mainstream health science has let you down weight loss is not the key to health diet and exercise are not effective weight loss strategies and fatness is not a death sentence you ve heard it before there s a global health crisis and unless we make some changes we re in trouble that much is true but the epidemic is not obesity the real crisis lies in the toxic stigma placed on certain bodies and the impact of living with inequality not the numbers on a scale in a mad dash to shrink our bodies many of us get so caught up in searching for the perfect diet exercise program or surgical technique that we lose sight of our original goal improved health and well being popular methods for weight loss don t get us there and lead many people to feel like failures when they can t match unattainable body standards it s time for a cease fire in the war against obesity dr linda bacon and dr lucy aphramor s body respect debunks common myths about weight including the misconceptions that bmi can accurately measure health that fatness necessarily leads to disease and that dieting will improve health they also help make sense of how poverty and oppression such as racism homophobia and classism affect life opportunity self worth and even influence metabolism body insecurity is rampant and it doesn t have to be it s time to overcome our culture s shame and distress about weight to get real about inequalities and health and to show every body respect

The Medical Advisor 1997

Complete Family Health Guide New Medicine 2005

the principles of health reform are actually simple but remain formidable due to the size and complexity of the necessary implementation the purpose of this book in this era of health reform is to educate and offer potential solutions that represent an actual overhaul of the existing health care system based on core level principles and values people and principles before profits and paperwork founded on the hippocratic oath do no harm the book integrates a health reform model that incorporates health wellness and prevention into the current illness delivery model predicted to bankrupt the u s economy faster than any other sector without massive reform hence the urgency for widespread

education on these vital reform principles before it is too late

Total Health 1999

Impaired Health ; Its Cause and Cure 1921

Incisively written this new edition of a popular guide first published in 1996 slices through the rhetoric of health promotion its penetrating analysis quickly reveals health promotion's conceptual roots providing an enlightening map of their web of theory and practice David Seedhouse proves that health promotion a discipline intended to improve the health of a population is prejudiced every plan and every project stems first from human values and argues that only by acknowledging this will a mature discipline emerge to help speed progress the author proposes a positive practical theory of health promotion destined to inspire anyone who wishes to create better health this new edition includes three new chapters on conventional health promotion radical and foundational health promotion and mental health promotion providing examples of the use of foundational health promotion this new edition also adds five new teaching exercises incorporates and updates the guide for teachers and lecturers and includes a new topical case study this book is laced with entertaining dialogues and readers are encouraged to explore ten carefully presented exercises educational accessible and intelligent health promotion philosophy prejudice and practice 2nd edition is a seminal work which heralds the beginning of the end of health promotion's long adolescence it is nothing less than essential reading for all practitioners and students of health promotion

New Medicine 2007

the complementary therapist's guide to conventional medicine is a unique textbook for students and practitioners of complementary medicine offering a systematic comparative approach to western and eastern medicine practitioners of complementary medicine increasingly find themselves working alongside conventionally trained doctors and nurses and it is vital for them to develop a core understanding of conventional medical language and philosophy the book is designed as a guide to understanding conventional medical diagnoses symptoms and treatments whilst also encouraging the reader to reflect on and translate how these diagnoses may be interpreted from a more holistic medical perspective throughout the text the practitioner student is encouraged to see that conventional and more holistic interpretations are not necessarily contradictory but instead are simply two different approaches to interpreting the same truth that truth being the patient's symptoms after introductory sections on physiology pathology and pharmacology there follow sections devoted to each of the physiological systems of the body in these the physiology of each system is explored together with the medical investigation symptoms and treatments of the important diseases which might affect that system as each disease is described the reader is encouraged to consider the corresponding chinese medical perspective the textbook concludes with chapters relating specifically to dealing with patients in practice in particular these focus on warning signs of serious disease supporting patients on medication and ethical issues which may arise from management of patients which is shared with conventional practitioners the book also offers a detailed summary of red flag symptoms which are those which should be referred for western medical investigation or emergency medical treatment and also a guide to how patients can be safely supported in withdrawing from conventional medication when this is clinically appropriate those wishing to use the text for systematic study can make use of the question and problem solving approach offered on the accompanying cd to which references to self study exercises appear at regular stages throughout the book this means that the text can be easily adapted to form the basis of a study course in clinical medicine for students of complementary medicine in addition to the self testing questions and answers the supporting cd also contains checklists for revision and full colour illustrations about the author clare stephenson is a qualified medical practitioner who worked in hospital medicine general practice and public health medicine for a number of years before training in traditional chinese medicine tcm and acupuncture over the course of a decade she developed and taught an undergraduate course for students of chinese medicine on western medicine and how it relates to tcm she is particularly committed to encouraging communication and understanding between practitioners of different health disciplines she currently works as a gp in oxfordshire

Exposing the Dangers and True Motivations of Conventional Medicine: A Summary of the Most Commonly Misdiagnosed Illnesses of Modern Medicine 2015-02-03

according to dr larry malerba modern medicine has perfected the short term technical repair of the physical body at the expense of the long term psychological and spiritual well being of the whole person in green medicine he examines this issue and provides a realistic blueprint for wellness and a valuable guide for those seeking deeper and more lasting healing written in an accessible style the book draws on a rich range of fields physics philosophy jungian thought shamanism alchemy eastern thought western esotericism sustainability orthodox medicine to create a green medical paradigm that represents a powerful integrative medical perspective dr malerba interweaves case histories from

his own practice with innovative concepts from alternative and western medicine in order to address a number of crucial questions what are the personal and environmental costs to the overuse of pharmaceutical drugs is conventional medicine as scientific as it claims to be how can conventional doctors and alternative healers begin to work together how can individuals transform medicine and become participants in their own healthcare green medicine offers a practical and philosophical basis for building a viable green alternative that draws on the inherent unity of body heart mind soul and nature
