rapidly changing societies one is the mechanism of  
unfettered social morphogenesis and the other is  
the specific kind of societal unification brought  
about by globalization with the related closure of  
the world the book draws on the theoretical work  
produced in the five volumes of the springer  
series social morphogenesis and applies it in a  
sustained and concerted approach to the empirical  
examination of macro social change the first part  
of the book presents the social ontology of the  
morphogenetic approach and discusses its capacity  
to interpret macrosocial transitions the second  
part then draws a prospective outline of the  
social formation known as the morphogenic society  
showing how unbound morphogenesis in a globalized  
world shapes such crucial phenomena as social  
norms war and violence openness and closure as  
adaptive responses from social organizations  
lastly the third part examines the anthropological  
consequences of these societal trends focusing on  
self and character as well as on human fulfillment  
and the good life
