multinational enterprises do not regard all locations as being equivalent smaller economies and less developed countries are not as attractive because of a limited market size or lack of proximity to other locations this book focuses on how multinational activity to and from peripheral economies differs from their activity in core economies

## **War Expenditures**

1920

in these proceedings of the 24th international conference on modelling monitoring and management of air pollution international academics and air pollution practitioners contribute to the evolving understanding of the science and policy contexts of air pollution all the books from the conference series have discussed important air pollution issues at an international national and local level and by virtue of their truly international composition have brought to the discussion a unique suite of perspectives the conference findings enjoy a wide and rapid dissemination amongst the air pollution science and policy communities the management of air pollution is one of the most challenging problems facing the international community a particular strength of the series has been the attention given to regulatory and market solutions to air pollution management the air pollution series of conferences has consistently acknowledged that science remains the key to identifying the nature and scale of air pollution impacts and reaffirmed that science is essential in the formulation of policy relevant information for regulatory decision making the conference series also acknowledged at a very early stage that science alone will not improve a polluted atmosphere the scientific knowledge derived from well designed studies needs to be allied with further technical and economic studies in order to ensure cost effective and efficient mitigation in turn the science technology and economic outcomes are necessary but not sufficient topics covered include air pollution modelling air pollution mitigation and management aerosols and particles emission studies health effects indoor air pollution air data quality monitoring and measuring case studies air pollution control technologies industrial air pollution air pollution science global and regional studies climate change effects gis remote sensing applications emerging pollutants socio economic issues public engagement policy and legislation

whether you drool over their horsepower or decry their emissions the car is an important and ubiquitous part of nearly all of our lives and the history of their design and the innovations of their technologies can tell us a lot about how our values and attitudes have changed in this book gregory votolato shows us how and why the automobile has become since its rise in the late nineteenth century at once an object of unparalleled popular desire and a hugely problematic emblem of the modern world votolato explores the ways that our love hate relationship with the car has been intimately connected with car design he tells the story of the rise of the private passenger car and all the psychological social

and economic functions it has come to serve beyond mere transportation introducing readers to the automotive design process he traces the lifecycle of the car from the drawing board to the scrapyards offering insights from key figures in the industry as well as a careful evaluation of the car's enormous environmental impact at the same time he looks at the many cultures tied into the automobile from drag racing and customizing to the luxury coachcraft of the classic era along the way he takes us for a ride in some of the most famous cars ever to have had their tires inflated from the model t to the tesla the result is a top down thrilling burn through the history of one of our most beloved and lamented inventions

1929

these are the proceedings of colloquium no 153 of the international astronomical union held at makuhari near tokyo on may 22-26 1995 and hosted by the national astronomical observatory this meeting was intended to be an interdisciplinary meeting between researchers of solar and stellar activity in order for them to exchange the newest information in each field while each of these areas has seen remarkable advances in

recent years and while the researchers in each field have felt that information from the other s domain would be extremely useful in their own work there have not been very many opportunities for intensive exchanges of information between these closely related fields we therefore expected much from this meeting in providing stellar researchers with new results of research on the counterparts of their targets of research spatially and temporarily resolved as observed on the sun likewise we hoped to provide solar researchers with new results on gigantic versions of their targets of research under the very different physical circumstances on other active stars it was our greatest pleasure that we had wide attendance of experts and active researchers of both research fields from all over the world this led to extremely interesting talks and very lively discussions thereby stimulating the exchange of ideas across the fields

a clearer more accurate performance management strategy over the past two decades performance measurement has profoundly changed societies organizations and the way

we live and work we can now access incredible quantities of data display review and report complex information in real time and monitor employees and processes in detail but have all these investments in collecting analysing and reporting data helped companies governments and people perform better measurement madness is an engaging read full of anecdotes so peculiar you ll hardly believe them each one highlights a performance measurement initiative that went wrong explains why and most importantly shows you how to avoid making the same mistake yourself the dangers of poorly designed performance measurement are numerous and even the best how to guides don t explain how to avoid them measurement madness fills in the gap showing how to ensure you re measuring the right things rewarding the behaviours that deserve rewarding and interpreting results in a way that will improve things rather than complicate them this book will help you to recognize correct and even avoid common performance measurement problems including measuring for the sake of measuring assuming that measurement is an instant fix for performance issues comparing sets of data that have nothing in common and hoping to learn something using targets and rewards to promote certain behaviours and achieving exactly the opposite ones reading measurement madness will enable you to design a simple effective performance measurement system which will have the intended result of creating value in your organization

ever since its employment in the first world war chemical warfare has always aroused controversy governments have responded by pursuing the policies of disarmament and deterrence in the hope of avoiding its recurrence however despite the signing of the geneva protocol in 1925 which banned the use of poison gas chemical weapons have been used in subsequent conflicts and most recently in the gulf war between iraq and iran in this work the policies of disarmament and deterrence will be reassessed within a broad historical and strategic context it will be argued that poison gas could still be used in a modern european conflict that the soviet forces are the best equipped to operate in a contaminated environment and that weaknesses persist in nato s anti chemical defences and in her deterrent it will be emphasised too that the geneva disarmament talks which have made some progress in recent years still face formidable difficulties over the issues of verification and compliance above all it will be claimed that the onset of nuclear parity between the superpowers has eroded the credibility of a deterrent to chemical attack based upon the threat of nuclear release accordingly this book will contend that the united states should modernize her stockpile of chemical weapons to bolster the western deterrent and to provide more leverage for the negotiations in geneva
