1891

as james madison led america s effort to write its constitution he made two great inventions the separation of powers and federalism the first is more famous but the second was most essential because without federalism there could have been no united states of america federalism has always been about setting the balance of power between the federal government and the states and that s revolved around deciding just how much inequality the country was prepared to accept in exchange for making piece among often warring states through the course of its history the country has moved through a series of phases some of which put more power into the hands of the federal government and some rested more power in the states sometimes this rebalancing led to armed conflict the civil war of course almost split the nation permanently apart and sometimes it led to political battles by the end of the 1960s however the country seemed to have settled into a quiet agreement that inequality was a prime national concern that the federal government had the responsibility for addressing it through its own policies and that the states would serve as administrative agents of that policy but as that agreement seemed set federalism drifted from national debate just as the states began using their administrative role to push in very different directions the result has been a rising tide of inequality with the great invention that helped create the nation increasingly driving it apart

## The Convention Manual for the Sixth New York State Constitutional Convention

1894

1894

the federal reserve act became law on december 23 1913 the need for the new monetary system for which this law provided was traceable to the frequently stated causal connection between crises and failure in the banking and currency system and crises and failure in commerce industry and agriculture the supporters of the law argued that the continued prosperity and growth of the nation demanded that monetary malfunctions be cured the powers and responsibilities given to the new system were enveloped in structural arrangements designed to assure the organization itself as well as the nation that there would be competent adequate and independent authority to provide for a more efficient monetary system although unique the solution was not simple in either structure or operation for besides protecting itself from the dangers of government or private banker domination the federal reserve system had to win and keep the help and cooperation of this same government and these same private banks the system maintained its independence in two ways first the federal reserve system found its fundamental meaning in the governmental function delegated to it by congress the formation and execution of credit and monetary policy for public purposes yet it was set apart from the ordinary legislative and executive departments of the government second the system worked to achieve its purposes by acting through and with the cooperation of the nation s private financial interests yet it was separate from those interests the federal reserve system was designed to cooperate and still be independent how it promoted this harmony and yet avoided domination was its glory and its cross it is of the history of this achievement that this book tells

## **Elizabeth Anne Moler Nomination**

1997

excerpt from government organization in war time and after a survey of the federal civil agencies created for the prosecution of the war a feature distinguishing the great war from all other wars in which the united states has been engaged is that it necessitated the mobilization of practically the entire resources of the country for its successful prosecution by mobilization is meant that the national government was compelled not merely to draft into its service all the manhood of the nation suitable for military operations but to call upon take over direct or control almost every element of the life of the people industrial commercial scientific and educational to the end that all these activities might be brought to bear directly upon the prosecution of the war to effect this mobilization the congress had to pass a great body of special legislation extending the powers of the government over these subjects and creating or making provision for the creation of a large number of special services through which these powers might be exercised the present volume has for its purpose to attempt a methodical statement and description of these special war agencies and their operations it has been necessary to restrict our attention to those agencies which represent distinct services specially created for the handling of matters connected with the prosecution of the war or the meeting of conditions engendered by the war only in an incidental way has an effort been made to consider the work done by the regular departments and services of the government no account is thus given of the activities of the two most important war services of all the war and navy departments to have attempted such an account would have required another volume longer than the present one about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
