Spatial Planning and Sustainable Development

2013-02-28

this book attempts to provide insights into the achievement of a sustainable urban form through spatial planning and implementation here we focus on planning experiences at the levels of local cities and some metropolitan areas in asian countries this book investigates the impact of planning policy on spatial planning implementation from multidisciplinary viewpoints encompassing land use patterns housing development transportation green design and agricultural and ecological systems in the urbanization process we seek to learn from researchers in an integrated multidisciplinary platform that reflects a variety of perspectives such as economic development social equality and ecological protection with a view to achieving a sustainable urban form

Regions, Spatial Strategies, and Sustainable Development

2004

this book focuses on recent regional policy and planning debates in all the english regions

Cross-border Governance and Sustainable Spatial Development 2008-05-14

border regions in central europe undergo tremendous changes due to the enlargement of the european union and the related processes of europeanization bordering and re bordering the book explores the consequences of these processes for cross border governance and spatial planning in central europe it combines analyses of european and national framework conditions with case studies from border regions and cities in 8 countries the focus is on generic questions of cross border planning and cooperation as well as on selected sectors such as nature conservation transport and economic development the book is written for the international scientific community and for practitioners in the fields of spatial planning cross border cooperation environmental protection and structural policy

Land Use and Spatial Planning 2018-01-12

this book reconciles competing and sometimes contradictory forms of land use while also promoting sustainable land use options it highlights land use planning spatial planning territorial or regional planning and ecosystem based or

environmental land use planning as tools that strengthen land governance further it demonstrates how to use these types of land use planning to improve economic opportunities based on sustainable management of land resources and to develop land use options that strike a balance between conservation and development objectives competition for land is increasing as demand for multiple land uses and ecosystem services rises food security issues renewable energy and emerging carbon markets are creating pressures for the conversion of agricultural land to other uses such as reforestation and biofuels at the same time there is a growing demand for land in connection with urbanization and recreation mining food production and biodiversity conservation managing the increasing competition between these services and balancing different stakeholders interests requires efficient allocation of land resources

Spatial Planning, Urban Form and Sustainable Transport *2017-03-02*

the ways in which we travel have a huge impact on sustainability this book addresses the relationship between travel patterns and the physical form of cities and considers the role of spatial planning in that relationship three sections

present empirical research and commentaries from leading academics and practitioners from europe the usa australia and japan the first section considers the impact of urban form in combination with factors such as lifestyles and socio demographic change on sustainable transport the second addresses the impact of different elements of urban form such as density configuration and mix of uses on mobility the final section focuses on issues surrounding the implementation of spatial planning policies to support sustainable travel the book will be of interest to practitioners academics and students in the fields of planning transport and geography

Spatial Planning for a Sustainable Singapore

2008-02-28

this book analyses and provides an insight to singapore s planning system and practices associated with sustainable development it takes a reflective approach in reviewing the direction impact and significance of sustainable development in singapore planning and the future challenges facing the city state which is often looked upon by many developing countries as a model

Cross-border Governance and Sustainable Spatial Development 2009-08-29

border regions in central europe undergo tremendous changes due to the enlargement of the european union and the related processes of europeanization bordering and re bordering the book explores the consequences of these processes for cross border governance and spatial planning in central europe it combines analyses of european and national framework conditions with case studies from border regions and cities in 8 countries the focus is on generic questions of cross border planning and cooperation as well as on selected sectors such as nature conservation transport and economic development the book is written for the international scientific community and for practitioners in the fields of spatial planning cross border cooperation environmental protection and structural policy

Sustainable and Smart Spatial Planning in Africa 2022-04-24

this book clarifies the smart city concept that is gaining application in sub saharan africa it shows how the smart concept can be used to address problems that would

be difficult and more expensive to solve using traditional techniques such as employment creation this is done through elaboration of the african interpretation of smartness using tools for smart solid waste management e governance smart energy and smart infrastructure the case studies selected and each chapter explain a different dimension of the smart city concept and offer innovative solutions to problems of rapid urbanization it lays the theoretical foundation for further research on smart cities and rural areas in africa

Spatial Information Technology for Sustainable Development Goals 2019-08-08

this textbook aims to develop a scientific knowledge base on spatial information technology to communicate the united nations sustainable development goals sdgs among students researchers professionals and laymen the book improves understanding of the spatial database and explains how to extract information from this for planning purposes to enhance the knowledge of geoscientists and environmentalists the book describes the basic fundamental concepts to advance techniques for spatial data management and analysis and discusses the methodology the geographic information system gis remote sensing and global

positioning system gps are presented in an integrated manner for the planning of resources and infrastructure the management of these systems is discussed in a very lucid way to develop the reader s skills the proper procedure for map making and spatial analysis are included along with case studies to the reader where the first part of the book discusses the conceptual background the second part deals with case studies using these applications in different disciplines the presented case studies include land use agriculture flood watershed characterization and infrastructure assessment for the sustainable development goals

