**file type** [weblio](#) *Aug 09 2023*

File types are used to identify the format of a file. They are usually indicated by the file extension. For example, a file with the extension .txt is a text file. File types are also used to determine which application is needed to open a file. For example, a file with the extension .docx is a Microsoft Word document, so you would need Microsoft Word to open it.

**file type** [weblio](#) *Jul 08 2023*

File types are used to identify the format of a file. They are usually indicated by the file extension. For example, a file with the extension .txt is a text file. File types are also used to determine which application is needed to open a file. For example, a file with the extension .docx is a Microsoft Word document, so you would need Microsoft Word to open it.

**input type file html** [weblio](#) *Jun 07 2023*

The file input type is used to allow users to upload files to a web page. It is represented by the HTML attribute file. The input type file is used to allow users to upload files to a web page. It is represented by the HTML attribute file. The input type file is used to allow users to upload files to a web page. It is represented by the HTML attribute file.

**file type** [mdn](#) *May 06 2023*

File types are used to identify the format of a file. They are usually indicated by the file extension. For example, a file with the extension .png is a Portable Network Graphics file. File types are also used to determine which application is needed to open a file. For example, a file with the extension .webp is a WebP image, so you would need a web browser to open it.

**list of file formats wikipedia** *Apr 05 2023*

This is a list of file formats used by computers organized by type. filename extension is usually noted in parentheses if they differ from the

file format s name or abbreviation many operating systems do not limit filenames to one extension shorter than 4 characters as was common with some operating systems that supported the file
