throughout the world healthcare professionals often lack knowledge of the possibilities and limitations of systematically processing data information and knowledge and of the resulting impact on quality decision making they are often asked to use information technologies of which they have limited appreciation in order to enhance their practices through better use of information resources however for systematically processing data information and knowledge in medicine and in healthcare healthcare professionals who are well trained in medical informatics or health informatics are needed it will only be through improved education of healthcare professionals and through an increase in the number of well trained workers in health and medical informatics that this lack of knowledge and associated skills can begin to be reversed although we can recognize further progress in educating health and a considerable number of educational programs for health informatics medical informatics specialists have been set up there is still a need to enhance these educational activities world wide considering global developments as well as new curricular concepts and technological opportunities imia and in particular its working group on health and medical informatics education is the leading international society stimulating such

educational activities in various ways this book is especially helpful for educators in the field of health medical informatics

theorizing women and leadership new insights and contributions from multiple perspectives is the fifth volume in the women and leadership research theory and practice series this cross disciplinary series from the international leadership association enhances leadership knowledge and improves leadership development of women around the world the purpose of this volume is to provide a forum for women to theorize about women s leadership in multiple ways and in multiple contexts theorizing has been a viewed as a gendered activity swedberg 2014 and this series of chapters seeks to upend that imbalance the chapters are written by women who represent multiple disciplines cultures races and subject positions the diversity extends into research paradigm and method and the chapters combine to illuminate the multiple ways of knowing about and being a woman leader twenty first century leadership scholars acknowledge the importance of context and many are considering post heroic leadership models based on relationships rather than traits this volume contributes to this discussion by offering a diverse array of perspectives and ways of knowing about leadership and leading the purpose of the volume is to provide readers with not only interesting new ideas about women and leadership but also to highlight the diverse epistemologies that can contribute to theorizing about women leaders some chapters represent typical social scientific practices and processes while others represent newer knowledge forms and ways of knowing the volume contributors adopt various epistemological positions ranging from objective researcher to embedded co participant the chapters link their new findings to existing empirical or conceptual work and illustrate how the findings extend amend contradict or confirm existing research the diversity of the chapters is

one of the volume's strengths because it illuminates the multiple ways that leadership theory for women can be advanced typically research based on a realist perspective is more valued in the academy this perspective has indeed generated robust information about leadership in general and women's leadership in particular however readers of this volume are offered an opportunity to explore multiple ways of knowing different ways of researching and are invited to de-center researcher objectivity the authors of the chapters offer conceptual and empirical findings illuminate multiple and alternative research practices and in the end suggest future directions for quantitative qualitative and mixed methods research

this book considers the rarely studied but pervasive concepts of doubt that medieval muslim jurists used to resolve problematic criminal cases

## **How to be Critically Open-Minded: A Psychological and Historical Analysis 2014-08-13**

in the aftermath of the discoveries in foundations of mathematic s there was surprisingly little effect on mathematics as a whole if one looks at stan dard textbooks in different mathematical disciplines especially those closer to what is referred to as applied mathematics there is little trace of those developments outside of mathematical logic and model theory but it seems fair to say that there is a widespread conviction that the principles embodied in the zermelo fraenkel theory with choice zfc are a correct description of the set theoretic underpinnings of mathematics in most textbooks of the kind referred to above there is of course no discussion of these matters and set theory is assumed informally although more advanced principles like choice or sometimes replacement are often mentioned explicitly this implicitly fixes a point of view of the mathemat ical universe which is at odds with the results in foundations for example most mathematicians still take it for granted that the real number system is uniquely determined up to isomorphism which is a correct point of view as long as one does not accept to look at unnatural interpretations of the membership relation

the volatility of muslim and middle eastern politics has made these interrelated topics an overriding preoccupation of world and especially u s politics perhaps no region of the world has ever so dominated the american public discourse as the middle east does today as daniel pipes shows this results mainly but not exclusively from the attacks of september 11 2001 and the ensuing war on terrorism other sources of trouble include militant islam muslims in the west the arab israeli conflict the iraq situation relations with saudi arabia the price of oil and gas and u s policy toward all these issues these are the central themes of the roughly one hundred essays in daniel pipes miniatures views of islamic and middle eastern politics as pipes notes the islamist war against america preceded the events of 9 11 nevertheless response to the earlier attacks had been inconsistent and somewhat nonchalant pipes shows how the state department s annual report on patterns of global terrorism veers into unreliability and even falsehood he explains the problem in george w bush trying to decide what is true islam and what not in u s academics hiding the true meaning of the word jihad and in seventh grade textbooks proselytizing for islam pipes demonstrates that many seemingly devout islamists are in fact impious frauds when it comes to the arab israeli conflict pipes indicates how the failure of the oslo process could be discerned as early as 1994 and he shows how yasir arafat speaks one way to arabs and another way to israelis this important collection by one of the foremost experts in the field presents original insights accessibly written for middle east specialists political scientists policymakers journalists and the interested public
