cyberbullying and online harms identifies online harms and their impact on young people from communities to campuses exploring current and future interventions to reduce and prevent online harassment and aggression this important resource brings together eminent international researchers whose work shines a light on social issues such as bullying cyberbullying racism homophobia hate crime and social exclusion the text collates into one volume current knowledge and evidence of cyberbullying and its effect on young people facilitating action to protect victims challenge perpetrators and develop policies and practices to change cultures that are discriminatory and divisive it also provides a space where those who have suffered online harms and who have often been silenced in the past may have a voice in telling their experiences and recounting interventions and policies that helped them to create safer spaces in which to live in their community study in their educational institutions and socialise with their peer group this is essential reading for researchers academics undergraduates and postgraduates in sociology psychology criminology media and communication studies as well as practitioners and policymakers in psychology education sociology criminology psychiatry counselling and psychotherapy and anyone concerned with the issue of bullying cyberbullying and online harms among young people in higher education this book looks historically at the harm that has been inflicted in the practice of sport and at some of the issues debates and controversies that have arisen as a result written by experts in history sociology sport journalism and public health the book considers sport and injury in relation to matters of social class gender ethnicity and race sexuality political ideology and national identity health and wellbeing childhood animal rights and popular culture these matters are in turn variously related to a range of sports including ancient pre and early industrial sports american football boxing wrestling and other combat sports mountaineering horseracing cycling motor racing rugby football cricket association football baseball basketball crossfit ice hockey olympic sports mixed martial arts and sport in an imagined dystopian future designed to help clinicians people who self harm and their families and carers to understand its causes meaning and treatment this book explores unconscious meanings for self harming and the sense in which it is a language of the body self harm is generally regarded as a modern epidemic associated especially with young women but references to self harm are found in the poetry of ancient rome the drama of ancient greece and early christian texts including the bible studied by criminologists doctors nurses psychologists psychiatrists and sociologists the actions of those who harm themselves are often alienating and bewildering this book provides a historical and conceptual roadmap for understanding self harm across a range of times and places in modern high schools and in modern warfare in traditional religious practices and in avant garde performance art describing the diversity of self harm as well as responses to it this book challenges the understanding of it as a single behavior associated with a specific age group gender or cultural identity in this in depth analysis of first nations opposition to the oil sands industry james heydon offers detailed empirical insight into canadian oil sands regulation the environmental consequences of the oil sands industry have been thoroughly explored by scholars from a variety of disciplines however less well understood is how and why the provincial energy regulator has repeatedly sanctioned such a harmful pattern of production for almost two decades this research monograph addresses that shortcoming drawing from interviews with government industry and first nation personnel along with an analysis of almost 20 years of policy strategy and regulatory approval documents sustainable development as environmental harm offers detailed empirical insight into canadian oil sands regulation providing a thorough account of the ways in which the regulatory process has prioritised economic interests over the land based cultural interests of first nations it addresses a gap in the literature by explaining how environmental harm has been systematically produced over time by a regulatory process tasked with the pursuit of sustainable development with an approach emphasizing the importance of understanding how and why the regulatory

process has been able to circumvent various protections for the entire duration in which the contemporary oil sands industry has existed this work complements existing literature and provides a platform from which future investigations into environmental harm may be conducted it is essential reading for those with an interest in green criminology environmental harm indigenous rights and regulatory controls relating to fossil fuel production the book presents discussions of the application of stan cohen s theories alongside empirical contributions in the fields of critical and green criminology taken together the authors critically address harms and crimes against the environment as well as against human and nonhuman victims limiting harm in health care highlights the potential for unnecessary harm in health care practice this harm is mostly unintentional but it can result from many different aspects of medical treatment in a wide range of practice areas adverse events events or omissions during clinical care resulting in physical or psychological injury are increasingly being recognised as significant problems in health care following clarification of the nature and extent of medical harm in health care separate chapters explore the potential for medical harm in diverse areas of practice topics include problems in the use of medication the treatment of acute heart disease the role of hospital routine and the potentially negative role of medically dominated treatment in mental illness and palliative care the book includes recommendations for reducing unnecessary harm within the expanding boundaries of nursing practice the reader is challenged to assess the potential risks inherent in the health care system to reconsider established methods of treatment and to re examine professional working relationships the papers collected here represent the most recent work on a much neglected problem in practical reasoning it is the problem of imperceptible harms and benefits it is perhaps better to characterize the problem as a collection of puzzles or paradoxes since those who deny the existence or possibility of imperceptible decrements or increments face problems no less perplexing than those who affirm their existence the puzzles and paradoxes combine very practical and pressing worries about our obligations to relieve starvation mitigate suffering and conserve resources with deep metaethical worries about the nature of practical rationality i use these brief introductory pages to familiarize the reader with the basic set of problems examined in this collection most of us think that an action cannot be wrong if its effects are entirely and always imperceptible jonathan glover s fanciful example of the 100 armed bandits and the 100 unarmed tribesman clearly illustrates a deep worry with such moral reasoning powerful mindfulness tools to help you move beyond self harming thoughts and behaviors so you can get back to living your life being a teen in today s world isn t easy maybe you ve been bullied maybe you feel like your family or friends just don t get you or maybe you feel like you don t have control of your life or you re just tired of trying to be perfect all the time you aren t alone many teens struggle with difficult feelings and thoughts and sometimes when these thoughts feel overwhelming you just want to feel something else this is where self harming behaviors such as cutting come in but there are better ways to manage your pain this book will help guide you in this workbook you ll learn about the power of mindfulness and how it can help you create your own special space for simply being with your thoughts when you re dealing with difficult emotions you ll have this safe space to go to again and again no matter where you are or what you re doing you ll learn how to be mindful of your senses techniques for managing difficult feelings before they escalate and move past self judgment to embrace self compassion and self awareness pain is a normal part of life it s how you react to this pain that really matters let this workbook guide you toward better strategies for dealing with stress and emotional pain so you can be safe happy and in control of your life a london based female assassin runs into trouble on a mission in 1970s mexico in this action packed debut crime thriller acapulco 1974 rina walker is on assignment just another quick clean kill when she wakes to discover her employer s severed head on her bedside table and a man with an ak 47 coming through the door of her hotel room she must use all her skills to neutralise her attacker and escape notting hill 1956 fifteen year old rina is scavenging and stealing to support her siblings and her alcoholic mother when a local gangster attacks her younger sister rina wreaks revenge innocence betrayed rina faces the brutality of the post war london underworld a world that teaches her the skill to kill praise for harm hugh fraser s harm is the perfect combination of action mystery and intrigue it also features some superbly constructed characters who develop over the course of the story which is a rarity in mystery novels benjamin maio mackay actor go

