one of the central issues in the study of the chinese communist party and its foreign policy is its relations with moscow was the ccp a chinese nationalist party antagonistic to an intrusive soviet union or was it rather an internationalist party with ideological political and strategic military ties to moscow faithfully adhering to marxist leninist principles as well as to stalin s policy advice for the past two decades a number of historians have argued that the ccp was a nationalist movement and that the united states missed its opportunity to establish friendly relations because u s leaders were blinded by fears of an international communist threat in his provocative book michael sheng strongly challenges this position on the basis of extensive new information obtained from recently available chinese sources sheng demonstrates that the foreign policy of the ccp under mao zedong did in fact follow the directions recommended by joseph stalin sheng reveals that mao and stalin were in frequent and direct contact by radio and by correspondence beginning in 1936 and that mao consistently acted on stalin s advice battling western imperialism analyzes the ccp s relations with both the soviet union and the united states and provides conclusive evidence that there was no lost opportunity for the u s in china he shows that the ccp viewed the united states as a hostile capitalist power that opposed its revolutionary aims the author has drawn on an unprecedented collection of chinese language materials to make a powerful new argument

what were the guiding themes of the discipline of international relations before world war ii the traditional disciplinary history has long viewed this time period as one guided by idealism and then challenged by realism this book reconstructs in detail some of the formative episodes of the field s early development and arrives at the conclusion that in actuality the early years of international relations were preoccupied not with idealism and realism but with the dual themes of imperialism and internationalism thus the beginnings of the discipline have resonance with the recently revived discourse of empire and the global status and policies of the united states as the world s sole superpower book jacket

provides an examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization deploying a marxist methodology smith begins by tracing the production of certain iconic commodities the t shirt the cup of coffee and the iphone and demonstrates how these generate enormous outflows of money from the countries of the global south to transnational corporations headquartered in the core capitalist nations of the global north from there smith draws on his empirical findings to theorize the current shape of imperialism he argues that the core capitalist countries need no longer rely on military force and colonialism although these still occur but increasingly are able to extract profits from workers in the global south through market mechanisms and by aggressively favoring places with lower wages the phenomenon of labor arbitrage from publisher description

france had the second largest empire in the world after britain but one with very different origins and purposes over more than four centuries the french empire explained itself in many different ways through many different colonial regimes beginning in the early modern period a vast mercantile empire based on furs and fish in the new world and sugar cultivated by the enslaved in the caribbean rose and fell at intervals thereafter the french seemed to have an empire simply as an attribute of a great power generally in competition with britain relatively few french people ever moved to the empire even to the settler colony of algeria under the third republic the french construed a civilizing mission melding selectively applied principles of democracy and colonial capitalism two world wars and two anticolonial wars broke french imperial power as it had previously existed yet numberless traces of the french empire lived on both in the former colonies and in today s french republic this narrative history recounts the unique course of the french empire questioning how it made sense to the people who ruled it lived under it and fought against it

saskatchewan s co operative commonwealth federation ccf the forerunner of the ndp is often remembered for its humanitarian platform and its pioneering social programs but during the twenty years it governed it wrought a much less scrutinized legacy in the northern regions of the province until the 1940s churches fur traders and other influential newcomers held firm control over saskatchewan s northern region following its rise to power in 1944 the ccf made aggressive efforts to unseat these traditional powers and install a new socialist economy and society in largely aboriginal communities the next two decades brought major changes to the region as well meaning government planners grossly misjudged the challenges that confronted the north and failed to implement programs that would meet its needs northerners lacked the voice and political clout to determine policies for their half of the province and the ccf effectively created a colonial apparatus imposing its own ideas and plans in those communities without consulting residents while it did ensure that parish priests bootleggers and fur sharks no longer dominated the north it failed to establish a workable alternative in an elegantly written history that documents the colonial relationship between the ccf and northern saskatchewan david quiring draws on extensive archival research and oral history to offer a fresh look at the ccf era this examination will find a welcome audience among historians of the north aboriginal scholars and general readers interested in canadian history
