the princes étrangers or the foreign princes were an influential group of courtiers in early modern france who maintained their unofficial status as foreigners due to membership in sovereign ruling families arguably the most influential of these were the princes of lorraine a sovereign state on france s eastern border during the sixteenth century the lorraine guise dominated the culture and politics of france gaining a reputation as a powerful manipulative family at the head of the catholic league in the wars of religion and with close relationships with successive valois monarchs and catherine de medici after the traumas of 1588 however although they faded from the narrative history of france they nevertheless remained at the pinnacle of political culture until the end of the eighteenth century this book examines the lesser known period for the guise at the later stages of the ancien régime focusing on the recovery of lost fortunes prestige favour and influence that began towards the end of the reign of louis xiii and continued through that of louis xiv central to the work is the question of what it meant to be a member of a family of princely rank whose dynastic links outside the state guaranteed privileges and favours at the highest level jonathan spangler investigates how an aristocratic family operated within that political culture including facets of patronage political ecclesiastical military and the arts and the meaning of dynasticism itself marriages testaments women s roles multiplicity of loyalties the result is a thorough examination of the nature of crown noble relations in the era of absolutism as seen through the example of the lorraine guise it sheds light on how the family which had so threatened the equilibrium of the late valois monarchy became one of the strongest pillars supporting the regime of the later bourbons

for a moment marche refused to believe his own eyes a wolf in lorraine a big gray timber wolf here within a mile of the château morteyn he could see it yet passing like a shadow along the trees before he knew it he was following running noiselessly over the soft mossy path holding his little shot gun tightly as he ran his eyes fixed on the spot where the wolf had disappeared he began to doubt his senses again he began to believe that the thing he saw was some shaggy sheep dog from the moselle astray in the lorraine forests but he held his pace his pipe griped in his teeth his gun swinging at his side presently as he turned into a grass grown carrefour a mere waste of wild flowers and tangled briars he caught his ankle in a strand of ivy and fell headlong sprawling there on the moss and dead leaves the sound of human voices struck his ear and he sat up scowling and rubbing his knees the voices came nearer two people were approaching the carrefour jack marche angry and dirty looked through the bushes stanching a long scratch on his wrist with his pocket handkerchief the people were in sight now a man tall square shouldered striding swiftly through the woods followed by a young girl twice she sprang forward and seized him by the arm but he shook her off roughly and hastened on as they entered the carrefour the girl ran in front of him and pushed him back with all her strength

illustrated with over 20 maps and diagrams the lorraine campaign an overview september december 1944 originated at the u s army command and general staff college as an introductory lesson to a course on corps operations it is an adaptation of a narrated slide presentation used to provide students with a historical context on which to base their studies of current doctrine the lorraine campaign which included failures as well as successes was chosen because it encompassed a variety of operations that involved such factors as logistics intelligence and weather this overview serves as a point of departure for more in depth studies sets the stage for the analysis of unit operations from platoon to corps and furnishes a useful reference for studying branch operations in battle repeated reference to this overview will give students an insight into specific operations or single branch actions this study also provides a concise summary of third army operations in one of the world war ii european campaigns

includes maps in 1946 the historical division of the war department made plans for the preparation of a nine volume series recounting the history of the european theater of operations there was no precedent in the experience of the united states army for an official narrative account of military operations on the grand scale careful study of the official histories produced by the european combatants after world war i showed that these histories could offer little in the way of a pattern for recording the european campaigns of 1944 and 1945 the drastic change from the trench warfare of 1914 18 to the mobile operations of 1944 45 had complicated the task of the military historian in world war i a tactical situation represented by three divisions rising from the trenches in simultaneous attack on a narrow front permitted a reasonable unity in treatment and allowed the historian to write at the level of the army corps thirty years later that same frontage might be held by a single reinforced regiment the fluid condition of the combat zone in world war ii and the wide dispersion of troops over the battle area resulting from the impact of the tank the plane the machine gun the truck and the radio telephone inevitably induced a degree of fragmentization and an unavoidable lack of sequence in the narrative of events on the battlefields of 1944 and 1945 it was decided therefore that the common denominator in the present series would be the division since the division represents the basic tactical and

administrative unit of the combined arms although emphasis is placed on the division organization by chapters generally will follow the story of the army corps as a means of achieving narrative and tactical unity the lorraine campaign is the first volume to be published in the projected series embracing the history of the american armies in the european theater of operations this volume deals with the campaign waged by the third army in lorraine during the period 1 september 18 december 1944 since it has been impossible to organize the writing of individual volumes so that they may be published in the chronological sequence followed by military operations the reader interested in the history of the third army before or after the events here set forth must wait until the appropriate volumes are completed the present volume is concerned with the tactical operations of the third army and its subordinate units the story of command and decision in higher headquarters is told only when it has a direct bearing on the campaign in lorraine the logistics of this campaign likewise have been subordinated to the tactical narrative the basic unit in the present narrative is the infantry or armored division the story of the division has been told in terms of its regiments and battalions but swerves on occasion to the company or the platoon just as the operations themselves turned on the exploits of these smaller units

alsace and lorraine during forty three years these two names have been linked together in a neat phrase under that verbal yoke they passed as the result of the fortunes of war from one political framework to another but the two applied to distinct entities the gradual evolution of each into a semblance of unity out of a congeries of private estates and ecclesiastical foundations the liege lords they acquired or found imposed upon them mediate or immediate the resources characteristics customs of each belong to different stories though sometimes indeed containing similar chapters alsace and lorraine were alike in being tiny buffer territories occasionally little more than geographical expressions wedged between big interests both have suffered as shuttlecocks under blows of battledores from the east and the west here are in brief the stories of each this classic contains the following chapters alsace and lorraine alsace i romans gauls and others on the soil of alsace ii the treaty of verdun and other pacts affecting alsace iii the dream of a middle kingdom iv the people of alsace in the fifteenth century and after v the thirty years war and the peace of westphalia vi louis xiv and strasbourg vii alsace after annexation to france lorraine i racial elements ii when the map was in the making iii the aspirations of burgundy iv the new learning v the house of lorraine in europe vi the last dukes of lorraine vii the french revolution viii the language elsass lothringen i after the cession

for general george s patton jr the battle for lorraine during the fall and winter of 1944 was a frustrating and grueling experience of static warfare plagued by supply shortages critical interference from superiors flooded rivers fortified cities and the highly determined german army patton had little opportunity to wage a fast armored campaign rickard examines patton s generalship during these bitter battles and suggests that patton was unable to adapt to the new realities of the campaign thereby failing to wage the most effective warfare possible by the beginning of the ardennes offensive patton had crippled his worthy opponent but had suffered the highest casualties of any campaign that he conducted during the war until now his better known exploits in sicily and normandy have overshadowed this campaign relying on a broad range of sources this treatment of patton s operational performance in lorraine goes beyond the official history it describes patton s philosophy of war and explains why it essentially failed in lorraine supplemented by full orders of battle casualty and equipment losses and excellent maps patton at bay is a penetrating study of america s best fighting general
