the most comprehensive analysis of the right to effective domestic remedies in the european convention on human rights article 13 this is the third edition of the pioneering work that has become the standard text in the field the first edition was one of the earliest to establish that the newly developing international law of human rights could be set down as any other branch of international law it also incorporates the complementary fields of international humanitarian law and international criminal law while addressing the problems associated with their interaction with human rights law the book is more than a descriptive analysis of the field it acknowledges areas of unclarity or where developments may be embryonic solutions are offered recent developments have confirmed the value of solutions proposed in this edition and the previous one central to most of the chapters is the human rights norm of most salience in the treatment of prisoners namely the prohibition of torture and cruel inhuman or degrading treatment or punishment the early chapters focus on the period of first detention when detainees are most at risk of having information or confessions however unreliable extracted by unlawful means voices contemplating the legitimacy of such treatment to combat terrorism have been heard in the wake of the atrocities of 11 september 2001 the book finds that the evidence clearly suggests that the absolute prohibition of such treatment remains firm other chapters deal with problems of poor prison conditions and of certain extraordinary penalties notably corporal and capital punishment a chapter explores ethical codes for members of professions capable of inflicting or preventing the prohibited behaviour police and medical and legal professionals chapters are also devoted to the extreme practice of enforced disappearance and the contribution of the new convention on this phenomenon as well as to extra legal executions recent events involving boko haram al shabab and al qaeda show that the terrorist threat to the uk is as grave as at any point in the past thirteen years interpol have the resources and experience to build a platform and the uk must take the lead in bringing others to the table however ensuring public safety cannot be the sole purview of the counterterrorism command and the security service it is a responsibility in which all uk citizens and companies take a share stopping british men and women going to become foreign fighters in syria and other theatres of conflict and engaging with them when they return is vital to avoid endangering the security of the uk whether in classrooms local community centres or through the global reach of the internet and social media a clear message needs to be sent to those at risk the agencies are at the cutting edge of sophistication and are owed an equally refined system of democratic scrutiny it is an embarrassing indictment of our system that some in the media felt compelled to publish leaked information to ensure that matters were heard in parliament the intelligence and security committee should be given a democratic mandate in the same way as other select committees an argument that moral psychology can benefit from closer integration with the social sciences offering a novel ethical theory bridging the two in this book mark fedyk offers a novel analysis of the relationship between moral psychology and allied fields in the social sciences fedyk shows how the social sciences can be integrated with moral philosophy argues for the benefits of such an integration and offers a new ethical theory that can be used to bridge research between the two fedyk argues that moral psychology should take a social turn investigating the psychological processes that motivate patterns of social behavior defined as ethical using normative information extracted from the social sciences he points out methodological problems in conventional moral psychology particularly the increasing methodological and conceptual inconsistency with both philosophical ethics and evolutionary biology fedyk s causal theory of ethics is designed to provide moral psychology with an ethical theory that can be used without creating tension between its scientific practice and the conceptual vocabulary of philosophical ethics his account aims both to redirect moral psychology toward more socially realistic questions about human life and to introduce philosophers to a new form of ethical naturalism a way of thinking about how to use different fields of scientific research to answer some of the traditional
