2010-07-06

object relations and self psychology are two leading schools of psychological thought discussed in social work classrooms and applied by practitioners to a variety of social work populations yet both groups have lacked a basic manual for teaching and reference until now for them dr eda g goldstein s book fills a void on two fronts part i provides a readable systematic and comprehensive review of object relations and self psychology while part ii gives readers a friendly step by step description and illustration of basic treatment techniques for educators this textbook offers a learned and accessible discussion of the major concepts and terminology treatment principles and the relationship of object relations and self psychology to classic freudian theory practitioners find within these pages treatment guidelines for such varied problems as illness and disability the loss of a significant other and such special problems as substance abuse child maltreatment and couple and family disruptions in a single volume dr goldstein has met the complex challenges of education and clinical practice

Ego Psychology and Social Work Practice

1995-03

while ego psychological theory still holds a pre eminent position in clinical social work practice the field has changed in many ways this revised edition addresses these major changes bringing the reader up to date

Comparative Approaches in Brief Dynamic Psychotherapy

1999

introduces contemporary models of brief dynamic psychotherapy and describes fundamental tasks and methods of time limited intervention focusing on developmental contexts of treatment and on the needs of client populations whose options are often limited to brief treatment explores flexible approaches in treatment of conditions including borderline personality reaction to trauma and physical disability the editor teaches contemporary psychoanalytic thought and personality theory at the university of chicago co published simultaneously as psychoanalytic social work vol 6 nos 3 4 1999 annotation copyrighted by book news inc portland or

Advanced Clinical Social Work Practice

2009-09-02

advanced clinical social work practice traces the development of relational ideas from their origin in object relations and self psychology to their evolution in current relational intersubjectivity and attachment theory relational treatment emphasizes openness and collaboration between client and therapist mutual impact the client s subjectivity and the therapist s empathy genuineness and use of the self in therapeutic interaction the approach treats the relationship and dialogue between client and therapist as crucial to the change process and shows how the therapeutic relationship can be used to help clients and therapists bridge differences examine similarities overcome impasses and manage enactments the relational emphasis on the subjective experience of both client and therapist is beautifully illustrated throughout this book as the authors draw from their clinical work with clients from diverse backgrounds including gay and lesbian clients immigrants and clients of color they demonstrate how relational principles and techniques can be applied to multiple problems in social work practice for example life crises and transitions physical and sexual abuse mental disorders drug addiction and the loss of a loved one the authors also discuss the integration of relational constructs in short term treatment and with families and groups this volume opens with a historical perspective on the role of relational thinking in social work and the evolution of relational theory it presents an overview of the key concepts in relational theory and its application throughout the treatment process with diverse clients and in different practice modalities the book concludes with a discussion of the challenges in learning and teaching new theoretical and practice paradigms particularly in creating a more mutual exchange in the classroom and during supervision

Object Relations Theory and Self Psychology in Social Work Practice

2001

object relations and self psychology are two leading schools of psychological thought discussed in social work classrooms and applied by practitioners to a variety of social work populations yet both groups have lacked a basic manual for teaching and reference until now for them dr eda g goldstein s book fills a void on two fronts part i provides a readable systematic and comprehensive review of object relations and self psychology while part ii gives readers a friendly step by step description and illustration of basic treatment techniques for educators this textbook offers a learned and accessible discussion of the major concepts and terminology