Ecological Rationality in Spatial Planning

2020-01-16

spatial planning defines how men use one of the most important and scarce resources on earth land planners therefore play a key role in countering or deepening the current ecological crisis to foster ecological transitions planning scholars and practitioners need to be equipped with sound theories and practical tools to this end this book advocates a re foundation of spatial planning under the paradigm of ecological rationality based on the revaluation of early pioneers of ecological planning and mutual fertilization with different disciplines including

decision making science ecology eco system theory land use science and political ecology the key principles of ecological rationality and its application to spatial planning are discussed and this conceptual framework is used to explain the main underlying drivers of ecological degradation and their spatial manifestations at the local level current policy instruments in the european context which can be used to underpin ecological planning such as green infrastructure and the mapping and assessment of ecosystem service maes initiative are also examined

ESDP, European Spatial Development Perspective *1999*

this double volume work focuses on socio demographics and the use of such data to support strategic resource management and planning initiatives papers go beyond explanations of methods technique and traditional applications to explore new intersections in the dynamic relationship between the utilization and management of resources and urban development international authors explore numerous experiences characteristics of development and decision making influences from across asia and southeast asia as well as recounting examples from america and africa papers propound techniques and methods used in geographical

research such as support vector machines socio economic correlates and travel behaviour analysis in this volume the contributors examine cutting edge theories explaining diversity and dynamics in urban development topics covered include human vulnerability to hazards space and urban problematic assessment and evaluation of regional urban systems and structures and urban transformations as a result of structural change economic development and underdevelopment the significance of these topics lie in the pace and volume of change as is happening in geography reflecting continued development within established fields of inquiry and the introduction of significantly new approaches during the last decade readers are invited to consider the dynamics of spatial expansion of urban areas and economic development and to explore conceptual discussion of the innovations in and challenges on urbanization processes urban spaces themselves and both resource management and environmental management together the two volumes contribute to the interdisciplinary literature on regional resources and urban development by collating recent research with geography at its core scholars of urban geography human geography urbanism and sustainable development will be particularly interested in this book

Spatial Diversity and Dynamics in Resources and Urban Development 2015-11-24

central and eastern european countries are undergoing a difficult transition process with consequences for spatial development europe needs a more balanced polycentric system of cities a new urban rural relationship parity of access to infrastructure and knowledge as well as prudent management and development of the natural and cultural heritage dealing with these complex challenges and the need for sustainable development politicians requires qualified advice from experts to this end the german ministry for regional planning construction and urban development initiated the network of spatial research institutes in central and eastern europe cee net in 1992 exchange of knowledge and an open dialogue at all levels are pre conditions for the cooperative development of visions and strategies serving spatial development in europe the annual conferences of the network have been a first steps towards closer cooperation the high interest shown in these conferences by academics and government representatives and the fact that several research projects have already crystallised out of the debates they engendered indicate that the network is meeting a need for exchange and cooperation decisions on spatial development do not stop at national borders and

the discussion on spatial development in any European region has therefore to take the European context into consideration a special advantage of this publication is that as well as focusing on spatial development and research in CEE regions it also discusses Central and Eastern Europe in a European context

Sustainable Development for Central and Eastern Europe 2012-12-06

the open access version of this book available at tandfebooks.com doi:10.1201/9781315146638 has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 3.0 license GIS is used today to better understand and solve urban problems GIS in Sustainable Urban Planning and Management: A Global Perspective explores and illustrates the capacity that geo-information and GIS have to inform practitioners and other participants in the processes of the planning and management of urban regions the first part of the book addresses the concept of sustainable urban development its different frameworks the many ways of measuring sustainability and its value in the urban policy arena the second part discusses how urban planning can shape our cities examines various spatial configurations of cities the spread of activities and the demands placed on

different functions to achieve strategic objective it further focuses on the recognition that urban dwellers are increasingly under threat from natural hazards and climate change written by authors with expertise on the applications of geo information in urban management this book showcases the importance of gis in better understanding current urban challenges and provides new insights on how to apply gis in urban planning it illustrates through real world cases the use of gis in analyzing and evaluating the position of disadvantaged groups and areas in cities and provides clear examples of applied gis in urban sustainability and urban resilience the idea of sustainable development is still very much central in the new development agenda of the united nations and in that sense it is of particular importance for students from both the global south and global north professionals researchers and students alike will find this book to be an invaluable resource for understanding and solving problems relating to sustainable urban planning and management