and buy it quick it is very filmic and very taut this book will do you harm because you won't want to do anything else but sit down and get to the next bit fast fabulous celia imrie actress bridget jones diary calendar girls the best exotic marigold hotel the multifaceted nature of harmful substance use and gambling requires interdisciplinary analysis to assess the underlying causes what determines harm from addictive substances and behaviours draws together evidence from twelve disciplines including anthropology genetics neurobiology and public policy using a developmental approach the book presents evidence on the factors that influence the development of harmful substance use and gambling the determinants of harm operate at three levels molecular individual and social this book brings to light the complex interplay between them and presents the scientific social economic political and psychological influences of harmful substance use and gambling these individual determinants are then synthesised into an integrative heuristic model to encourage new ways of thinking the findings from this analysis are used to elaborate key general implications for health and broader social policy clinical practice and future research what determines harm from addictive substances and behaviours is based on research from alice rap a multidisciplinary european study of addictive substances and behaviours in contemporary society this is an essential resource for public health professionals stakeholders influencing policy for addictive substances and behaviours students and academics looking to better understand the factors influencing substance use and gambling and the implications this research has for addiction prevention policy an ethnography of the ecuadorian amazon that demonstrates the need for a relational place based contingent understanding of harm and toxicity reckoning with harm is a striking ethnographic analysis of the harm resulting from oil extraction covering fifty years of settler colonization and industrial transformation of the ecuadorian amazon amelia fiske interrogates the relations of harm she moves between forest courtrooms and oily waste pits farms and toxic tours to explore both the ways in which harm from oil is entangled with daily life and the tensions surrounding efforts to verify and redress it in practice attempts to address harm from the oil industry in ecuador have been consistently confounded by narrow technocratic understandings of evidence toxicity and responsibility building on collaborators work to contest state and oil company insistence that harm is controlled and principally chemical in nature fiske shows that it is necessary to refigure harm as relational in order to reckon with unremediated contamination of the past while pushing for broad forms of accountability in the present she theorizes that harm is both a relationship and an animating feature of relationships in this place a contingent understanding that is needed to contemplate what comes next when living in a toxic world this volume explores empathy's potential for healing and harm and its potency to effect change for good or ill at inter personal ecological and global levels how can the brutal and costly enterprise of criminal punishment be justified this book makes a provocative original contribution to the philosophical literature and debate on the morality of punishing arguing that punishment is justified in the duties that offenders incur as a result of their wrongdoing the first book on self harm written for parents by parents are you concerned that your child may be self harming are you wondering what to do for the best do you need more information and help if so this is the book for you an ever increasing number of young people are turning to self harm in order to cope with the pressures of modern living and this poses a huge problem for parents and others who care for them this book provides the answers you need to questions such as how do i know for sure whether my child is self harming how should i approach my child what help and treatment is available to us what can i do to help my child how have other parents coped full of the real life experiences of other parents who have been there this is a practical book that will both inform and equip you to help your child and yourself through this difficult time self harm is increasingly prevalent in our society but few of us understand why or know what to do to help ourselves friends or family in such situations it can be very isolating understanding and responding to self harm aims to fill this gap providing practical information and advice for anyone who has an experience of self harm showing the various forms self harm can take this book explores the reasons behind it and offers advice on self management support to others and what services are available full of clear thoughtful advice for those who may be thinking of harming themselves or have already done so as well as guidance for families and friends on helpful strategies and responses and ones to avoid it uses evidence from research and direct experience to provide an essential resource the aesthetics of self

