Lewis Gordon is Lecturer in Accounting at the University of Liverpool and has extensive experience of teaching financial accounting at undergraduate and professional levels. Frank Wood formerly authored this text and he remains one of the best-selling authors of accounting textbooks.

Accounting Principles

2020-12-03

In the newly revised fourteenth edition of Financial Accounting: Theory and Analysis, Text and Cases, a decorated team of accounting veterans delivers an authoritative exploration of how accounting standards impact the daily decisions of accounting professionals. You'll discover how accounting theory explains why particular companies select particular accounting methods and predicts the attributes of firms by analyzing the accounting methods they employ. The authors examine the latest empirical research relevant to theories of accounting and the uses of accounting information, including the fundamental analysis model, the efficient markets hypothesis, the behavioral finance model, the positive accounting theory model, and more. This latest edition robustly summarizes current disclosure requirements for various financial statement items and reviews the development and current state of accounting theory. It also includes discussions of the decline of the movement to adopt international accounting standards in the United States, coverage of the proposed IASB amendment to require reporting on ESG metrics, explorations of recent attempts to promote relevant and practical accounting research.

in academia updated analysis exercises for real world financial statements analysis of the differences between fasb and iasb accounting standards pertaining to fair value coverage of the changes related to stock compensation contained in asu 2021 04 and asu 2018 07