Spatial planning and sustainable development policy in France 2006

offers a look at practices to see whether the spatial planning is having the kinds of

impacts its advocates would wish contributing to theoretical debates in planning state restructuring and governance this title outlines and critiques the contemporary practice of spatial planning

GIS in Sustainable Urban Planning and Management 2018-12-07

shaping neighbourhoods is unique in combining all aspects of the spatial planning of neighbourhoods and towns whilst emphasising positive outcomes for people s health and global sustainability this new edition retains the combination of radicalism evidence based advice and pragmatism that made earlier editions so popular this updated edition strengthens guidance in relation to climate change and biodiversity tackling crises of population health that are pushing up health care budgets but have elements of their origins in poor place spatial planning such as isolation lack of everyday physical activity and respiratory problems it is underpinned by new research into how people use their localities and the best way to achieve inclusive healthy low carbon settlements the guide can assist with understanding the principles for planning healthy and sustainable neighbourhoods and towns planning collaborative and inclusive processes for multi sectoral

working developing know how and skills in matching local need with urban form discovering new ways to integrate development with natural systems designing places with character and recognising good urban form whether you are a student faced with a local planning project a public health professional planner urban designer or developer involved in new development or regeneration a council concerned with promoting healthy and sustainable environments or a community group wanting to improve your neighbourhood you will find help here

The New Spatial Planning 2010

the ways in which we travel have a huge impact on sustainability this book addresses the relationship between travel patterns and the physical form of cities and considers the role of spatial planning in that relationship three sections present empirical research and commentaries from leading academics and practitioners from europe the usa australia and japan the first section considers the impact of urban form in combination with factors such as lifestyles and socio demographic change on sustainable transport the second addresses the impact of different elements of urban form such as density configuration and mix of uses on mobility the final section focuses on issues surrounding the implementation of spatial planning policies to support sustainable travel the book will be of interest

to practitioners academics and students in the fields of planning transport and geography

Shaping Neighbourhoods 2021-06-29

the world's mega cities are forming megaregions which stretch hundreds of miles across countries as more people and economic activities are expected to continue to concentrate in these regions countries are developing policies to secure the competitive advantages of these regions necessary for their economic success although existing literature recognizes these trends little analysis has been carried out at the theoretical level in particular how and why megaregions form where they are explicitly located and how they are defined this book constitutes a thorough examination of the characteristics of megaregions and reveals current challenges and future opportunities as well as a guide to developing policies necessary for ensuring future prosperity and sustainable development within them

Spatial Planning, Urban Form and Sustainable

Transport 2017-03-02

this book focuses on spatial planning an important determinant of energy saving and renewable energy supply revealing the key driving forces for spatial development supporting the shift towards energy efficiency and renewable energy supplies it shows the importance of integrated spatial and energy planning approaches for a timely and sustainable change of energy systems thus supporting policies of climate protection as operating within the context of renewable energy sources is becoming a major policy issue at the international european and national level spatial dimensions of renewable energy systems as well as challenges barriers and opportunities in different spatial contexts become more important this book analyses not only the fundamental system interrelations between resources technologies and consumption patterns with respect to energy but also the links to the spatial context and provides guidelines for researchers as well as practitioners in this new emerging field it presents innovative analytical tools to solve real world problems and discusses the most important fields of action in integrated spatial and energy planning including planning contents planning visions and principles as well as planning process design and planning methodology

Megaregions, Prosperity and Sustainability

2015-01-30

this book documents and analyses spatial planning in ghana providing a comprehensive and critical discussion of the evolving institutional and legal arrangements that have shaped and defined ghana s spatial planning system for more than seven decades the contemporary policy instruments and mechanisms for articulating and implementing policies and proposals at multiple scales and the formally established procedures for development management it covers important themes in contemporary spatial planning discourse including the evolving meaning scope and purpose of spatial planning globally the scales of spatial planning i e national regional sub regional and local multi level integration within spatial planning public participation the interface between urbanization sustainable growth management and spatial planning spatial planning and housing development integrated spatial development and transportation planning and spatial planning and the urban informal economy intended for undergraduate and graduate students and academic researchers and practitioners policy makers in the multidisciplinary field of spatial planning it appeals to readers seeking an international perspective on spatial planning systems and practices