harm presents a new approach to understanding parasuicidal behaviour based upon an examination of online communities that promote performances of self harm in the pursuit of an idealised beauty the book considers how online communities provide a significant level of support for self harmers and focuses on relevant case studies to establish a new model for the comprehension of the online supportive community to do so alderton explores discussions of self harm and disordered eating on social networks she examines aesthetic trends that contextualise harmful behavior and help people to perform feelings of sadness and vulnerability online alderton argues that the traditional understanding of self violence through medical discourse is important but that it misses vital elements of human group activity and the motivating forces of visual imagery covering psychiatry and psychology rhetoric and sociology this book provides essential reading for psychologists sociologists and anthropologists exploring group dynamics and ritual and rhetoricians who are concerned with the communicative powers of images it should also be of great interest to medical professionals dealing with self harming patients due to the sudden movement in the backstage su xiaoxiao had entered into the book that she had written however who could tell her that the direction of the story was different from what she had expected the male lead wanted to be with the female lead so he wanted to get rid of her the male partner wanted to become the male lead so he wanted to get rid of her in order to keep her position the female lead wanted to get rid of her wait you re all made by me and you re even defying the heavens will there will always be people who want to harm me since this is the case i will take care of all of you one by one self harm and eating disorders are present in almost every school and they frequently co occur this book provides the vital guidance that school staff need to spot early warning signs understand triggers and support the students in their care effectively this very practical guide helps educational professionals to gain a better understanding of self harm and eating disorders by dispelling the myths and misconceptions that surround these behaviours the book provides advice on whole school policies and procedures as well as day to day strategies to implement in lessons at mealtimes and in one on one sessions it explains how to respond to disclosures make referrals and work alongside parents to assist in the road to recovery medical mistakes are more pervasive than we think how can we improve outcomes an acclaimed md s rich stories and research explore patient safety patients enter the medical system with faith that they will receive the best care possible so when things go wrong it s a profound and painful breach medical science has made enormous strides in decreasing mortality and suffering but there s no doubt that treatment can also cause harm a significant portion of which is preventable in when we do harm practicing physician and acclaimed author danielle ofri places the issues of medical error and patient safety front and center in our national healthcare conversation drawing on current research professional experience and extensive interviews with nurses physicians administrators researchers patients and families dr ofri explores the diagnostic systemic and cognitive causes of medical error she advocates for strategic use of concrete safety interventions such as checklists and improvements to the electronic medical record but focuses on the full scale cultural and cognitive shifts required to make a meaningful dent in medical error woven throughout the book are the powerfully human stories that dr ofri is renowned for the errors she dissects range from the hardly noticeable missteps to the harrowing medical cataclysms while our healthcare system is and always will be imperfect dr ofri argues that it is possible to minimize preventable harms and that this should be the galvanizing issue of current medical discourse medical error is a leading problem of health care in the united states each year more patients die as a result of medical mistakes than are killed by motor vehicle accidents breast cancer or aids while most government and regulatory efforts are directed toward reducing and preventing errors the actions that should follow the injury or death of a patient are still hotly debated according to nancy berlinger conversations on patient safety are missing several important components religious voices traditions and models in after harm berlinger draws on sources in theology ethics religion and culture to create a practical and comprehensive approach to addressing the needs of patients families and clinicians affected by medical error she emphasizes the importance of acknowledging fallibility telling the truth confronting feelings of guilt and shame and providing just compensation after harm adds important human dimensions to an issue that has profound consequences for patients and health care providers in the 1990s reported autism cases

