computing power of modern information
technology is changing the face of research
not just in science technology and mathematics
but in humanities and cultural studies too
recent decades have seen a major shift both in
attitudes and deployment of computers which
are now vital and highly effective tools in
disciplines where they were once viewed as
elaborate typewriters this revealing volume
details the vast array of computing
applications that researchers in the
humanities now have recourse to including the
dissemination of scholarly information through
virtual co laboratories data retrieval and the
modeling of complex processes that contribute
to our natural and cultural heritage one key
area covered in this book is the versatility
of computers in presenting images and graphics
which is transforming the analysis of data
sets and archaeological reconstructions alike
the papers published here are grouped into the
three broad categories that cover the natural
and computational methods research di fare con