The European Spatial Development Perspective **(ESDP) 1999**

this book discusses the future and present regional challenges of southern europe adopting a multidisciplinary perspective concerning planning regional development the role of innovation and sustainability of cities it offers as such an insight into the current status quo of regional development and territorial dynamics of a region of growing world interest southern europe has significantly changed over the last decades at a regional level key issues such as local and regional governance sustainability and preservation of heritage have presided as prime directives within the umbrella of the european union the recession had devastating consequences on the perception and the economies of southern europe however the resilience and capacity of southern europe to reinvent itself have been shown over the last decade southern europe has since antiquity been a cradle of invention innovation and regional development that under adequate and visionary governance may bring a growing engine towards sustainability

Integrated Spatial and Energy Planning

2016-04-02

the council of europe european conference of ministers responsible for regional spatial planning cemac brings together representatives of the 47 member states of the council of europe united in their pursuit of a common objective sustainable spatial development of the european continent this compendium presents the texts adopted by cemac between 1970 and 2010 and the most important texts adopted by the committee of ministers of the council of europe regarding cemac p 4 of cover

Toward carbon neutrality: Spatial planning and sustainable utilization of natural resource

2023-02-24

in 2003 the labour government published its ambitious sustainable communities plan it promised to bring about a step change in the english planning system and a new emphasis on the construction of more balanced cohesive and competitive

places this book uses historical and contemporary materials to document the ways in which policy makers in different eras have sought to use state powers and regulations to create better more balanced and sustainable communities and citizens it charts the changes that have take place in community building policy frameworks place imaginations and core spatial policy initiatives in the uk since 1945 in so doing it examines the tensions that have emerged within spatial policy over the types of places that should be created and the forms of mobility and fixity required to create them it also shows that there are significant lessons that can be learnt from the experiences of the past these can be used to inform contemporary policy debates over issues such as migration uneven development key worker housing and sustainability the book will be an important text for students and researchers in geography urban studies planning and modern social history it will also be of interest to practitioners working in central and local government voluntary organisations community groups and those involved in the planning and design of sustainable communities

Spatial Planning in Ghana 2018-10-24

the council of europe landscape convention was adopted in florence italy on 20 october 2000 with the aim of promoting the protection management and planning

of european landscape and organising european co operation in this area it is the first international treaty covering all aspects of european landscape it applies to the entire territory of the contracting parties and covers natural rural urban and peri urban areas it concerns landscapes that might be considered outstanding commonplace or deteriorated by taking into account landscape culture and nature the council of europe seeks to protect the quality of life and well being of europeans in a sustainable development perspective

Sustainable Development in Southern Europe

2020-10-27

publication drawn up by the european conference of ministers responsible for regional spatial planning cemart of the council of europe

Council of Europe Conference of Ministers Responsible for Spatial/Regional Planning

(CEMAT). 2010-01-01

the real and virtual worlds of spatial planning brings together contributions from leaders in landscape transportation and urban planning they present case studies from north america europe australia asia and africa that ground the exploration of ideas in the realities of sustainable urban and regional planning landscape planning and present the prospects for using virtual worlds for modeling spatial environments and their application in planning the first part explores the challenges for planning in the real world that are caused by the dynamics of socio spatial systems as well as by the contradictions of their evolutionary trends related to their spatial layout the second part presents diverse concepts to model analyze visualize monitor and control socio spatial systems by using virtual worlds

Building sustainable communities 2007-01-10

the open access version of this book available at doi org 10 4324 9780429290626 has been made available under a creative commons attribution non commercial no derivatives 4 0 license large scale migration from rural to urban areas and between countries affects sustainable development at local national and regional levels to strengthen urban and rural resilience to global challenges sustainable

development goals connectivity dilemma land and geospatial information for urban and rural resilience brings together leading international geospatial experts to analyze the role of land and geospatial data infrastructures and services for achieving the united nations sustainable development goals sdgs while the goals outlined in the 2030 agenda have been longstanding aspirations worldwide the complexity and connectivity between social economic environmental and governance challenges are changing with large scale urbanization and population growth structured in 5 parts the themes and objectives of the book are in line with the critical challenges gaps and opportunities raised at all un ggim events and un ggim academic network forums through the different perspectives of scholars industry actors and policy makers this book provides interdisciplinary analysis and multisectoral expertise on the interconnection between the sdgs geospatial information and urban and rural resilience sustainable development goals connectivity dilemma land and geospatial information for urban and rural resilience is an essential reference for researchers industry professionals and postgraduate students in fields such as geomatics land administration urban planning gis and sustainable development it will also prove a vital resource for environmental protection specialists government practitioners un ggim delegates and geospatial and land administration agencies features introduces a holistic and new approach to sustainable development brings together social economic and

environmental dimensions of sustainability highlights the significance and the role of geospatial information in sustainable development examines urban and rural interdependencies in the context of strengthening resilience written by experts with diverse academic and professional backgrounds who examine connectivity and develop strategic pathways

