17th International Conference on Wear of Materials

2009

computer vision has now reached a level of maturity that allows us not only to perform research on individual methods but also to build fully integrated computer vision systems of a signi cant complexity this opens up a number of new problems related to architectures systems integration validation of stems using benchmarking techniques and so on so far the majority of vision conferences have focused on component technologies which has motivated the organization of the first international conference on computer vision systems icvs it is our hope that the conference will allow us not only to see a number of interesting new vision techniques and systems but hopefully also to de ne the research issues that need to be addressed to pave the way for more wide scale use of computer vision in a diverse set of real world applications icvs is organized as a single track conference consisting of high quality p viously unpublished contributed papers on new and original research on c puter vision systems all contributions will be presented orally a total of 65 papers were submitted for consideration by the conference all papers were viewed by three reviewers from the program committee thirty two of the papers were selected for presentation icvs 99 is being held at the alfredo kraus auditorium and convention centre in las palmas on the lovely canary islands spain the setting is spri like which seems only appropriate as the basis for a new conference

Computer Vision Systems

computer vision has now reached a level of maturity that allows us not only to perform research on individual methods but also to build fully integrated computer vision systems of a signi cant complexity this opens up a number of new problems related to architectures systems integration validation of stems using benchmarking techniques and so on so far the majority of vision conferences have focused on component technologies which has motivated the organization of the first international conference on computer vision systems icvs it is our hope that the conference will allow us not only to see a number of interesting new vision techniques and systems but hopefully also to de ne the research issues that need to be addressed to pave the way for more wide scale use of computer vision in a diverse set of real world applications icvs is organized as a single track conference consisting of high quality p viously unpublished contributed papers on new and original research on c puter vision systems all contributions will be presented orally a total of 65 papers were submitted for consideration by the conference all papers were viewed by three reviewers from the program committee thirty two of the papers were selected for presentation icvs 99 is being held at the alfredo kraus auditorium and convention centre in las palmas on the lovely canary islands spain the setting is spri like which seems only appropriate as the basis for a new conference

Computer Vision Systems

1998-12-18

this book constitutes the refereed proceedings of the 18th international conference on computer aided systems theory eurocast 2022 held in las palmas de gran canaria spain during february 20 25 2022 the 77 full papers included in this book were carefully reviewed and selected from 110 submissions they were organized in topical sections as follows systems theory and applications theory and applications of metaheuristic algorithms model based system design verification and simulation applications of signal processing technology artificial intelligence and data mining for intelligent transportation systems and smart mobility computer vision machine learning for image analysis and applications computer and systems based methods and electronic technologies in medicine systems in industrial robotics automation and iot systems thinking relevance for technology science and management professionals

Fourth International Conference of American States

1911

the two volume set lncs 12013 and 12014 constitutes the thoroughly refereed proceedings of the 17th international conference on computer aided systems theory eurocast 2019 held in las palmas de gran canaria spain in february 2019 the 123 full papers presented were carefully reviewed and selected from 172 submissions the papers are organized in the following topical sections part i systems theory and applications pioneers and landmarks in the development of information and communication technologies stochastic models and applications to natural social and technical systems theory and applications of metaheuristic algorithms model based system design verification and simulation part ii applications of signal processing technology artificial intelligence and data mining for intelligent transportation systems and smart mobility computer vision machine learning for image analysis and applications computer and systems based methods and electronic technologies in medicine advances in biomedical signal and image processing systems concepts and methods in touristic flows systems in industrial robotics automation and iot

Computer Aided Systems Theory – EUROCAST 2022

2023-02-09

this volume presents a collection of peer reviewed scientific articles from the 14th international conference on information technology new generations held at the university of nevada at las vegas on april 10 12 at tuscany suites hotel in las vegas the book of chapters addresses critical areas of information technology including web technology communications computing architectures software engineering security and data mining

Computer Aided Systems Theory – EUROCAST 2019

2020-04-15

this book collects articles presented at the 13th international conference on information technology new generations april 2016 in las vegas nv usa it includes over 100 chapters on critical areas of it including technology communications security and data mining

Information Technology – New Generations

2017-07-15

this volume presents a collection of peer reviewed scientific articles from the 15th international conference on information technology new generations held at las vegas the collection addresses critical areas of machine learning networking and wireless communications cybersecurity data mining software engineering high performance computing architectures computer vision health bioinformatics and education

Proceedings of the Tenth IASTED International Conference, Parallel and Distributed Computing and Systems, Las Vegas, Nevada, USA, October 28–31, 1998

