a split edition with the advent of the internet and handheld or wearable media systems that plunge the user into 360o video augmented or virtual reality technology is changing how stories are told and created in this book john v pavlik argues that a new form of mediated communication has emerged experiential news experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual eyewitness in immersive multisensory and interactive narratives pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image he delves into developing forms such as virtual reality haptic technologies interactive documentaries and drone media presenting the principles of how to design and frame a story using these techniques pavlik warns that although experiential news can heighten user engagement and increase understanding it may also fuel the transformation of fake news into artificial realities and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality journalism in the age of virtual reality offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public hollywood s conversion to sound in the 1920s created an early peak in the film musical following the immense success of the jazz singer the opportunity to synchronize moving pictures with a soundtrack suited the musical in particular since the heightened experience of song and dance drew attention to the novelty of the technological development until the near collapse of the genre in the 1960s the film musical enjoyed around thirty years of development as landmarks such as the wizard of oz meet me in st louis singin in the rain and gigi showed the exciting possibilities of putting musicals on the silver screen the oxford handbook of musical theatre screen adaptations traces how the genre of the stage to screen musical has evolved starting with screen adaptations of operettas such as the desert song and rio rita and looks at how the hollywood studios in the 1930s exploited the publication of sheet music as part of their income numerous chapters examine specific screen adaptations in depth including not only favorites such as annie and kiss me kate but also some of the lesser known titles like li l abner and roberta and problematic adaptations such as carousel and paint your wagon together the chapters incite lively debates about the process of adapting Broadway for the big screen and provide models for future studies no other description available this book covers garageband
