dante and j r r tolkien demonstrating the connections between their masterpieces and the aesthetics of their times the result is a fascinating itinerary through the history of culture thought and music but also a deeply theological and spiritual experience

how human musical experience emerges from the audition of organized tones is a riddle of long standing in the musical representation charles nussbaum offers a philosophical naturalist s solution nussbaum founds his naturalistic theory of musical representation on the collusion between the physics of sound and the organization of the human mind brain he argues that important varieties of experience afforded by western tonal art music since 1650 arise through the feeling of tone the sense of movement in musical space cognition emotional arousal and the engagement by way of specific emotional responses of deeply rooted human ideals construing the art music of the modern west as representational as a symbolic system that carries extramusical content nussbaum attempts to make normative principles of musical representation explicit and bring them into reflective equilibrium with the intuitions of competent listeners nussbaum identifies three modes of musical representation describes the basis of extramusical meaning and analyzes musical works as created historical entities performances of which are tokens or replicas in addition he explains how music gives rise to emotions and evokes states of mind that are religious in character nussbaum s argument proceeds from biology psychology and philosophy to music and occasionally from music back to biology psychology and philosophy the human mind brain writes nussbaum is a living record of its evolutionary history relatively recent cognitive acquisitions derive from older representational functions of which we are hardly aware consideration of musical art can help bring to light the more ancient cognitive functions that underlie modern human cognition the biology psychology and philosophy of musical representation he argues have something to tell us about what we are based on what we have been

This book contains five graphic analyses of the opening movement of Beethoven's Sonata Op. 31 No. 2. The analyses are based on essays published in *Beethoven's Tempest Sonata: Perspectives on Analysis and Performance*, edited by Pieter Berge, William E. Caplin, and Jeroen D. Hoe, Leuven, 2009. While the earlier collection was conceived for an academic readership, the present volume, by contrast, is intended primarily for practical musicians. The musical score itself accordingly serves as the point of departure, with analytical remarks introduced at the moment at which the relevant music appears. In so doing, this book aims to offer performers analytical insights within the familiar context of sitting at the piano and following the chronology of the musical process itself. Five different analytical perspectives are presented: motivic (Pieter Berge) and Jeroen D. Hoe; Schenkerian (Poundie Burstein); form-functional (William E. Caplin); Sonata Theory (James Hepokoski); and metrical (William Rothstein). This book contains five graphic analyses of the opening movement of Beethoven's Sonata Op. 31 No. 2. Conducting and Rehearsing the Instrumental Music Ensemble is the most comprehensive guide on the rehearsal process for conducting instrumental music ensembles. Ideal for the advanced instrumental music conductor seeking to look beyond basic conducting technique, this work breaks the multidimensional activity of working with an ensemble orchestra or band into its constituent components. Advanced students of conducting will find within the full range of conducting activities chapters on the infrastructure of the rehearsal, the rehearsal environment, 10 rehearsal essentials, score study, music imagery, inner singing, and rehearsal procedures, with an emphasis on an integrated approach to rehearsing the technical priorities of intonation and tuning, rhythm patterns, ensemble sonority, tone balance, blend, color, and texture, and articulation. The musical priorities of tempo and ensemble precision, phrasing, and the musical line, style, and interpretation, dynamics, and musical expression, emphasizing the expectations of 21st-century conductors, the challenges of conducting and rehearsing contemporary music, preparing conductor profiles and self-evaluations, and moving from the rehearsal process to concert performance. Conducting and Rehearsing the Instrumental Music Ensemble is a great resource for teachers and students of conducting, as well as current conductors wishing to further hone their skills.
