Offering pragmatic guidance for planning and conducting a meta-analytic review, this book is written in an engaging, nontechnical style that makes it ideal for graduate course use or self-study. The author shows how to identify questions that can be answered using meta-analysis, retrieve both published and unpublished studies, create a coding manual, use traditional and unique effect size indices, and write a meta-analytic review. An ongoing example illustrates meta-analytic techniques in addition to the fundamentals. The book discusses more advanced topics such as artifact correction, random and mixed effects models, structural equation representations, and multivariate procedures. User-friendly features include annotated equations, discussions of alternative approaches, and practical matters. Sections that give advice on topics not often discussed in other books, such as linking meta-analytic results with theory and the utility of meta-analysis software programs. [\[?\]](#)

This 16th International Conference on Information Technology New Generations (ITNG) continues an annual event focusing on state-of-the-art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security, and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine learning, robotics, high performance computing, and innovative methods of computing are examples of related topics. The conference features keynote speakers, the Best Student Award, Poster Award, Service Award, a Technical Open Panel, and workshops. Exhibits from industry, government, and academia.
