*The Living I Ching* 2011 from the author of 365 tao and a leading authority on taoist practice and philosophy comes a completely innovative translation of the classic text of eastern wisdom the i ching the i ching or book of changes is an ancient manual for divining the future its basic text is traditionally attributed to the chinese king wen the duke of zhou and the philosopher confucius by tossing coins rolling dice using a computer or more traditionally counting yarrow stalks one can create a seemingly random combination of heads or tails odd or even yin or yang to construct six lines for example solid for odd numbers or broken for even numbers these six lines make up a hexagram that provides advice predictions and answers to questions on topics from love and career to family and finance while known mostly as a tool of divination the i ching is also a repository of centuries of wisdom most of the existing translations offer either dense scholarly commentary or little more than fortune cookie platitudes but in the living i ching deng ming dao takes a more holistic approach his new translation recovers the true wisdom and philosophy of this ancient classic so that the i ching becomes more than just a book of fortune telling it becomes a manual for living

*Ancient Chinese Wisdom in Numbers* 2020 ancient chinese sayings represent the essence of chinese language from the past to the present with usually a few words originating from historic stories and elucidating deep wisdoms these sayings are still widely used in the present day in modern life though they orginated long ago this series inherits and combines the key characters and elements of traditional paper cuts with ancient chinese sayings to embody visually the spirit of chinese culture

**Ancient Chinese who Left Their Marks on History** 2016-01-20 when indus valley civilization was booming there bloomed another counterpart in the very valleys of the yellow river there flourished the ancient chinese culture which produced many schools of thoughts like taoism zen buddhism confucianism mohism yangism legalism school of yin yang logicians neo confucianism etc which shaped china as a distinct nation these schools of

Stefanie Schweiger and Phoebe Hui: the Magic of Yuanfen 2001-03 from astrology to palmistry from buddhism to taoism from dim sum to

acupuncture the tong sing is the almanac of all things chinese brilliantly illustrated with traditional paintings drawings and calligraphy this thoroughly modern versions teaches everything from how to use chop sticks to how to read astrological profiles 20 full color illustrations  
*Lillian Too's Chinese Wisdom* 2002-02-01 angela hicks takes ancient chinese wisdom and makes it meaningful for our lives today the natural state for humans is to be healthy and happy the 5 secrets show how to re establish this natural harmony through understanding diet finding balance between food types according to chinese principles understanding emotion knowing your emotions working them through and out of your system balancing action with inaction natural rhythms for work rest sleep exercise and understanding the space we live in our habitat environment

**The Tao of Wow** 1995 confucius and lao zi active around 500 bce were the originators of the two major philosophical traditions in china confucian and daoist they formulated their viewpoints without any claim to divine or supernatural revelations and without any invocation of religious authority they simply proposed ideas they thought were essential for people to live by as individuals and in society in this world this general aim is pursued differently by the two thinkers but there are also similarities thus chinese culture has evolved and developed without the guidance of any religion but instead with that of a humanist philosophy in many books and websites in english on lao zi today his philosophical ideas are confused with the daoist religion which was founded in 150 ce seeing the humankind as a part of the universe lao zi never hints at the creation of the world by supernatural beings although they were there in ancient myths in fact the book of lao zi presents an atheist natural self generation of the universe as part of a humanist philosophy furthermore neither lao zi nor confucius promises an existence after death in another form or in another place when asked about death confucius reply was how could we understand death if we don t understand life confucius and lao zi emphasize developing and practicing qualities such as kindness constant learning justice sincerity enjoyment of fine arts and a few others some qualities are promoted by both philosophers while a few by just one of them these qualities are summed up by confucius as ren which is best translated as human heartedness or simply humanity the underlying assumption is that every human being is perfectible each by the person s own efforts this is of course very different from the belief in the abrahamic and other religious traditions that humankind is stained by the original sin or some sort of evil thus requiring redemption through religion the qualities or virtues listed above are taught by many other religions too but a distinctive feature in chinese philosophy is that even though there were before the time of confucius and lao zi such concepts as a god called the lord on high and later the heaven as a supreme spiritual being the emphasis since the time of confucius and lao zi has been on personal efforts in relation to a human being s life in this world the qualities deemed by the two thinkers as essential to a human being s character development are discussed against the historical background of constant warfare however their ideas and arguments are rendered understandable as they are illustrated by the life stories of people in china and other lands world events historical and contemporary discussed in the book demonstrate the relevance of their teachings in the 21st century for people around the world in addition to examining the shortcomings in the teachings of the two thinkers a humanist path addresses two related issues who decides on moral standards in society and how do human beings make moral and ethical decisions it assists readers in making moral and ethical choices in the post theistic and humanist age across the globe today this humanist path offers useful insights for personal growth and community building as they are available to all human beings regardless of ethnicity gender age language worldview geography or other differences it s a way of living that focuses on human beings without the guidance of organized religion generations of chinese have used these ideas as guideposts in their life s journey and in making moral decisions it can thus be seen from the experience of one people that human beings can make ethical humane wise and courageous moral decisions without the guidance of religion if this phenomenon could take place in one society for thousands of years then the argument that all people must have religion as the moral compass to guide them becomes specious

**I Ching** 1999 this collection of one hundred chinese idioms details the stories behind each one and offers a humorous and fascinating insight into the

cultural history of china from paper tigers to praying mantis to the music of nature and heavenly robes these tales have not only shed light on the traditional chinese way of thinking but also illustrated many of its ancient customs

*Tong Sing* 1999 this book identifies that xiang thinking is the eidetic connotation and a fundamental trait of traditional chinese thinking offering insights of considerable methodological significance xiang thinking is a mode of thinking different from conceptual thinking or idealized rational thinking and in a certain sense it is more primal in the past century particularly since 1949 the primary works on chinese philosophical history have as a rule addressed the ancient chinese tradition of philosophical ideas by virtue of the philosophies of plato descartes and hegel methods that inherently challenge chinese philosophical insights this has naturally led to the fact that the insights as such remained obscured this book starts to reverse this trend intending to help chinese people understand and appraise themselves in a more down to earth fashion in addition it is particularly helpful to people of other cultures if they want to understand ancient chinese philosophy and culture in a context of fresh and inspiring philosophical ideas by zhang xianglong