among american children began spiking from about 1 in 10 000 in 1987 to a shocking 1 in 166 today this trend coincided with the addition of several new shots to the nation s already crowded vaccination schedule grouped together and given soon after birth or in the early months of infancy most of these shots contained a little known preservative called thimerosal which includes a quantity of the toxin mercury evidence of harm explores the heated controversy over what many parents physicians public officials and educators have called an epidemic of afflicted children following several families david kirby traces their struggle to understand how and why their once healthy kids rapidly descended into silence or disturbed behavior often accompanied by severe physical illness alarmed by the levels of mercury in the vaccine schedule these families sought answers from their doctors from science from pharmaceutical companies that manufacture vaccines and finally from the center for disease control and the food and drug administration to no avail but as they dug deeper the families also found powerful allies in congress and in the small community of physicians and researchers who believe that the rise of autism and other disorders is linked to toxic levels of mercury that accumulate in the systems of some children an important and troubling book evidence of harm reveals both the public and unsung obstacles faced by desperate families who have been opposed by the combined power of the federal government health agencies and pharmaceutical giants from closed meetings of the fda cdc and drug companies to the mysterious rider inserted into the 2002 homeland security bill that would bar thimerosal litigation to open hearings held by congress this book shows a medical establishment determined to deny evidence of harm that might be connected with thimerosal and mercury in vaccines in the end as research is beginning to demonstrate the questions raised by these families have significant implications for all children and for those entrusted to oversee our national health keeping doctors happy and productive requires a thorough understanding of the systemic causes and consequences of physician stress as well as the role of resilience in maintaining a healthy mental state the pressure of making life or death decisions along with those associated with the day to day challenges of doctoring can lead to poor patient care and communication patient dissatisfaction absenteeism reductions in productivity job dissatisfaction and lowered retention this edited volume will provide a comprehensive tool for understanding and promoting physician stress resilience specifically the book has six interrelated objectives that collectively would advance the evidence based understanding of 1 the extent to which physicians experience and suffer from work related stress 2 the various manifestations syndromes and reaction patterns directly caused by work related stress 3 the degree to which physicians are resilient in that they are successful or not successful in coping with these stressors 4 the theories and direct evidence that account for the resilience 5 the programs during and following medical school which help to promote resilience and 6 the agenda for future theory research and intervention efforts for the next generation of physicians maintaining the importance of socio economic issues in devising transitional justice mechanisms this book examines the widespread practice of land grabbing in afghanistan on 3 september 2003 100 armed police officers bulldozed around 30 homes in the sherpur neighborhood of kabul afghanistan evicting over 250 people historically the land was part of the property of the ministry of defense of which a zone was allocated to the ministry s employees who had built homes and had lived there for nearly 30 years after the demolition however the land was distributed among 300 high ranking government officials including ministers deputy ministers governors and other powerful warlords land grabbing in afghanistan has become a widespread practice across the country based on over 50 semi structured interviews with key informants and group discussions with war victims and local experts in kabul the current book examines the relevance of transitional justice discourse and practice in response to this situation following a critical criminological concern with social harm the book maintains that it is not enough to consider a country s political history of violent conflict and the violation of civil and political rights alone rather to decide on appropriate transitional justice mechanisms it is crucial to consider a country s socio economic background and above all the socio economic harm inflicted on people during periods of violent conflict this original and detailed account of the socio economic challenges faced by transitional justice mechanisms will be of interest to those studying and working in this area in law politics development studies and criminology prostitution harm and gender inequality brings together international research exploring the range of

gendered harms to women involved in prostitution and the consequences of growth of the sex industry for global gender relations while there is an increasing amount of research and academic output on prostitution the current focus is often on discussion and critique of policy frameworks and contemporary debates over harm are largely limited to sex trafficking and sexual exploitation of children less attention is paid to questions of how the sex industry perpetuates notions of objectification and male entitlement with respect to sexual access to women's bodies despite being key feminist concerns for several decades this position has become effectively marginalized but the global growth and industrialization of the sex industry requires a return to these questions through exploring gendered inequality and re engaging with an understanding of prostitution as harmful with impacts on the self and body that are experienced as abusive but do not always constitute violence this book introduces a range of research and thinking while also drawing on existing literature to explore the consequences of prostitution for women in the sex industry and wider gender relations these issues are discussed with regard to coercion and recruitment including trafficking notions of male entitlement in accounts of men who buy sex critical interrogations of agency and choice legal and policy frameworks and representations of prostitution in popular culture this practical and accessible book of case studies takes a new look at self harm focusing particularly on the under explored area of hidden self harming behaviour these behaviours may not be immediately identifiable as self harm by counsellors therapists or their clients but maggie turp shows how recognition and understanding of hidden self harm can improve practice with those affected the author begins by discussing extracts from infant observation studies that reflect on the role of maternal care in encouraging the tendency towards self care a series of detailed case studies follows including a client who has a serious eating disorder a client who abuses recreational drugs works excessively to the detriment of his mental and physical health and sustains a series of unconsciously invited accidents and one caught up in self harm by omission who fails to take care and delays seeking vital medical care the clinical accounts highlight the importance of attending to the client as a whole person and of building on the self caring tendency that has prompted him or her to seek help in the form of counselling or psychotherapy written from a psychoanalytic perspective but using straightforward language hidden self harm is a valuable resource for social workers psychologists teachers nurses and lay helpers as well as for counsellors and psychotherapists named a best book of 2021 by real simple from the usa today bestselling author of behind every lie and the night olivia fell comes an unforgettable and heart wrenching novel about the lengths one woman will go to save her son emma loves her life she's the mother of a precocious kindergartener married to her soulmate a loyal and loving police detective and has a rewarding career as a doctor at the local hospital but everything comes crashing down when her son josh is diagnosed with a rare form of cancer determined to save him emma makes the risky decision to sell opioids to fund the life saving treatment he needs but when somebody ends up dead a lethal game of cat and mouse ensues her own husband leading the chase with her son's life hanging in the balance emma is dragged into the dark world of drugs lies and murder will the truth catch up to her before she can save josh a timely and moving exploration of a town gripped by the opioid epidemic and featuring christina mcdonald's signature complex emotionally intense publishers weekly prose do no harm examines whether the ends ever justify the means even for a desperate mother a clever and addictive thriller from the bestselling author of the handmaid's tale and the testaments rennie wilford is a young journalist running from her life when she takes an assignment to a caribbean island she tumbles into a world where no one is quite what they seem least of all yankee paul is paul a drug smuggler a cia operative either way he's trouble and his offer to rennie of a no hooks no strings affair will suddenly draw her into in a lethal web of corruption as swift moving as the best thriller clipped and laconic yet deeply and richly sensitive sunday telegraph this work is aimed at those caught somewhere in the middle between those for whom only heterosexual and monogamous marriage or anything goes are paradigms of suitable behaviour and intimate relationships ethicist and christian marie fortune explores what it means to be in an intimate relationship today surrounded as we are by domestic violence and continued silencing of women's voices epub and pdf available open access under cc by nc nd licence labour exploitation is a highly topical though complex issue that has international resonance for those concerned with social justice and social welfare but there is a lack of research available about it this book

