Consumer Economics 2022-05-15 a core principle of the welfare state is that everyone pays taxes or contributions in exchange for universal insurance against social risks such as sickness old age unemployment and plain bad luck this solidarity principle

assumes that everyone is a member of a single national insurance pool and it is commonly explained by poor and asymmetric information which undermines markets and creates the perception that we are all in the same boat living in the midst of an information revolution this is no longer a satisfactory approach this book explores theoretically and empirically the consequences of big data for the politics of social protection torben iversen and philipp rehm argue that more and better data polarize preferences over public insurance and often segment social insurance into smaller more homogenous and less redistributive pools using cases studies of health and unemployment insurance and statistical analyses of life insurance credit markets and public opinion

The Handbook of Global Trade Policy 2012-10 going digital in brazil analyses recent developments in brazil s digital economy reviews policies related to digitalisation and makes recommendations to increase policy coherence in this area

Clean Up Your Credit! 2023-03-01 this book focuses on the global landscape in which insurance is transacted and where it is evolving driven from within by transformative technologies and externally by the necessity to address risks like climate change and health crises such as the covid 19 pandemic it discusses the dynamic challenges and opportunities that lie ahead for the industry in areas such as on demand insurance embedded insurance parametric insurance autonomous vehicles the rise of fintech the cyber risk landscape and through initiatives driven by distributed ledger technology or blockchain solutions moreover it covers the major external challenges confronting the global insurance market such as the growing insurance protection gap in relation to the affordability and insurability of natural catastrophes and climate change and pandemics like covid 19 this book examines innovations in insurance driven by the industry as well as externally imposed changes and dynamics impacting the industry it describes these changes the industry s responses and the legal framework in which they occur it canvasses additional regulatory and law reform initiatives that may be necessary to achieve an effective balance between the various competing interests the book is the first to address these matters holistically with a particular focus upon insurance law it will describe these changes and industry responses and the legal framework in which they occur the global insurance market will be directly relevant to legal professionals insurers insurtechs fintechs brokers ceos of insurance companies risk managers legal counsel academics researchers the judiciary and policy makers it will also serve as a valuable resource for students of all levels

Statement of Disbursements of the House 2023-05-31 algorithmic data profiling is not merely an important topic in contemporary fiction it is an increasingly dominant form of storytelling and characterization in our society in profiles and plotlines katherine johnston engages this energetic reformation of contemporary literature to account for a society and economy of frenetic counting johnston analyzes prescient work by contemporary authors such as jennifer egan claudia rankine mohsin hamid and william gibson to probe how the claims of data surveillance serve to make lives seem legible intelligible and sometimes even expendable

Protecting Consumers' Data 2023-10-18 a new approach for studying the interaction between international and domestic processes of criminal law making in today s globalized world

**Financial Crime and the Law** 2023-06-06 data borders investigates entrenched and emerging borderland technology that ensnares all people in an intimate web of surveillance where data resides and defines citizenship detailing the new trend of biologically mapping undocumented people through biotechnologies melissa villa nicholas shows how surreptitious monitoring of latinx immigrants is the focus of and driving force behind silicon valley s growing industry within defense technology manufacturing villa nicholas reveals a murky network that gathers data on marginalized communities for purposes of exploitation and control that implicates law enforcement border patrol and ice but that also pulls in public workers and the general public often without their

knowledge or consent enriched by interviews of latinx immigrants living in the borderlands who describe their daily use of technology and their caution around surveillance this book argues that in order to move beyond a heavily surveilled state that dehumanizes both immigrants and citizens we must first understand how our data is being collected aggregated correlated and weaponized with artificial intelligence and then push for immigrant and citizen information privacy rights along the border and throughout the united states

**OECD Reviews of Digital Transformation Going Digital in Brazil** 2020-06-15 lerong lu examines the biggest change in modern financial industry the fintech financial technology revolution that denotes the close interaction between the financial services industry and latest information technologies such as big data cloud computing blockchain and artificial intelligence the three areas of banking institutions online lending marketplaces and money and payment systems are explored to assess how financial innovations affect the traditional financial industry what kinds of regulatory challenges arise and how global policymakers react to such challenges with in depth and international case studies on fintech including app based banking services mobile payments p2p lending and cryptocurrencies the global fintech hubs in six continents are assessed the complex dynamic and multidimensional fintech ecosystem is also investigated including its key players such as regulatory strategy regulatory sandbox and regtech and fintech corporations including financial holding companies fintech unicorns bigtech firms and metaverse platforms lu highlights the enormous benefits for financial institutions and their consumers and argues that fintech contributes to a more equal democratic inclusive and sustainable financial system however he also considers the risks and multiple legal ethical and regulatory challenges for policy makers and financial authorities that fintech has posed

**The Global Insurance Market and Change** 2022-02-02 this book highlights recent research results in bio inspired computing and applications it presents 33 selected papers from the 8th international conference on innovations in bio inspired computing and applications ibica 2017 which was held in marrakesh morocco from december 11 to 13 2017 a premier conference in the nature inspired computing field ibica is intended to bring together the world s leading researchers and practitioners interested in advancing the state of the art in biologically inspired computing allowing them to exchange notes on a broad range of disciplines the book offers a valuable reference guide for all researchers students and practitioners in the fields of computer science and engineering