1998

the two volume set lncs 12013 and 12014 constitutes the thoroughly refereed proceedings of the 17th international conference on computer aided systems theory eurocast 2019 held in las palmas de gran canaria spain in february 2019 the 123 full papers presented were carefully reviewed and selected from 172 submissions the papers are organized in the following topical sections part i systems theory and applications pioneers and landmarks in the development of information and communication technologies stochastic models and applications to natural social and technical systems theory and applications of metaheuristic algorithms model based system design verification and simulation part ii applications of signal processing technology artificial intelligence and data mining for intelligent transportation systems and smart mobility computer vision machine learning for image analysis and applications computer and systems based methods and electronic technologies in medicine advances in biomedical signal and image processing systems concepts and methods in touristic flows systems in industrial robotics automation and iot

Proceedings of the IASTED International Conference, Software Engineering and Applications, November 6-9, 2000, Las Vegas, Nevada, USA

2000

a landmark in lascasian scholarship the work of seventeen scholars contributions span the fields of history latin american studies literary criticism philosophy and theology

Second International Conference of American States

1902

the united nations disarmament yearbook volume 42 part ii 2017 with a foreword by the high representative for disarmament affairs summarizes developments and trends in 2017 on key issues of multilateral consideration at the international and regional levels reviews the activity of the general assembly the conference on disarmament and the disarmament commission and contains a handy timeline of highlights of multilateral disarmament in 2017

Information Technology: New Generations

2016-03-28

this volume constitutes the papers presented at the 15th international conference on computer aided systems theory eurocast 2015 held in february 2015 in las palmas de gran canaria spain the total of 107 papers presented were carefully reviewed and selected for inclusion in the book the contributions are organized in topical sections on systems theory and applications modelling biological systems intelligent information processing theory and applications of metaheuristic algorithms computer methods virtual reality and image processing for clinical and academic medicine signals and systems in electronics model based system design verification and simulation digital signal processing methods and applications modelling and control of robots mobile platforms autonomous and computing traffic systems cloud and other computing systems and marine sensors and manipulators

Information Technology - New Generations

2018-04-12

the two volume set lncs 10671 and 10672 constitutes the thoroughly refereed proceedings of the 16th international conference on computer aided systems theory eurocast 2017 held in las palmas de gran canaria spain in february 2017 the 117 full papers presented were carefully reviewed and selected from 160 submissions the papers are

organized in topical sections on pioneers and landmarks in the development of information and communication technologies systems theory socio economic systems and applications theory and applications of metaheuristic algorithms stochastic models and applications to natural social and technical systems model based system design verification and simulation applications of signal processing technology algebraic and combinatorial methods in signal and pattern analysis computer vision deep learning and applications computer and systems based methods and electronics technologies in medicine intelligent transportation systems and smart mobility

Computer Aided Systems Theory – EUROCAST 2019

2020-04-15

the two volume proceedings lncs 6927 and lncs 6928 constitute the papers presented at the 13th international conference on computer aided systems theory eurocast 2011 held in february 2011 in las palmas de gran canaria spain the total of 160 papers presented were carefully reviewed and selected for inclusion in the books the contributions are organized in topical sections on concepts and formal tools software applications computation and simulation in modelling biological systems intelligent information processing heurist problem solving computer aided systems optimization model based system design simulation and verification computer vision and image processing modelling and control of mechatronic systems biomimetic software systems computer based methods for clinical and academic medicine modeling and design of complex digital systems mobile and autonomous transportation systems traffic behaviour modelling and optimization mobile computing platforms and technologies and engineering systems applications

Bartolomé de las Casas, O.P.

2018-12-10

the two volume set lncs 8111 and lncs 8112 constitute the papers presented at the 14th international conference on computer aided systems theory eurocast 2013 held in february 2013 in las palmas de gran canaria spain the total of 131 papers presented were carefully reviewed and selected for inclusion in the books the contributions are organized in topical sections on modelling biological systems systems theory and applications intelligent information processing theory and applications of metaheuristic algorithms model based system design verification and simulation process modeling simulation and system optimization mobile and autonomous transportation systems computer vision sensing image processing and medical applications computer based methods and virtual reality for clinical and academic medicine digital signal processing methods and applications mechatronic systems robotics and marine robots mobile computing platforms and technologies systems applications