part of the studies in social harm series is the first to look at labour exploitation from a social harm perspective arguing that as a global social problem it should be located within the broader study of work based harm written by an expert in policy orientated research he critiques existing approaches to the study of workplace exploitation abuse and forced labour mapping out a new sub discipline this innovative book aims to shift power from employers to workers to reduce levels of labour exploitation and work based harm it is relevant to academics from many fields as well as legislators policy makers politicians employers union officials activists and consumers a significant number of antipsychotic medications are being surreptitiously administered off label to residents suffering from dementia in a seniors home a local physician comes under suspicion as hospital staff and police investigate the incidents maggie keiller principal of the local high school and her husband derek sloan become involved when one of her students a patient of that same physician dies of a drug overdose while in hospital as she probes further maggie and the physician are both targeted by someone unknown who sabotages their cars to explode when the engine is started both narrowly escape a horrifying death but another person is not so fortunate as events hurtle toward a climax maggie and derek face increasing danger not knowing who the true culprit is when the deranged killer makes a final frenzied attempt on her life maggie is caught totally off guard this riveting thriller closely examines the primary duty of every doctor first do no harm july 9 1947 roswell new mexico a young boy tags along with his father to the roswell army air field and witnesses something he was not to see or know about until fifty three years later august 5 2000 garden plains kansas a massive alien craft is spotted hovering by local citizens and darts off to the northwest somewhere in colorado where it starts to tailgate commercial flight 311 on its way to oklahoma city three f 15 aircrafts are scrambling to intercept and investigate this unknown intruder the alien craft darts off to the southeast and the three f 15s give pursuit of the unknown intruder the alien craft is able to lose the f 15s in a thunderstorm near roswell and history repeats itself some fifty three years later don t let your thoughts and fears define you in overcoming harm ocd psychotherapist jon hershfield offers powerful cognitive behavioral therapy cbt and mindfulness tools to help you break free from the pain and self doubt caused by harm ocd do you suffer from violent unwanted thoughts and a crippling fear of harming others are you afraid to seek treatment for fear of being judged if so you may have harm ocd an anxiety disorder associated with obsessive compulsive disorder ocd first and foremost you need to know that these thoughts do not define you as a human being but they can cause a lot of real emotional pain so how can you overcome harm ocd and start living a better life written by an expert in treating harm ocd this much needed book offers a direct and comprehensive explanation of what harm ocd is and how to manage it you ll learn why you have unwanted thoughts how to identify mental compulsions and find an overview of cognitive behavioral and mindfulness based treatment approaches that can help you reclaim your life you ll also find tips for disclosing violent obsessions finding adequate professional help and working with loved ones to address harm ocd systemically and finally you ll learn that your thoughts are just thoughts and that they don t make you a bad person if you have harm ocd it s time to move past the stigma and start focusing on solutions this evidence based guide will help light the way

harm is the perfect combination of action mystery and intrigue it also features some superbly constructed characters who develop over the course of the story which is a rarity in mystery novels benjamin maio mackay actor go and buy it quick it is very filmic and very taut this book will do you harm because you won't want to do anything else but sit down and get to the next bit fast fabulous celia imrie actress bridget jones diary calendar girls the best exotic marigold hotel

What Determines Harm from Addictive Substances and Behaviours? 2016-02-04 the multifaceted nature of harmful substance use and gambling requires interdisciplinary analysis to assess the underlying causes what determines harm from addictive substances and behaviours draws together evidence from twelve disciplines including anthropology genetics neurobiology and public policy using a developmental approach the book presents evidence on the factors that influence the development of harmful substance use and gambling the determinants of harm operate at three levels molecular individual and social this book brings to light the complex interplay between them and presents the scientific social economic political and psychological influences of harmful substance use and gambling these individual determinants are then synthesised into an integrative heuristic model to encourage new ways of thinking the findings from this analysis are used to elaborate key general implications for health and broader social policy clinical practice and future research what determines harm from addictive substances and behaviours is based on research from alice rap a multidisciplinary european study of addictive substances and behaviours in contemporary society this is an essential resource for public health professionals stakeholders influencing policy for addictive substances and behaviours students and academics looking to better understand the factors influencing substance use and gambling and the implications this research has for addiction prevention policy

