with good judgment little else matters without it nothing else matters whether we re talking about united states presidents ceos major league coaches or wartime generals leaders are remembered for their best and worst judgment calls in the face of ambiguity uncertainty and conflicting demands the quality of a leader s judgment determines the fate of the entire organization that s why judgment is the essence of leadership yet despite its importance judgment has always been a fairly murky concept the leadership literature has been conspicuously quiet on what exactly defines it does judgment differ from common sense or gut instinct is it a product of luck of smarts or is there a process for making consistently good calls noel tichy and warren bennis have each spent decades studying and teaching leadership and advising top ceos such as jack welch and howard schultz now in their first collaboration they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious they show how to recognize the critical moment before a judgment call when swift and decisive action is essential and also how to execute a decision after the call tichy and bennis bring their three dimensional model to life with interviews with world class leaders who have thrived or suffered because of their judgment calls these stories include jeff immelt ceo of general electric whose judgment to grow through research and development transformed ge into the world s premier technology growth company joel klein chancellor of the new york city department of education who made tough calls about teachers students and parents while turning around a troubled school system jim mcnerney ceo of boeing whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect the late general wayne downing who found an unexpected opportunity in the midst of crisis when he led the special operations raid to capture manuel noriega a g lafley ceo of procter gamble who bet 57 billion to purchase gillette and reinvent his company brad anderson ceo of best buy who made the call to commit totally to a customer centric strategy and led his people to execute it whether you re running a small department or a global corporation judgment will give you a framework for evaluating any situation making the call and correcting if necessary during the execution phase it will show you how to handle the overlapping domains of people strategy and crisis management and it will help you teach your entire team to make the right call more often no organization can afford to neglect this crucial discipline and no previous book has ever brought it into such clear focus

the bible is fundamental to western culture political philosophers from hobbes locke montesquieu and rousseau to modern political theorists such as george h sabine leo

strauss and sheldon s wolin have drawn upon biblical examples american political leaders such as thomas paine abraham lincoln and william jennings bryan all drew heavily upon the bible today most contemporary politicians display less familiarity with scripture although many proudly proclaim themselves to be born again christians politics in the bible has a simple goal to help readers to think critically about how the bible illuminates understanding of justice leadership and politics for a political scientist there are great advantages to studying the bible students of the bible have short texts to analyze but they have a history of two thousand years of jewish and christian scholarly discussion in that tradition paul r abramson analyzes stories drawn from eighteen of the thirty nine books of the hebrew bible and fifteen of the twenty seven books of the new testament abramson argues that the bible is a book that should be read even by those who do not believe it has any transcendent significance one can choose to read it as the revealed word of god as a source of western morality as a compilation of interesting stories poetry and history or as a work of great literature although this book discusses selected stories that have political implications it also considers parts that have literary merit this unusual volume may stimulate new thinking about the bible as a source of insight into political ideas

most recent discussion of the united states constitution and war both the war on terrorism and the war in iraq has been dominated by two diametrically opposed views the alarmism of those who see many current policies as portending gross restrictions on american civil liberties and the complacency of those who see these same policies as entirely reasonable accommodations to the new realities of national security whatever their contributions to the public discussion and policy making processes

these voices contribute little to an understanding of the real constitutional issues raised by war providing the historical and legal context needed to assess competing claims the constitution in wartime identifies and explains the complexities of the important constitutional issues brought to the fore by wartime actions and policies twelve prominent legal scholars and political scientists combine broad overviews of u s history and contemporary policy with detailed yet accessible analyses of legal issues of pressing concern today some of the essays are broad in scope reflecting on national character patriotism and political theory exploring whether war and republican government are compatible and considering in what sense we can be said to be in wartime circumstances today others are more specific examining the roles of congress the presidency the courts and the international legal community throughout the collection balanced unbiased analysis leads to some surprising conclusions one of which is that wartime conditions have sometimes increased rather than curtailed civil rights and civil liberties for instance during the cold war government officials regarded measures aimed at expanding african americans freedom at home as crucial to improving america s image abroad contributors sotirios barber mark brandon james e fleming mark graber samuel issacharoff david luban richard h pildes eric posner peter spiro william michael treanor mark tushnet adrian vermeule

this study explores the relationship between the individual person the self the divine and other people in the writings of the apostle paul and the roman stoic epictetus it does so by examining self involving actions expressed with reflexive pronouns myself yourself etc in various kinds of sentences for example examine yourself and you do not belong to yourself after situating the topic within the fields of linguistics and ancient greek the study then examines the reflexive constructions in epictetus s discourses showing that reflexive texts express fundamental aspects of his ethic of rational self interest in imitation of the indwelling rational deity next the investigation examines the 109 reflexive constructions in paul providing an exegesis of each reflexive text and then synthesizing the results paul s reflexive phrases are essential statements of his theology and ethics expressing an interconnected narrative christology narrative apostolic identity and narrative ethic most importantly the study finds that for epictetus concern for others is a rational means to self realization whereas for paul concern for others is a community ethic grounded in the story of the indwelling christ and is the antithesis of self interest
