at its meeting in april 1990 at the university of cambridge the executive committee of the international mathematical union imu decided that the largely unorganized archives of the union should be properly arranged and catalogued simultaneously the executive committee expressed the wish that a history of the union should be written i as secretary of the union i had proposed that these issues be discussed at the cambridge meeting but without having had in mind any personal role in the practical execution of such projects at that time the papers of the imu were stored in zurich at the eidgenossische technische hochschule

and i saw no reason why they could not remain there at about this time professor k chandrasekharan produced a handwritten article titled the prehistory of the international mathematical union 2 and it seemed to me that this might serve as the beginning of a more comprehensive history i had first thought that tuulikki makeuinen who during eight years as the office secretary of the imu had become well acquainted with the union would do the arranging of the archives in zurich she had a preliminary look at the material there but it soon became clear that the amount of work required to bring order to it was too great to be accomplished in a few short visits from helsinki the total volume of material was formidable
