a stunning and ambitious origins story ibram x kendi national book award winning and 1 new york times bestselling author the remarkable history of how college presidents shaped the struggle for racial equality some of america s most pressing civil rights issues desegregation equal educational and employment opportunities housing discrimination and free speech have been closely intertwined with higher education institutions although it is commonly known

that college students and other activists as well as politicians actively participated in the fight for and against civil rights in the middle decades of the twentieth century historical accounts have not adequately focused on the roles that the nation's college presidents played in the debates concerning racism based on archival research conducted at a range of colleges and universities across the United States the campus color line sheds light on the important place of college presidents in the struggle for racial parity focusing on the period between 1948 and 1968 Eddie Cole shows how college presidents during a time of violence and unrest strategically yet often silently initiated and shaped racial policies and practices inside and outside of the educational sphere with courage and hope as well as malice and cruelty college presidents positioned themselves sometimes precariously amid conflicting interests and demands black college presidents challenged racist policies as their students demonstrated in the streets against segregation while presidents of major universities lobbied for urban renewal programs that displaced black communities near campus some presidents amended campus speech practices to accommodate white supremacist speakers even as other academic leaders developed the nation's first affirmative action programs in higher education the campus color line illuminates how the legacy of academic leaders' actions continues to influence the unfinished struggle for black freedom and racial equity in education and beyond
