including the us senior project engineer alberto marquez is a senior project engineer at hatfield group in new york city he earned a master s in civil engineering from the university of texas at austin his work experience includes working on the steel erection of chicago towers such as 363 n clark 155 n wacker and 300 e randolph building on the author s structural mechanics fundamentals this text presents a complete and uniform treatment of the more advanced topics in structural mechanics ranging from beam frames to shell structures from dynamics to buckling analysis from plasticity to fracture mechanics from long span to high rise civil structures this book presents a complete and unified treatment of the fundamental themes of structural mechanics ranging from the traditional to the most advanced topics covering mechanics of linear elastic solids theory of beam systems and phenomena of structural failure abstract structural mechanics fundamentals gives you a complete and uniform treatment of the most fundamental and essential topics in structural mechanics presenting a traditional subject in an updated and modernized way it merges classical topics with ones that have taken shape in more recent times such as duality this book presents a complete and unified treatment of the fundamental themes of structural mechanics ranging from the traditional to the most advanced