Reckoning with Harm 2023-10-17 an ethnography of the ecuadorian amazon that demonstrates the need for a relational place based contingent understanding of harm and toxicity reckoning with harm is a striking ethnographic analysis of the harm resulting from oil extraction covering fifty years of settler colonization and industrial transformation of the ecuadorian amazon amelia fiske interrogates the relations of harm she moves between forest courtrooms and oily waste pits farms and toxic tours to explore both the ways in which harm from oil is entangled with daily life and the tensions surrounding efforts to verify and redress it in practice attempts to address harm from the oil industry in ecuador have been consistently confounded by narrow technocratic understandings of evidence toxicity and responsibility building on collaborators work to contest state and oil company insistence that harm is controlled and principally chemical in nature fiske shows that it is necessary to refigure harm as relational in order to reckon with unremediated contamination of the past while pushing for broad forms of accountability in the present she theorizes that harm is both a relationship and an animating feature of relationships in this place a contingent understanding that is needed to contemplate what comes next when living in a toxic world

Promises, Pedagogy and Pitfalls: Empathy's Potential for Healing and Harm 2019-07-22 this volume explores empathy's potential for healing and harm and its potency to effect change for good or ill at inter personal ecological and global levels

The Ends of Harm 2011-09-15 how can the brutal and costly enterprise of criminal punishment be justified this book makes a provocative original contribution to the philosophical literature and debate on the morality of punishing arguing that punishment is justified in the duties that offenders incur as a result of their wrongdoing

The Parent's Guide to Self-Harm 2012-10-10 the first book on self harm written for parents by parents are you concerned that your child may be self harming are you wondering what to do for the best do you need more information and help if so this is the book for you an ever increasing number of young people are turning to self harm in order to cope with the pressures of modern living and this poses a huge problem for parents and others who care for them this book provides the answers you need to questions such as how do i know for sure whether my child is self harming how should i approach my child what help and treatment is available to us what can i do to help my child how have other parents coped full of the real life experiences of other parents who have been there this is a practical book that will both inform and equip you to help your child and yourself through this difficult time

Understanding and Responding to Self-Harm 2019-06-06 self harm is increasingly prevalent in our society but few of us understand why or know what to do to help ourselves friends or family in such situations it can be very isolating understanding and responding to self harm aims to fill this gap providing practical information and advice for anyone who has an experience of self harm showing the various forms self harm can take this book explores the reasons behind it and offers advice on self management support to others and what services are available full of clear thoughtful advice for those who may be thinking of harming themselves or have already done so as well as guidance for families and friends on helpful strategies and responses and ones to avoid it uses evidence from research and direct experience to provide an essential resource

The Aesthetics of Self-Harm 2018-05-11 the aesthetics of self harm presents a new approach to understanding parasuicidal behaviour based upon an examination of online communities that promote performances of self harm in the pursuit of an idealised beauty the book considers how online communities provide a significant level of support for self harmers and focuses on relevant case studies to establish a new model for the comprehension of the online supportive community to do so alderton explores discussions of self harm and disordered eating on social networks she examines aesthetic trends that contextualise harmful behavior and help people to perform feelings of sadness and vulnerability online alderton argues that the traditional understanding of self violence through medical discourse is important but that it misses vital elements of human group activity and the motivating forces of visual imagery covering psychiatry and psychology rhetoric and sociology this book provides essential reading for psychologists sociologists and anthropologists exploring group dynamics and ritual and rhetoricians who are concerned with the communicative powers of images it should also be of great interest to medical professionals dealing with self harming patients

Someone Always Tries to Harm Me 2019-12-18 due to the sudden movement in the backstage su xiaoxiao had entered into the book that she had written however who could tell her that the direction of the story was different from what she had expected the male lead wanted to be with the female lead so he wanted to get rid of her the male partner wanted to become the male lead so he wanted to get rid of her in order to keep her position the female lead wanted to get rid of her wait you re all made by me and you re even defying the heavens will there will always be people who want to harm me since this is the case i will take care of all of you one by one

When We Do Harm 2020-03-23 medical mistakes are more pervasive than we think how can we improve outcomes an acclaimed md s rich stories and research explore patient safety patients enter the medical system with faith that they will receive the best care possible so when things go wrong it s a profound and painful breach medical science has made enormous strides in decreasing mortality and suffering but there s no doubt that treatment can also cause harm a significant portion of which is preventable in when we do harm practicing physician and acclaimed author danielle ofri places the issues of medical error and patient safety front and center in our national healthcare conversation drawing on current research professional experience and extensive interviews with nurses physicians administrators researchers patients and families dr ofri explores the diagnostic systemic and cognitive causes of medical error she advocates for strategic use of concrete safety interventions such as checklists and improvements to the electronic medical record but focuses on the full scale cultural and cognitive shifts required to make a meaningful dent in medical error woven throughout the book are the powerfully human stories that dr ofri is renowned for the errors she dissects range from the hardly noticeable missteps to the harrowing medical cataclysms while our healthcare system is and always will be imperfect dr ofri argues

that it is possible to minimize preventable harms and that this should be the galvanizing issue of current medical discourse