Landscape and Sustainable Development

2006-01-01

this publication has been designed to assist member states in integrating transport health quality of life and environmental objectives into urban and spatial planning policies it provides many references to case studies good practices and examples from cities across the euro asian region and beyond covering a wide array of thematic areas including the future of sustainable urban mobility spatial planning in function of sustainable urban mobility and accessibility public transport planning as a cornerstone of sustainable urban mobility active mobility and how it promotes health and the environment and the potential of intelligent transport systems in an urban context the publication puts forward a methodology for sustainable urban transport planning and introduces a concise set of key messages

and recommendations as an input to the fifth high level meeting on transport health and environment which takes place in vienna from 26 27 november 2020

Glossaire Du Développement Territorial

2007-01-01

global warming and the resulting climate change affecting our cities the most for this reason planners and designers have started to introduce different approaches to make cities more sustainable and livable this book contains new theories approaches and practices that scientists dealing with physical planning and design

The Real and Virtual Worlds of Spatial Planning

2013-03-09

this book examines the role and position of urban agriculture in the spatial and functional structure of cities in the global south in the face of dynamic urbanisation and negative consequences of climate change one of the key challenges is not only how to provide food for the ever growing urban population but also how to achieve urban sustainability and simultaneously reduce the negative impact of cities on the

natural environment these problems are particularly urgent in the metropolises of the global south that are experiencing the greatest population growth while struggling with increasing social inequalities and the resulting uneven distribution of resources examining the role that urban agriculture can play in addressing these challenges this book draws on three case study cities havana singapore and kigali the case studies differing in socio economic spatial political and environmental terms exemplify diverse characteristics of urban agriculture in different geographical conditions drawing on fieldwork conducted in each city the book also provides a unique perspective on the constraints in the development of urban agriculture and the use of its full potential for urban sustainability this book will be appeal to students and scholars as well as decision makers interested in the issues of urban sustainability food security spatial development and alternative food systems

ESDP 1999

gis for sustainable development examines how gis applications can improve collaboration in decision making among those involved in promoting sustainable development this volume reviews leading giscience providing an overview of research topics and applications that enable gis newcomers and professionals to

apply giscience methods to sustainable spatial planning divided into three parts the book begins with an introduction to the issues of sustainability focusing on concepts concerning gis adoption and use within public organizations that are planning development part ii focuses on giscience methods which can be used to support sustainable development and solve environmental problems part iii presents research projects and best practices relating to different areas of application within the field this text provides the latest research findings delivers complete references to related publications and supplies you with a complete reference framework for each topic

Sustainable Development Goals Connectivity Dilemma 2019-08-05

this handbook provides the latest research related to quality of life and sustainability taking into account social economic environmental and political governance aspects as well as specific socio spatial contexts the volume includes contributions from established and upcoming scholars from various disciplines and geographical contexts global south and north the varying cultural and socio spatial contexts of the authors in the selected cases contribute to first hand knowledge on

the realities of sustainability issues affecting the quality of life the authors apply a wide diversity of methods and tools which facilitates a unique understanding of the interlinkages between quality of life and sustainability the chapters are grouped in three main sections concepts and foundations tools techniques and applications and innovations the authors provide their own view and theoretical approximation of the dimensions of sustainability in particular on how these dimensions play out in relation to quality of life the combination of sustainability and quality of life concepts and perspectives is particularly important in unravelling the multi faceted nature of human urban rural spatial development

A Handbook on Sustainable Urban Mobility and Spatial Planning 2020-10-29

spatial planning strongly advocated by government and the profession is intended to be more holistic more strategic more inclusive more integrative and more attuned to sustainable development than previous approaches in what the authors refer to as the new spatial planning there is a fairly rapidly evolving maturity and sophistication in how strategies are developed and produced crucially the authors argue that the reworked boundaries of spatial planning means that to understand

it we need to look as much outside the formal system of practices of planning as within it using a rich empirical resource base this book takes a critical look at recent practices to see whether the new spatial planning is having the kinds of impacts its advocates would wish contributing to theoretical debates in planning state restructuring and governance it also outlines and critiques the contemporary practice of spatial planning this book will have a place on the shelves of researchers and students interested in urban regional studies politics and planning studies
