2016

the allied landings at dieppe in german occupied france in august 1942 are one the most famous amphibious operations of the second world war and many books have been written about them mostly from the allied point of view the german side of the story has been neglected and that is why graham thomas s fresh account is so valuable he reconstructs the immediate response of the germans to the landings gives a graphic detailed description of their actions throughout and looks at the tactical and strategic lessons they drew from them each phase and aspect of the action is depicted using a broad range of sources including official reports correspondence and recollections the preliminary british commando attacks on the gun batteries the landings themselves the german defenses and preparations and their counter attacks and the associated naval and air campaigns the result is a finely balanced and incisive reassessment of this remarkable operation it also offers the reader an engrossing account of one of the most dramatic episodes in the war in western

europe

to prevent lobelia fall from being turned into a subdivision a citizen turns to cold blooded murder anyone growing up in lobelia falls is taught to learn the elegant ancient and occasionally deadly art of shooting with a bow and arrow practicing the craft freelance secretary dittany henbit is strolling through the

woods with her bow at her side when she meets a surveyor making surveys where he shouldn't. Dittany is giving him what for when an arrow goes whizzing above her head. It is sharp enough to kill and was not fired by accident but Dittany wasn't the target. She and the surveyor find Mr. Archtrave, the head of the water department, not far away lying dead beneath the trees that he loved so much. Progress is coming to Lobelia Falls and one resident will do anything to stop it. But in a town where every child can shoot, how can Dittany discover who drew the killer bow?

The Grub-and-Stakers Move a Mountain

2012-11-06

The period 1678-1730 was a decisive one not only in western political history but also in the history of the British press. Changing conditions for political expression and an expanding book trade enabled unprecedented opportunities for political activity. The women of Grub Street argues that women already at work in the London book trade were among the first to seize those new opportunities for public political expression, synthesizing areas of scholarly inquiry previously regarded as separate and offering a new model for the study of the literary marketplace. The women of Grub Street examines not only women writers but also printers, booksellers, ballad singers, hawkers, and other producers and distributors of printed texts. Original both in its sources and in the claims it makes for the nature, extent, and complexities of women's participation in print culture and public politics, it provides a wealth of new information about middling and lower class women's political and literary lives and shows that these women were not merely the passive distributors of other people's political ideas. The central argument of the book is that women of the widest possible variety of socioeconomic backgrounds and religious-political allegiances, in fact, played so prominent a role in the production and transmission of political ideas through print as to belie simultaneous powerful claims that women had no place in public life. The first full-length study to suggest the degree of involvement of women in the entire process of print creation at this important moment, The women of Grub Street supports a number of important revisionary arguments with a broad range of literary and archival evidence. It will be of interest to readers of literature, social and publishing history, women's studies, and feminism, and the history of democracy and public discourse.

The Women of Grub Street

1998

the rocket firing typhoon fighter played a pivotal role in the allies success in the air and on the ground in world war ii from the normandy beachhead to the battle of the bulge and the final struggle for germany in this lively dramatic account of aerial combat norman franks describes what it was really like to fly at low level and attack trains ships and tanks to fire lethal high explosive rockets into radar or v 1 sites or to roll over at 12 000 feet and then roar down into an inferno of flak to dive bomb an enemy position book jacket