After Harm 2005-07 medical error is a leading problem of health care in the united states each year more patients die as a result of medical mistakes than are killed by motor vehicle accidents breast cancer or aids while most government and regulatory efforts are directed toward reducing and preventing errors the actions that should follow the injury or death of a patient are still hotly debated according to nancy berlinger conversations on patient safety are missing several important components religious voices traditions and models in after harm berlinger draws on sources in theology ethics religion and culture to create a practical and comprehensive approach to addressing the needs of patients families and clinicians affected by medical error she emphasizes the importance of acknowledging fallibility telling the truth confronting feelings of guilt and shame and providing just compensation after harm adds important human dimensions to an issue that has profound consequences for patients and health care providers

Pros and Cons of Drug Legalization, Decriminalization, and Harm Reduction 2000 in the 1990s reported autism cases among american children began spiking from about 1 in 10 000 in 1987 to a shocking 1 in 166 today this trend coincided with the addition of several new shots to the nation s already crowded vaccination schedule grouped together and given soon after birth or in the early months of infancy most of these shots contained a little known preservative called thimerosal which includes a quantity of the toxin mercury evidence of harm explores the heated controversy over what many parents physicians public officials and educators have called an epidemic of afflicted children following several families david kirby traces their struggle to understand how and why their once healthy kids rapidly descended into silence or disturbed behavior often accompanied by severe physical illness alarmed by the levels of mercury in the vaccine schedule these families sought answers from their doctors from science from pharmaceutical companies that manufacture vaccines and finally from the center for disease control and the food and drug administration to no avail but as they dug deeper the families also found powerful allies in congress and in the small community of physicians and researchers who believe that the rise of autism and other disorders is linked to toxic levels of mercury that accumulate in the systems of some children an important and troubling book evidence of harm reveals both the public and unsung obstacles faced by desperate families who have been opposed by the combined power of the federal government health agencies and pharmaceutical giants from closed meetings of the fda cdc and drug companies to the mysterious rider inserted into the 2002 homeland security bill that would bar thimerosal litigation to open hearings held by congress this book shows a medical establishment determined to deny evidence of harm that might be connected with thimerosal and mercury in vaccines in the end as research is beginning to demonstrate the questions raised by these families have significant implications for all children and for those entrusted to oversee our national health

Evidence of Harm 2007-04-01 keeping doctors happy and productive requires a thorough understanding of the systemic causes and consequences of physician stress as well as the role of resilience in maintaining a healthy mental state the pressure of making life or death decisions along with those associated with the day to day challenges of doctoring can lead to poor patient care and communication patient dissatisfaction absenteeism reductions in productivity job dissatisfaction and lowered retention this edited volume will provide a comprehensive tool for understanding and promoting physician stress resilience specifically the book has six interrelated objectives that collectively would advance the evidence based understanding of 1 the extent to which physicians experience and suffer from work related stress 2 the various manifestations syndromes and reaction patterns directly caused by work related stress 3 the degree to which physicians are resilient in that they are successful or not successful in coping with these stressors 4 the theories and direct evidence that account for the resilience 5 the programs during and following medical school which help to promote resilience and 6 the agenda for future theory research and intervention efforts for the next generation of physicians

First Do No Self Harm 2013-08-05 maintaining the importance of socio economic issues in devising transitional justice mechanisms this book examines the widespread practice of land grabbing in afghanistan on 3 september 2003 100 armed police officers bulldozed around 30 homes in the sherpur neighborhood of kabul afghanistan evicting over 250

people historically the land was part of the property of the ministry of defense of which a zone was allocated to the ministry's employees who had built homes and had lived there for nearly 30 years after the demolition however the land was distributed among 300 high ranking government officials including ministers deputy ministers governors and other powerful warlords land grabbing in afghanistan has become a widespread practice across the country based on over 50 semi structured interviews with key informants and group discussions with war victims and local experts in kabul the current book examines the relevance of transitional justice discourse and practice in response to this situation following a critical criminological concern with social harm the book maintains that it is not enough to consider a country's political history of violent conflict and the violation of civil and political rights alone rather to decide on appropriate transitional justice mechanisms it is crucial to consider a country's socio economic background and above all the socio economic harm inflicted on people during periods of violent conflict this original and detailed account of the socio economic challenges faced by transitional justice mechanisms will be of interest to those studying and working in this area in law politics development studies and criminology

Transitional Justice and Socio-Economic Harm 2022-09-19 prostitution harm and gender inequality brings together international research exploring the range of gendered harms to women involved in prostitution and the consequences of growth of the sex industry for global gender relations while there is an increasing amount of research and academic output on prostitution the current focus is often on discussion and critique of policy frameworks and contemporary debates over harm are largely limited to sex trafficking and sexual exploitation of children less attention is paid to questions of how the sex industry perpetuates notions of objectification and male entitlement with respect to sexual access to women's bodies despite being key feminist concerns for several decades this position has become effectively marginalized but the global growth and industrialization of the sex industry requires a return to these questions through exploring gendered inequality and re engaging with an understanding of prostitution as harmful with impacts on the self and body that are experienced as abusive but do not always constitute violence this book introduces a range of research and thinking while also drawing on existing literature to explore the consequences of prostitution for women in the sex industry and wider gender relations these issues are discussed with regard to coercion and recruitment including trafficking notions of male entitlement in accounts of men who buy sex critical interrogations of agency and choice legal and policy frameworks and representations of prostitution in popular culture

