maximize performance with better data developing a successful workforce requires more than a gut check data can help guide your decisions on everything from where to seat a team to optimizing production processes to engaging with your employees in ways that ring true to them people analytics is the study of your number one business asset your people and this book shows you how to collect data analyze that data and then apply your findings to create a happier and more engaged workforce start a people analytics project work with qualitative data collect data via communications find the right tools and approach for analyzing data if your organization is ready to better understand why high performers leave why one department has more personnel issues than another and why employees violate people analytics for dummies makes it easier

Panama Canal Treaty Implementation

1979

this book is the outcome of a research symposium sponsored by the association for educational communications and technology aect consisting of twenty four chapters including an introduction and conclusion it argues that informational content should not be the main element of education and that to provide more for learners it is necessary to go beyond content and address other skills and capabilities it also discusses the false premise that learning is complete when the information is known not when learners seek more their own directions answers and ideas the authors assert that the ability to synthesize solve problems and generate ideas is not based on specific content although education often focuses solely on teaching content further they state that content can be separated from the learning process and that instructional design and educational technology must be about the skills habits and beliefs to be learned
