Wiley GAAP for Governments 2016: Interpretation and Application of Generally Accepted Accounting Principles for State and Local Governments 2016-02-08

traditionally internationalization efforts in higher education have been rooted in neo liberal transactional models that restrict or compromise the space for meaningful exchanges of socio cultural capital recently researchers and practitioners in the international education field have taken issue with programming and practices in education abroad international student recruitment and internationalization of the curricula that perpetuate systems of imbalance fossilize prejudices adversely impact host communities abroad and limit student learning to the confines of the western epistemological traditions as a result scholars and practitioners are creating new paradigms for engagement and exchange people centered approaches toward the internationalization of higher education is an essential scholarly publication that examines the praxis of internationalization in higher education with empirical research and relevant models of practice that approach the topic critically and responsibly the book innovates and re humanizes internationalization efforts including education abroad international recruitment international scholar and student services and internationalization of curriculum by focusing on the people and communities touched intentionally and unintentionally by said efforts it is ideal for higher education faculty education professionals academic advisors academicians administrators curriculum designers researchers and students

The Routledge Companion to Behavioural Accounting Research 2017-11-06

the origins of satyr drama and particularly the reliability of the account in aristotle remains contested and several of this volume s contributions try to make sense of the early relationship of satyr drama to dithyramb and attempt to place satyr drama in the pre classical performance space and traditions what is not contested is the relationship of satyr drama to tragedy as a required cap to the attic trilogy here however how aeschylus sophocles and euripides to whom one complete play and the preponderance of the surviving fragments belong envisioned the relationship of satyr drama to tragedy in plot structure setting stage action and language is a complex subject tackled by several contributors the playful satyr chorus and the drunken senility of silenos have always suggested some links to comedy and later to atellan farce and phylax those links are best examined through language passages in later greek and roman writers and in art the purpose of this volume is probe as many themes and connections of satyr drama with other literary genres as well as other art forms putting satyr drama on stage from the sixth century bc through the second century ad the editors and contributors suggest solutions to some of the controversies but the volume shows as much that the field of study is vibrant and deserves fuller attention

European public discourse often frames forced migration solely as a security issue and ignores the implications of societal diversity for health quality of life and well-being in both Africa and Europe. The present volume offers an interdisciplinary and international look at the relationship between refugees diversity and health including health care policies socio-political framework conditions environmental factors the situation in refugee camps quality of life approaches and economical perspectives

Community Justice in Australia 2023-02-28

Bachelor thesis from the year 2017 in the subject Business Economics Company Formation Business Plans Grade 1-3 Free University of Berlin Fachbereich Wirtschaftswissenschaft Course Wirtschaftsinformatik Language English Abstract The global economy is shifting labor from agriculture and manufacturing to services. Globally spanning service-based business models enabled by information technology and increasingly specialized businesses and professions have transformed our economies. Service innovation is key in order to achieve growth for this more service-focused than ever world economy to thrive. Scholars recognize a need for new ways of value creation that can propel economic growth and the development of more effective services. Vargio Maglio Akaka (2008) one answer to respond to that need is the reorganization of the production of services in so-called service systems. This approach is particularly useful for knowledge-intensive industries and noticeable for example in the artificial intelligence (AI) industry. A rapidly evolving hyper-innovative ecosystem with new players coming up at frequent intervals. AI startups offer their services through smart service systems or they try to make their customers and their own service systems smarter by adding AI services to the process of value co-creation. The industry heavily relies on software as a service (SaaS) business models which represent the ideal typical shift to a service-dominant logic thinking when it comes to the acceptance of those new services. Trust is a vital concern while it has always been an important issue in services. Trust in smart service systems becomes crucial as AI startups' service propositions are far from familiar to their potential clients. They have got to go the extra mile to build trust in their smart service systems. This paper will provide answers to the research question: How do AI startups build trust in their smart service systems by applying the theory of trust to smart service systems and AI startups as website quality is an important trust-building lever. The research question will be answered by exploring trust-building measures in a sample of 26 AI startups' websites. The major findings include that AI startups do not make their smart service systems as transparent as they could through their websites that showcasing recognition by third parties occurs mostly through inexpensive tools that are easy to implement and that all AI startups offer indirect channels to get in contact with them but less offer richer channels.

Health in Diversity - Diversity in Health 2020-02-03

Green and intelligent technologies for sustainable and smart asphalt pavements. Contains 124 papers from 14 different countries which were presented at the 5th International Symposium on Frontiers of Road and Airport Engineering IFRAE 2021 Delft the Netherlands 12-14 July 2021. The contributions focus on research in the areas of circular sustainable and smart airport and highway pavement and collect the state of the art and state of practice areas of long life and circular materials for sustainable cost-effective smart airport and highway pavement design and construction. The main areas covered by the book include green and sustainable pavement materials recycling technology warm cold mix asphalt materials functional pavement design self-healing pavement materials eco-efficiency pavement materials pavement preservation maintenance and rehabilitation smart pavement materials and structures safety technology for smart roads pavement monitoring and big data analysis role of transportation engineering in future pavements. Green and intelligent technologies for sustainable and smart asphalt pavements aims at researchers practitioners and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods and for those involved or working in the broader field of pavement engineering.

How do AI startups build trust in their smart service systems? 2018-11-29

Starch in food structure function and applications. Second edition reviews starch structure functionality and the growing range of starch ingredients used to improve the nutritional and sensory quality of food. The new edition is fully updated and brings new chapters on starch and health isolation processing and functional properties of starch. Part one illustrates how plant starch can be analyzed and modified with chapters on plant starch synthesis starch bioengineering and starch acting enzymes. Part two examines the sources of starch from wheat and potato to rice corn and tropical supplies. Part three looks at starch as an ingredient and how it is used in the food industry with chapters on modified starches and the stability of frozen foods starch lipid interactions and starch-based microencapsulation. Part four covers starch as a functional food investigating the impact of starch on physical and mental performance detecting nutritional starch fractions and analyzing starch digestion. The book is a standard
