written by experts and presented in full color your search ends here abundant with practical advice and
ready to use teaching examples this dynamic guide will help both new and experienced instructors of
principles of microeconomics to reconsider and refine their courses mark maier and phil ruder assemble
the wisdom of 25 eminent scholars of economic education on how best to introduce students to the
discipline and inspire a long lasting passion for microeconomics this series is dedicated to serving the
growing community of scholars and practitioners concerned with the principles and applications of environ
mental management each volume is a thorough treatment of a specific topic of importance for proper
management practices a fundamental objective of these books is to help the reader discern and
implement man s stewardship of our environment and the world s renewable re sources for we must strive
to understand the relationship between man and nature act to bring harmony to it and nurture an
environment that is both stable and productive these objectives have often eluded us because the pursuit
of other individual and societal goals has diverted us from a course of living in balance with the
environment at times therefore the environmental manager may have to exert restrictive control which is
usually best applied to man not nature attempts to alter or harness nature have often failed or backfired
as exemplified by the results of imprudent use of herbicides fertilizers water and other agents each book
in this series will shed light on the fundamental and applied aspects of environmental management it is
