in store a funny marvelously readable portrait of one of the most brilliant and eccentric men in history the seattle times paul erdos was an amazing and prolific mathematician whose life as a world wandering numerical nomad was legendary he published almost 1500 scholarly papers before his death in 1996 and he probably thought more about math problems than anyone in history like a traveling salesman offering his thoughts as wares erdos would show up on the doorstep of one mathematician or another and announce my brain is open after working through a problem he d move on to the next place the next solution hoffman s book like sylvia nasar s biography of john nash a beautiful mind reveals a genius s life that transcended the merely quirky but erdos s brand of madness was joyful unlike nash s despairing schizophrenia erdos never tried to dilute his obsessive passion for numbers with ordinary emotional interactions thus avoiding hurting the people around him as nash did oliver sacks writes of erdos a mathematical genius of the first order paul erdos was totally obsessed with his subject he thought and wrote mathematics for nineteen hours a day until the day he died he traveled constantly living out of a plastic bag and had no interest in food sex companionship art all that is usually indispensable to a human life the man who loved only numbers is easy to love despite his strangeness it s hard not to have affection for someone who referred to children as epsilons from the greek letter used to represent small quantities in mathematics a man whose epitaph for himself read finally i am becoming stupider no more and whose only really necessary tool to do his work was a quiet and open mind hoffman who followed and spoke with erdos over the last 10 years of his life introduces us to an undeniably odd yet pure and joyful man who loved numbers more than he loved god whom he referred to as sf for supreme fascist he was often misunderstood and he certainly annoyed people sometimes but paul erdos is no doubt missed therese littleton in sumptuous and illuminating detail simon winchester bestselling author of the professor and the madman brings to life the extraordinary story of joseph needham the brilliant cambridge scientist freethinking intellectual and practicing nudist who unlocked the most closely held secrets of china once the world s most technologically advanced country this stirring book explores jesus s heart and compassion for every woman giving them undeniable value and significance based on jesus s encounters with women during the time of his ministry this tender book uncovers how time and again jesus went against the traditional conventions of his era by treating women with respect and love showing the world what a vital role they play jesus lived in an era where women were considered property and of little value as significant individuals but by following jesus s example readers will see how women should be cherished and uplifted each chapter touches on jesus s interactions with a specific woman their conversations and the gifts he bestows upon her one tells of the widow who was burying her son only to have jesus resurrect him another is of the woman who was crippled for eighteen years and how jesus not only freed her from her physical malady but freed her spirit as well but more than a mere retelling of these encounters this book is a love story a romance between the creator of the universe come to earth and the women he came to know through these women we see his love and compassion for every woman and we watch as he lifts us all out of our ordinariness into the sublime intentions he planned for us since the beginning of time this crazy gorgeous family novel is one of the great literary achievements of the twentieth century i carry it in my head the way i carry childhood memories the scenes are of such precise horror and comedy that i feel i didn t read the book so much as live it jonathan franzen