Anuario de las Naciones Unidas sobre desarme 2017: parte II

2020-03-18

the two volume set lncs 10671 and 10672 constitutes the thoroughly refereed proceedings of the 16th international conference on computer aided systems theory eurocast 2017 held in las palmas de gran canaria spain in february 2017 the 117 full papers presented were carefully reviewed and selected from 160 submissions the papers are organized in topical sections on pioneers and landmarks in the development of information and communication technologies systems theory socio economic systems and applications theory and applications of metaheuristic algorithms stochastic models and applications to natural social and technical systems model based system design verification and simulation applications of signal processing technology algebraic and combinatorial methods in signal and pattern analysis computer vision deep learning and applications computer and systems based methods and electronics technologies in medicine intelligent transportation systems and smart mobility

Computer Aided Systems Theory - EUROCAST 2009

2009-10-08

this book constitutes the refereed proceedings of the 5th international conference on hci in business government and organizations hcibgo 2018 held as part of the 20th international conference on human computer interaction hcii 2018 in las vegas nv usa the 1171 full papers and 160 posters presented at the 14 co located hcii 2018 conferences were carefully reviewed and selected from a total of 4346 submissions the papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems the papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas the papers included in this volume cover the following topics information systems in business electronic commerce and consumer behavior social media and social communities in business social innovation and business analytics and visualization

Computer Aided Systems Theory -- EUROCAST 2013

2013-12-12

this two volume set lncs 10924 and 10925 constitute the refereed proceedings of the 5th international conference on learning and collaboration technologies lct 2018 held as part of the 20th international conference on human computer interaction hcii 2018 in las vegas nv usa in july 2018 the 1171 papers presented at hcii 2018 conferences were carefully reviewed and selected from 4346 submissions the papers cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of applications areas the papers in this volume are organized in the following topical sections designing and evaluating systems and applications technological innovation in education learning and collaboration learners engagement motification and skills games and gamification of learning technology enhanced teaching and assessment computing and engineering education

Information Technology and Systems

2019-01-28

the two volume set lncs 12013 and 12014 constitutes the thoroughly refereed proceedings of the 17th international conference on computer aided systems theory eurocast 2019 held in las palmas de gran canaria spain in february 2019 the 123 full papers presented were carefully reviewed and selected from 172 submissions the papers are organized in the following topical sections part i systems theory and applications pioneers and landmarks in the development of information and communication technologies stochastic models and applications to natural social and technical systems theory and applications of metaheuristic algorithms model based system design verification and simulation part ii applications of signal processing technology artificial intelligence and data mining for intelligent transportation systems and smart mobility computer vision machine learning for image analysis and applications computer and systems based methods and electronic technologies in medicine advances in biomedical signal and image processing systems concepts and methods in touristic flows systems in industrial robotics automation and iot

Introduction to Genetic Algorithms

2007-10-24

visual sensors are able to capture a large quantity of information from the environment around them a wide variety of visual systems can be found from the classical monocular systems to omnidirectional rgb d and more sophisticated 3d systems every configuration presents some specific characteristics that make them useful for solving different problems their range of applications is wide and varied including robotics industry agriculture quality control visual inspection surveillance autonomous driving and navigation aid systems in this book several problems that employ visual sensors are presented among them we highlight visual slam image retrieval manipulation calibration object recognition navigation etc

Encyclopedia of Optical Engineering: Abe-Las, pages 1-1024

2003

this book constitutes the refereed proceedings of the 5th international conference on online communities and social computing ocsc 2013 held as part of the 15th international conference on human computer interaction hcii 2013 held in las vegas usa in july 2013 jointly with 12 other thematically similar conferences the total of 1666 papers and 303 posters presented at the hcii 2013 conferences was carefully reviewed and selected from 5210 submissions these papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems the papers accepted for presentation thoroughly cover the entire field of

human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas the total of 49 contributions was carefully reviewed and selected for inclusion in the ocsc proceedings the papers are organized in the following topical sections user behavior and experience in online social communities learning and gaming communities society business and health designing and developing novel online social experiences

HCI in Business, Government, and Organizations

2018-07-09

la proliferación actual de sistemas concurrentes en general debido al abaratamiento sustancial de poderosos sistemas de cómputo y el auge cada vez mayor que toman las aplicaciones distribuidas hace que cada vez sea más interesante el estudio de los sistemas concurrentes en todos los aspectos de la informática la mayor complejidad y tamaño de los secuenciales convencionales exige el uso de técnicas adecuadas tanto para su diseño y análisis como para su posterior implementación práctica este libro contiene las comunicaciones que han sido presentadas en la octava edición de las jornadas de concurrencia celebradas en cuenca en junio de 2000 este es un foro para el intercambio de experiencias entre los investigadores nacionales tanto de la universidad como de la industria en el campo de los sistemas concurrentes y por tanto en él se muestran tanto los resultados teóricos como las aplicaciones industriales más recientes en esta materia