Tortious Liability for Unintentional Harm in the Common Law and the Civil Law: Volume 1, Text 1982-09-16 this practical and accessible book of case studies takes a new look at self harm focusing particularly on the under explored area of hidden self harming behaviour these behaviours may not be immediately identifiable as self harm by counsellors therapists or their clients but maggie turp shows how recognition and understanding of hidden self harm can improve practice with those affected the author begins by discussing extracts from infant observation studies that reflect on the role of maternal care in encouraging the tendency towards self care a series of detailed case studies follows including a client who has a serious eating disorder a client who abuses recreational drugs works excessively to the detriment of his mental and physical health and sustains a series of unconsciously invited accidents and one caught up in self harm by omission who fails to take care and delays seeking vital medical care the clinical accounts highlight the importance of attending to the client as a whole person and of building on the self caring tendency that has prompted him or her to seek help in the form of counselling or psychotherapy written from a psychoanalytic perspective but using straightforward language hidden self harm is a valuable resource for social workers psychologists teachers nurses and lay helpers as well as for counsellors and psychotherapists

Prostitution, Harm and Gender Inequality 2013-01-28 named a best book of 2021 by real simple from the usa today bestselling author of behind every lie and the night olivia fell comes an unforgettable and heart wrenching novel about the lengths one woman will go to save her son emma loves her life she's the mother of a precocious kindergartener married to her soulmate a loyal and loving police detective and has a rewarding career as a doctor at the local hospital but everything comes crashing down when her son josh is diagnosed with a rare form of cancer determined to save him emma makes the risky

decision to sell opioids to fund the life saving treatment he needs but when somebody ends up dead a lethal game of cat and mouse ensues her own husband leading the chase with her son's life hanging in the balance emma is dragged into the dark world of drugs lies and murder will the truth catch up to her before she can save josh a timely and moving exploration of a town gripped by the opioid epidemic and featuring christina mcdonald's signature complex emotionally intense publishers weekly prose do no harm examines whether the ends ever justify the means even for a desperate mother

Hidden Self-Harm 2002-11-10 a clever and addictive thriller from the bestselling author of the handmaid's tale and the testaments rennie wilford is a young journalist running from her life when she takes an assignment to a caribbean island she tumbles into a world where no one is quite what they seem least of all yankee paul a drug smuggler a cia operative either way he's trouble and his offer to rennie of a no hooks no strings affair will suddenly draw her into in a lethal web of corruption as swift moving as the best thriller clipped and laconic yet deeply and richly sensitive sunday telegraph

A Midsummer Madness 1884 this work is aimed at those caught somewhere in the middle between those for whom only heterosexual and monogamous marriage or anything goes are paradigms of suitable behaviour and intimate relationships ethicist and christian marie fortune explores what it means to be in an intimate relationship today surrounded as we are by domestic violence and continued silencing of women's voices

Do No Harm 2021-02-16 epub and epdf available open access under cc by nc nd licence labour exploitation is a highly topical though complex issue that has international resonance for those concerned with social justice and social welfare but there is a lack of research available about it this book part of the studies in social harm series is the first to look at labour exploitation from a social harm perspective arguing that as a global social problem it should be located within the broader study of work based harm written by an expert in policy orientated research he critiques existing approaches to the study of workplace exploitation abuse and forced labour mapping out a new sub discipline this innovative book aims to shift power from employers to workers to reduce levels of labour exploitation and work based harm it is relevant to academics from many fields as well as legislators policy makers politicians employers union officials activists and consumers

Bodily Harm 2012-05-15 a significant number of antipsychotic medications are being surreptitiously administered off label to residents suffering from dementia in a seniors home a local physician comes under suspicion as hospital staff and police investigate the incidents maggie keiller principal of the local high school and her husband derek sloan become involved when one of her students a patient of that same physician dies of a drug overdose while in hospital as she probes further maggie and the physician are both targeted by someone unknown who sabotages their cars to explode when the engine is started both narrowly escape a horrifying death but another person is not so fortunate as events hurtle toward a climax maggie and derek face increasing danger not knowing who the true culprit is when the deranged killer makes a final frenzied attempt on her life maggie is caught totally off guard this riveting thriller closely examines the primary duty of every doctor first do no harm

In Harm's Way 2001-03 july 9 1947 roswell new mexico a young boy tags along with his father to the roswell army air field and witnesses something he was not to see or know about until fifty three years later august 5 2000 garden plains kansas a massive alien craft is spotted hovering by local citizens and darts off to the northwest somewhere in colorado where it starts to tailgate commercial flight 311 on its way to oklahoma city three f 15 aircrafts are scrambling to intercept and investigate this unknown intruder the alien craft darts off to the southeast and the three f 15s give pursuit of the unknown intruder the alien craft is able to lose the f 15s in a thunderstorm near roswell and history repeats itself some fifty three years later
